FOREWORD

The 2011 Census of Population and Housing was the seventeenth official one to be carried out in Malta since 1842.

This publication incorporates detailed results, compilations and cross-analyses of the data collected through the Census carried out across the Maltese Islands on 20 November 2011. It provides definitive statistics on the demographic and social condition of residents and households, including information on housing and amenities at a national, regional and local level. The Census is a valuable exercise because information is collected on the whole population at a point in time. It is comprehensive as all resident persons are required by law to participate.

The population of Malta as recorded in the Census stood at 417,432, nearly double the count a century ago. Private households numbered nearly 153,000. Although only six years elapsed between this Census and the last one carried out in 2005, noteworthy socio-demographic indicators emerged. The average age was 40.5 years, indicating a continuation of the trend towards an ageing population. Also evident was the direction towards smaller private households and an increase in single-person households.

Every census exercise is specific and exhibits its own special characteristics. The 2011 Census was part of a European Union-wide Round, since all Member States conducted their own national censuses. In fact its legal basis is twofold: the Maltese Census Act of 1948 and Regulation 763/2008 of the European Parliament and of the Council. This Regulation establishes common rules for the provision of comprehensive data on population and housing every ten years by the EU Member States. In view of this, the data from the 2011 Census are comparable across the EU.

There were many contributors to the 2011 Census. Primary among these is the resident population of these Islands who co-operated with the census field officers in the completion and collection of the questionnaires. In addition, I would like to acknowledge the support of many individuals and organisations who worked closely with the NSO. Furthermore, the hard work and dedication of NSO staff, led by my deputy Mr Silvan Zammit, deserve special mention and thanks. Their effort was instrumental to seeing this most complex statistical project through to a successful conclusion.

Michael Pace Ross
Census Officer

January 2014

COMMENTARY

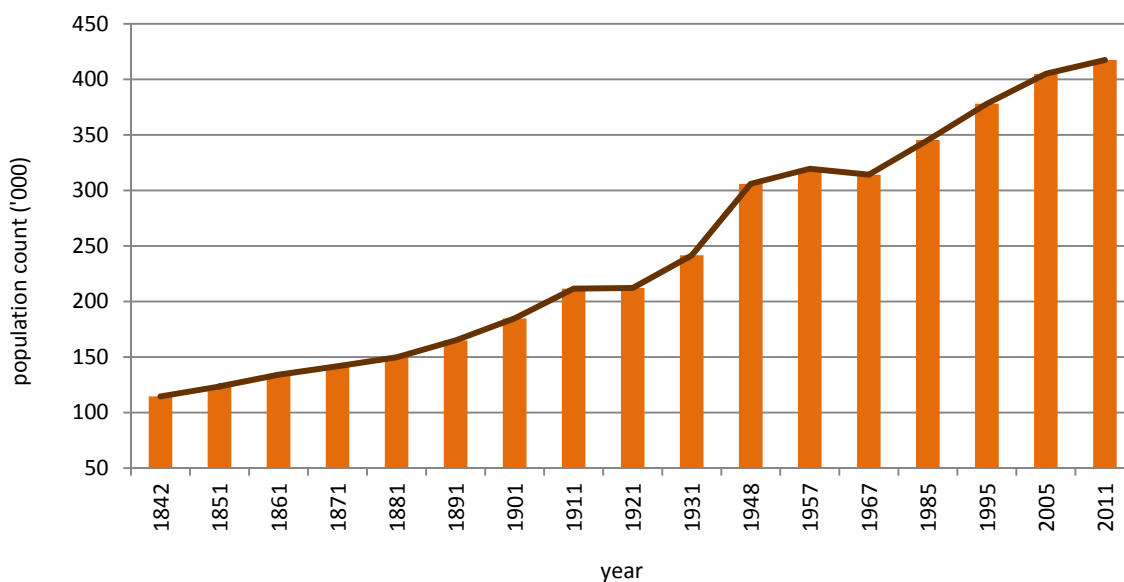

POPULATION

Population growth

Over a century, the population of Malta nearly doubled, from 211,564 in 1911 to 417,432 in 2011, although the rate of change in the population varied along the years and was affected by several factors, such as world wars and migration flows.

Although a direct comparison with past censuses may not be strictly possible, the trends in population growth rates are evident. In fact, the rate of increase in the population decreased in recent years, compared to the sharp increase observed at the start of the century.

Chart 1. Population growth: 1842-2011

In a European Union context, Malta remains the smallest country, placing behind Luxembourg and Cyprus, the only countries with less than a million inhabitants. The average population size of the EU Member States stands at 18.6 million.

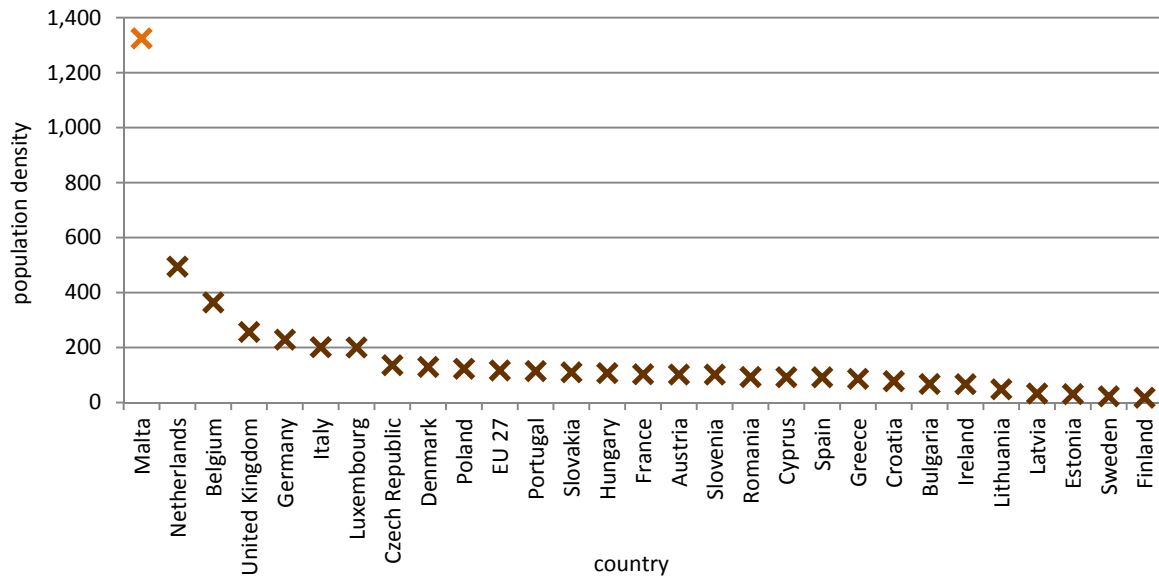

Geographical distribution and density

Classified by district, the most thickly inhabited was the Northern Harbour District, with 120,449 residents, or 28.9 per cent of the entire population, compared with 31,375 residents in Gozo and Comino, the latter being the smallest district.

In terms of population size, the largest locality was Birkirkara with 21,749 residents, followed by Mosta and St Paul's Bay, with 19,750 and 16,395 residents respectively. Altogether, the largest three localities in Malta garner a 13.9 per cent share of the total population. In contrast, the share of Gozo and Comino is 7.5 per cent.

Conversely, the smallest locality was Mdina, with 239 residents, followed by Għasri and San Lawrenz with 431 and 610 persons respectively.

Chart 2. Population density by country

As opposed to population size, Malta by far ranked first among all EU Member States in terms of population density, with an average 1,325 persons per square kilometre, compared with the EU average of 117 persons per square kilometre. The second most densely populated country within the EU was the Netherlands, with 495 persons per square kilometre.

The high density rate was even more pronounced when analysed at regional and locality level. Mainland Malta was more densely populated than Gozo, with an average 1,566 persons per square kilometre compared with Gozo's 457 persons per square kilometre. In terms of districts, the Northern Harbour District (5,014 persons/km²) and Southern Harbour District (3,035 persons/km²) were the most densely populated and also the smallest ones in terms of land-area, with 24.0 km² and 26.2 km² respectively.

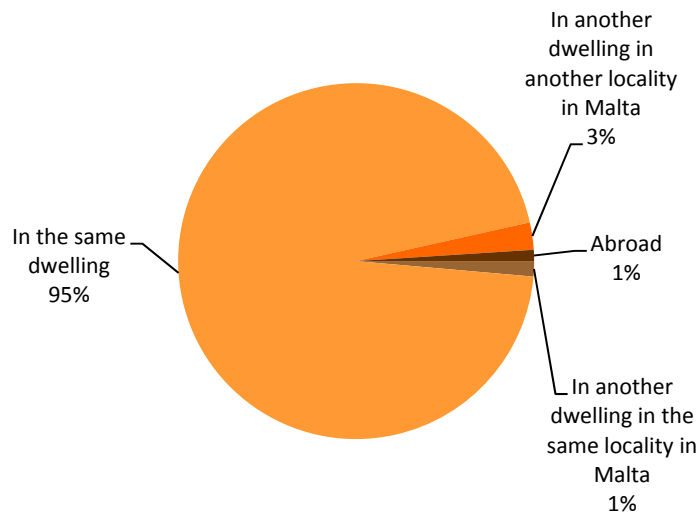

On the other hand, the three most densely populated localities were Senglea (17,146 persons/km²), Tas-Sliema (10,511 persons/km²) and Fgura (10,019 persons/km²). In terms of land-area, Senglea is the smallest locality with 0.16km², compared with 1.14 km² and 1.30 km² for Fgura and Tas-Sliema respectively, which ranked 48th and 49th. In contrast, the largest three localities are Rabat (26.60 km²), Mellieħa (22.64 km²) and Siggiewi (19.88 km²), with Rabat being larger than the entire Northern Harbour (24.02 km²) or Southern Harbour (26.17 km²) districts.

Migration

A total of 4,178 residents, comprising 2,291 males and 1,887 females, had been living in another country one year prior to the Census, with the majority being British (1,203 or 28.8 per cent), followed by Somalis (249 persons) and Italians (213 persons).

Internal migration also continued to increase in occurrence. Although more than 95 per cent of those who lived in Malta one year prior to the Census resided in the same dwelling where they had been enumerated, nearly 6,000 persons moved to another dwelling in the same locality. More than 10,000 moved to another dwelling in another locality.

Chart 3. Persons aged 1 and over by place of residence one year prior to Census

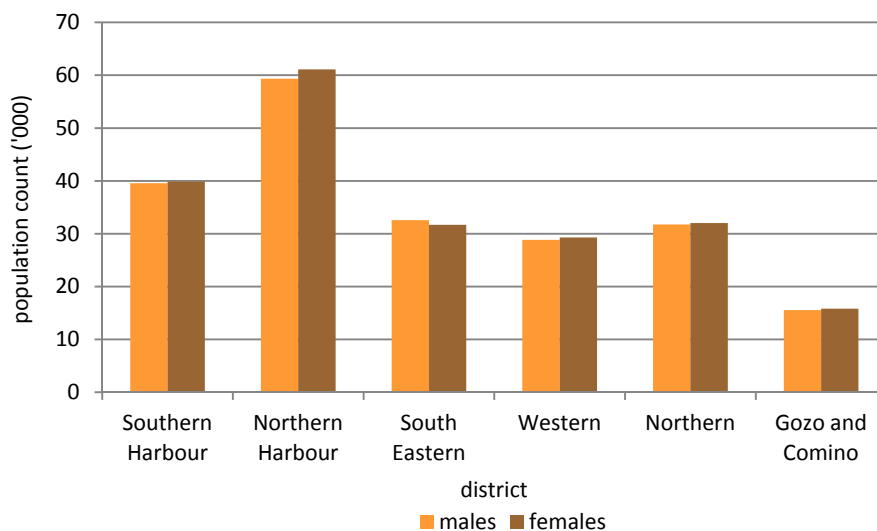

Although different results were observed at locality level, the internal migration flow was most intense in the Northern Harbour District, followed by the Southern Harbour District.

Sex

In 2011, the population of Malta comprised more females (209,807) than males (207,625). This trend was quite in-line with the gender distribution observed in the other EU Member States, although the gap between the two sexes in Malta is narrowing gradually.

On a regional basis, gender distribution reflected the national proportions, while in Gozo and Comino, the male population segment was less pronounced than its female counterpart. Indeed, the South Eastern District was the only region with a majority of males over females.

Chart 4. Geographical distribution by sex and district

At a locality level, Mdina had the largest share of females, with 55.2 per cent of its residents, followed by Ғal Luqa (52.8 per cent) and Tas-Sliema (52.5 per cent). On the contrary, a number of localities had more male residents. In Birzebbuęa 54.2 per cent were males, followed by Paola (51.5 per cent) and Ғad-Dingli (51.2 per cent).

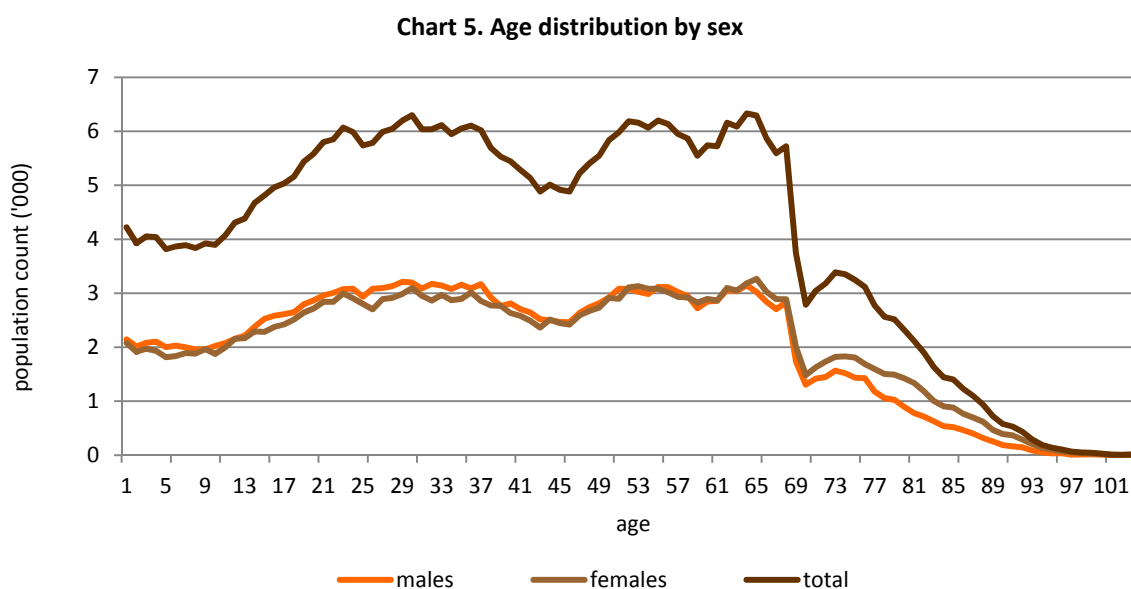

In Gozo, most localities (nine out of 14) had a predominance of male residents, although the difference was often marginal. In spite of this, the largest differences in terms of gender ratios were observed in Victoria (51.5 per cent), Fontana (51.2 per cent) and Xewkija (51.2 per cent), where a larger share of females was observed, as opposed to Ғebbuę which exhibited the only significant difference in favour of males (51.2 per cent).

Age

On Census Day the average age of the population stood at 40.5 years, indicating that the upward shift in the age composition of the population continued to materialise. This varied from 41.6 for females to 39.4 for males. On a regional basis, persons residing in Gozo and Comino were slightly older (41.7 years) than their Maltese counterparts (40.4 years).

The average age observed for some localities was characterised by a number of external factors, such as the presence of homes for the elderly and other institutional households.

In the Census, persons aged 65 and over represented 16.3 per cent of the total population compared to 14.8 per cent of persons aged 14 or less. Mdina was the oldest locality (52.4 years) followed by Floriana (48.4 years) and Ғal Luqa (48.2 years). The localities with the youngest average age were Pembroke, Xęhajra and Mtarfa (all less than 35).

Although the average age of the resident population has been increasing over the past years, Malta is still relatively young compared to other EU Member States. In fact, Malta's old-age dependency ratio stands at 23.7 per cent, compared to 26.8 per cent across the EU.

Characteristics of Institutional households

A total of 152,980 private households and 255 institutional households were recorded in the census. People living in private households were enumerated at 408,783, while 8,649 persons were counted in institutional households.

Both the private-household population and the institutional-household population increased over past censuses. The rise in population in institutional households compared to previous censuses was also characterised by the enumeration of open centres and refugee homes in 2011.

In general, the majority of persons residing in institutional households were found in homes for the elderly (41.2 per cent), followed by refugee homes and open centres (20.9 per cent) and convents (19 per cent).

Population in institutional households by type

Type of institution	Number	%
Prison/Rehabilitation centre	620	7.2
Refugee home/Open centre	1,810	20.9
Convent	1,642	19.0
Hospital	547	6.3
Home for the elderly	3,562	41.2
School	45	0.5
Hotel, Hostel, Aparthotel and Guest house	24	0.3
Establishment for the disabled	227	2.6
Children and young people's home	106	1.2
Other	66	0.8
Total	8,649	100.0

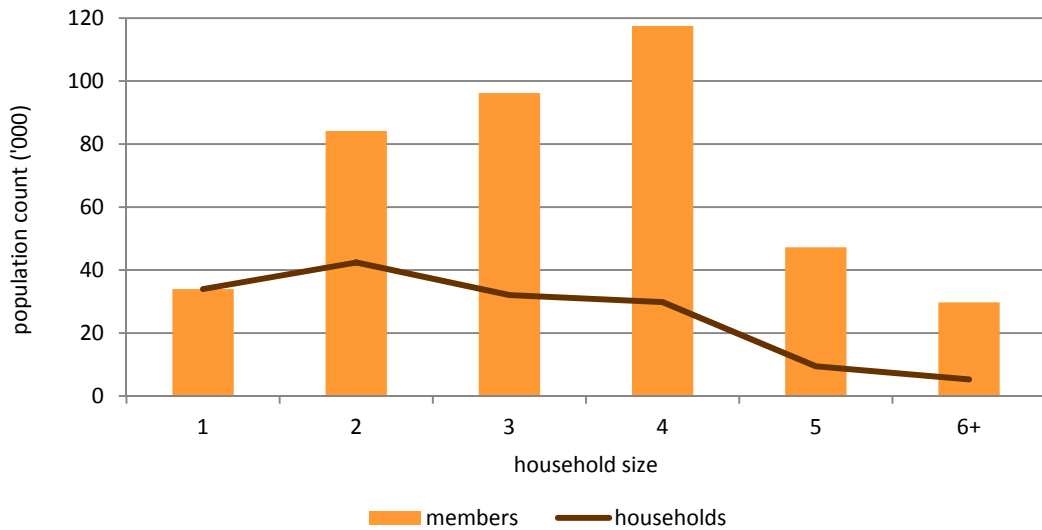

Various institutional households exhibit a different socio-economic profile than other private households. In particular, a larger share of females was found in institutional households (55.6 per cent), whereas the average age of individuals residing in these establishments stood at 59.5, compared to 40.1 for persons in private households.

Institutional households are unevenly spread across the island, with the largest population found in the Southern Harbour (26.6 per cent) and South Eastern districts (23 per cent). In fact, nearly a third of the total population enumerated in institutional households was located in Birżebbuġa and Ғal Luqa, with a total of 2,718 persons.

Household Composition

The trend towards smaller private households continued, with an average household size of 2.7 persons. This was partly characterised by a rise in single-member households, which totalled 34,637, or 22.6 per cent of private households, with the majority having a reference person aged between 30 and 64 (11.5 per cent of all households).

Chart 6. Population and households by size

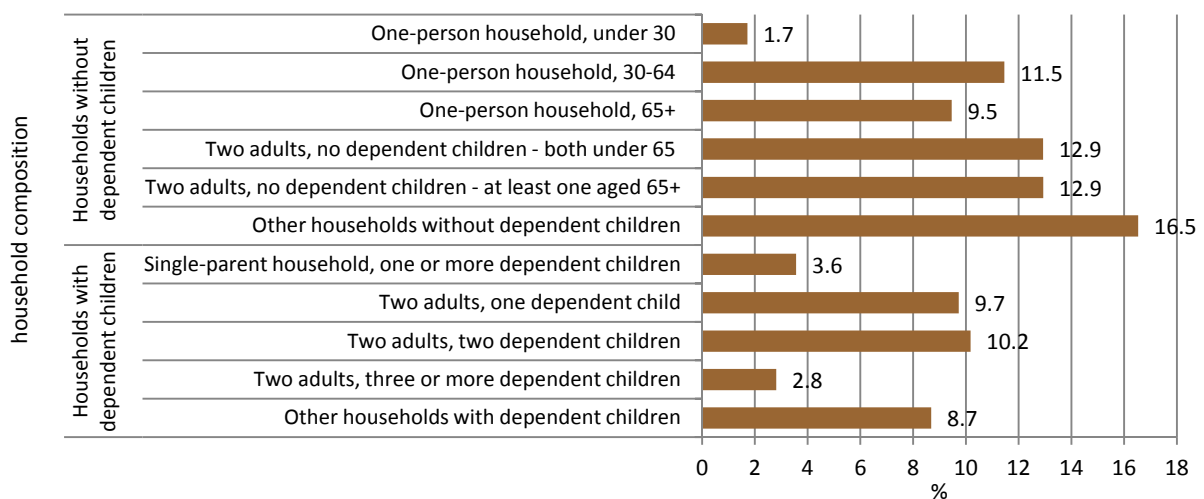

In addition, the majority of households had two members (27.9 per cent) and the reference persons were mostly males (74.1 per cent), with an average age of 53.3. This contrasts with 42,951 households (or 28.1 per cent) with at least four members.

On the other hand, female reference persons were relatively older than their male counterparts, with an average age of 56.5.

In the majority of households (65 per cent) there were no children residing on a regular basis. In such cases, reference persons were married in slightly more than half the households (53.2 per cent), followed by single (20.5 per cent) and widowed (16 per cent).

Chart 7. Distribution of private households by type

In the case of households with children, the vast majority of reference persons were married (82.5 per cent), followed by separated (8.3 per cent) and single (4.7 per cent). Furthermore, of the remaining households with children, single-parent households with one or more dependent children amounted to 5,456, or 3.6 per cent of all households.

If families in private households are considered, a total of 118,960 family nuclei emerge, with the majority comprising a married couple with at least one child aged 25 or less (51,187 or 43 per cent), followed by a married couple without children (31,422 or 26.4 per cent).

A total of 3,975 persons in an opposite-sex consensual union were enumerated while another 168 persons were in a same-sex consensual union. The number of lone-parent households totalled 19,587, or 16.5 per cent of all family nuclei, where more than half (59.5 per cent) were lone mothers with at least one child aged less than 25.

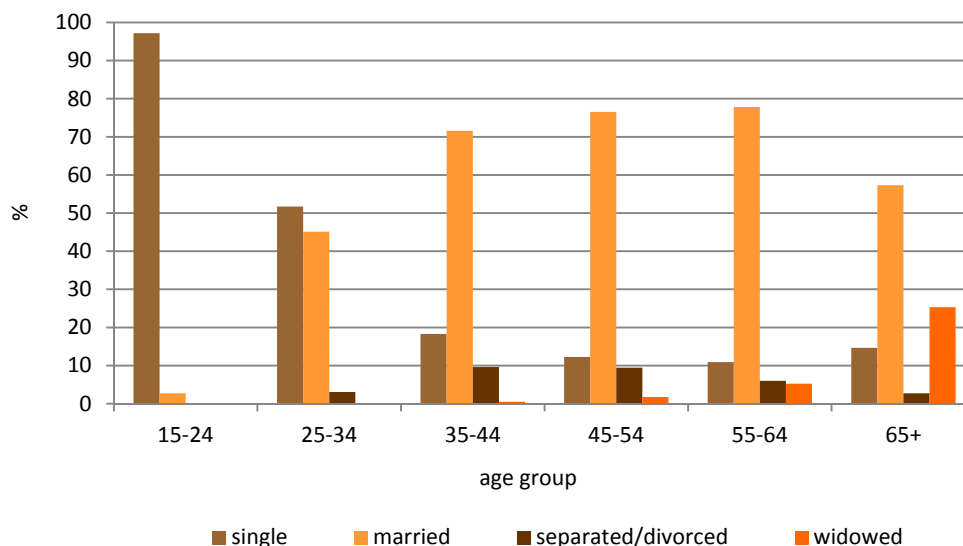

Marital Status and Fertility

In 2011, the number of mothers stood at 118,921, of whom 6,027 had never been married while another 923 had their marriage annulled. On average females gave birth for the first time at the age of 24.9. The median age stood at 24, indicating that half the mothers gave birth before this age.

The age at first birth was also found to be highly related to the age at first marriage, the latter being 23.9 for females.

According to the 2011 Census, 56.2 per cent of residents aged 16 and over were married. Single persons (including those who had their marriage annulled) accounted for 32.5 per cent of the population in this age cohort, whereas the number of separated residents increased to nearly 16,000 (7,516 males and 8,471 females). The number of divorced persons increased to nearly 2,000 with no significant difference observed over the two sexes. When the Census was taken, divorce legislation had just been introduced in Malta.

Chart 8. Persons aged 16 and over by marital status and age group

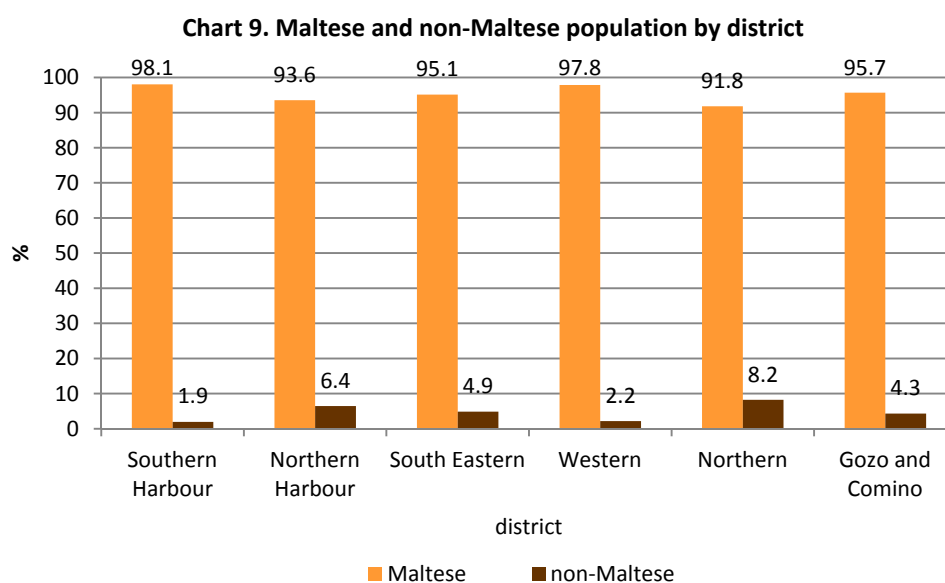

Citizenship and Nationality

The total population includes both Maltese and non-Maltese nationals. In the census a resident in possession of a Maltese citizenship is considered to be a Maltese national, irrespective of the place of birth. Results for citizenship and nationality are generally similar.

Non-Maltese nationals, or persons not in possession of a Maltese citizenship, amounted to 20,289, or 4.9 per cent of the enumerated population, of whom 643 were born in Malta. The majority of non-Maltese nationals (12,215 or 60.2 per cent) are EU citizens, particularly from the United Kingdom (6,652 persons), while the majority of non-EU citizens were Somalis (1,041 persons). There were 2,279 non-Maltese nationals in institutional households, particularly in open centres and refugee homes.

On a demographic level, the largest proportion of non-Maltese nationals were males (52.5 per cent) and slightly younger than the norm, with an average age of 40.6.

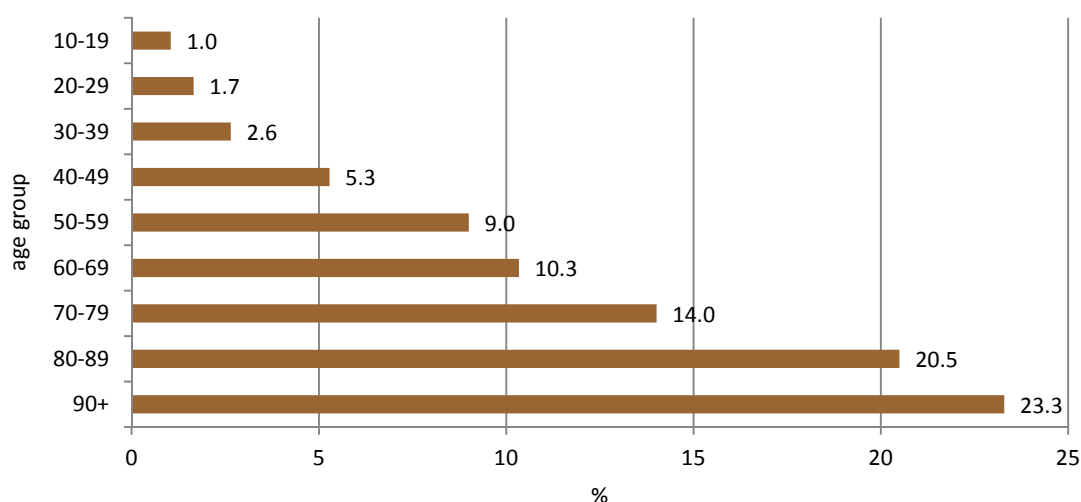

On a regional basis, non-Maltese nationals were predominantly found in the Northern Harbour District (38.3 per cent) similarly as their Maltese counterparts (28.4 per cent), but a smaller percentage resided in the Southern Harbour District, with 7.6 per cent as opposed to 19.6 per cent for Maltese nationals.

Education and Languages spoken

In 2011, the literacy rate stood at 93.6 per cent for persons aged 10 and over, resulting in 24,074 illiterate persons (6.4 per cent). The literacy rate was found to be highly influenced by age, and consequently, older regions and localities also exhibited higher illiteracy rates than average. The illiteracy rate varied between 23.3 per cent for persons aged 90 and over to 10.3 per cent for those aged 60 to 69, and continued to decrease gradually to a minimum of 1.0 per cent for persons aged 10 to 19.

Chart 10. Illiteracy rates by age group

With regard to educational attainment, 49,995 persons, or 14.1 per cent of those aged 15 and over, had a tertiary level of education, while 18,792 persons or 5.3 per cent had a post-secondary non-tertiary level. In particular, nearly half the population aged 15 and over (165,223 persons) were in possession of an Ordinary level of education or higher, of whom 38,282 or 10.8 per cent had at least a First degree qualification.

In the Census, people aged 10 and over were asked to indicate how well they spoke a number of languages, including Maltese, English, Italian, French, German and Arabic. As expected, 93.2 per cent of persons said they could speak fluently in Maltese. As for English, nearly two-thirds said they could speak well, while another 16.3 per cent claimed to have an average standard.

If persons claiming a good or average standard are considered, the third and fourth most popular languages spoken by persons aged 10 and over were Italian (41.3 per cent) and French (8.1 per cent).

Labour Status and Employment

Nearly half the active population (those aged 15 and over) was gainfully occupied during the reference week prior to the Census, with 48.3 per cent or 171,855 persons. Contrasting results were observed at gender level, with the majority of males aged 15 and over being gainfully occupied (60.7 per cent) while the majority of females were taking care of the house or family (41.8 per cent). In addition, the percentage of gainfully occupied females stood at 36.2 per cent.

Different patterns were observed when analysing data by age-group, with a strong positive correlation noted between the percentage of gainfully occupied persons and age, up to the age of 39, and a steady decline in older age groups. In fact, the percentage of gainfully occupied persons reaches its maximum (76.5 per cent) for persons aged 30 to 39 compared with 73.7 per cent of persons aged 20 to 29 and 69.7 per cent of those aged 40 to 49.

Contrasting results were also evident at district level, with the lowest percentages of gainfully occupied persons observed in the Southern Harbour region and Gozo and Comino, with 43.4 per cent and 44.2 per cent respectively, as opposed to the Northern District, where the percentage of gainfully occupied reached 52.8 per cent. An opposite pattern was observed for the proportion of retired persons, with the Southern Harbour district and Gozo and Comino showing the largest

percentages (16.9 per cent and 16.2 per cent respectively) compared to 11.2 per cent in the Northern district.

As for the unemployed, a total of 13,228, or 3.7 per cent of persons aged 15 and over, were seeking employment during the reference week prior to the census. Of these, 35.4 per cent claimed they never worked before.

On a regional basis, the highest unemployment rate was observed in the South Eastern District with 5.4 per cent, followed by the Southern Harbour (4.5 per cent) and Gozo and Comino (3.7 per cent).

More than a third of all gainfully occupied persons worked in the Northern Harbour district (34.1 per cent), followed by the Southern Harbour District (24.1 per cent). Another 17,421 persons, or 10.1 per cent, did not have any fixed place of work, while another 1,646 persons worked from home. A significant number of persons without a fixed place of work were males, with 85.2 per cent, or 14,837 persons.

Significant differences emerged in terms of occupation and economic activity between the two sexes. Indeed most females worked as service and sales workers (27.3 per cent), professionals (21.1 per cent) and clerical support workers (17.8 per cent). Conversely, most males were employed as craft and related trade workers (17.0 per cent), service and sales workers (15.1 per cent) and technicians and associate professionals (14.2 per cent).

The wholesale and retail and the manufacturing sectors respectively employed 16.1 per cent and 12.8 per cent of the working population. The majority of men worked in the wholesale and retail and manufacturing sectors, with 15.7 per cent and 15.2 per cent respectively. Female workers were concentrated in the wholesale and retail and education sectors, with 16.6 per cent and 15.8 per cent of the total female working population respectively.

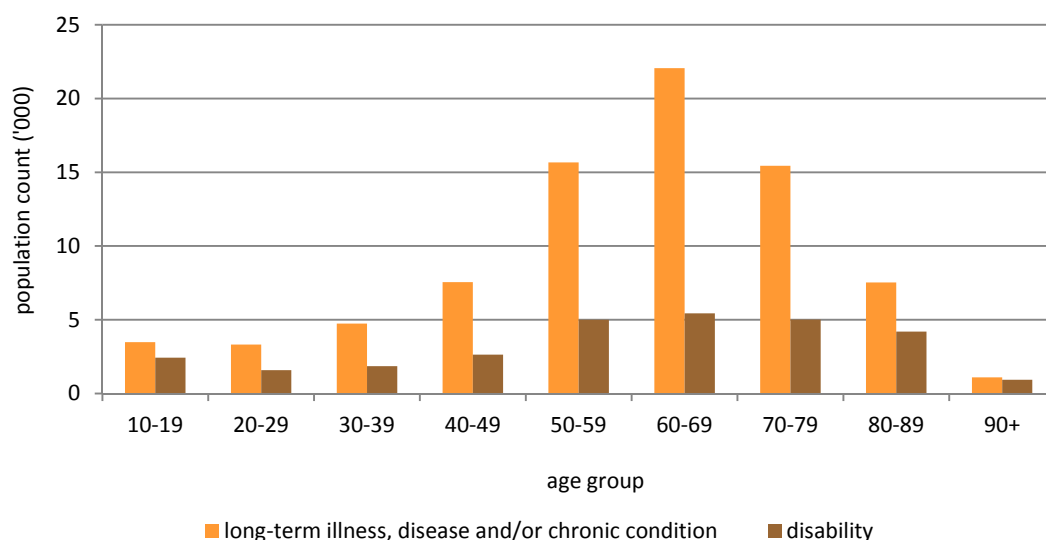

Health and Disability

A total of 83,102 persons or 20 per cent of the population suffered from a long-term illness, disease and/or chronic condition. Of these, 3,943 lived in institutions.

Health issues were particularly age-related, with more than half the persons aged 70 and over suffering from a long-term illness, disease and/or chronic condition, as opposed to 8 per cent of those younger than 40. Long-term illnesses and/or health problems were recorded among 6.5 per cent of those aged less than 20, while a long-term disability was recorded among 4.1 per cent of the same age bracket. A considerably higher fraction of persons aged 80 and over had long-term illnesses and/or health problems (57.6 per cent), while 34.2 per cent stated they had a long-term disability.

A distribution of these persons by age group is shown below:

Chart 11. Illnesses and disabilities by age group

Disability rates exhibited similar characteristics as long-term illnesses, diseases and/or chronic conditions although in smaller proportions. In particular, 30,183 persons or 7.2 per cent of the population had some form of disability or difficulty. Of these 2,851 resided in institutions while another 14,017, or 46.4 per cent, were reference persons in private households.

Nearly a third of those suffering from some form of disability had a physical disability (32 per cent), followed by blindness or partial sight loss and a mental health condition, with less than a quarter (23.6 per cent and 23.3 per cent respectively).

Surnames

The 2011 Census recorded more than 19,000 surnames across the Maltese Islands. More than 13,000, or 3.1 per cent of the total population, had a double-barrel surname, of whom 10,762, or 82.3 per cent, were Maltese nationals.

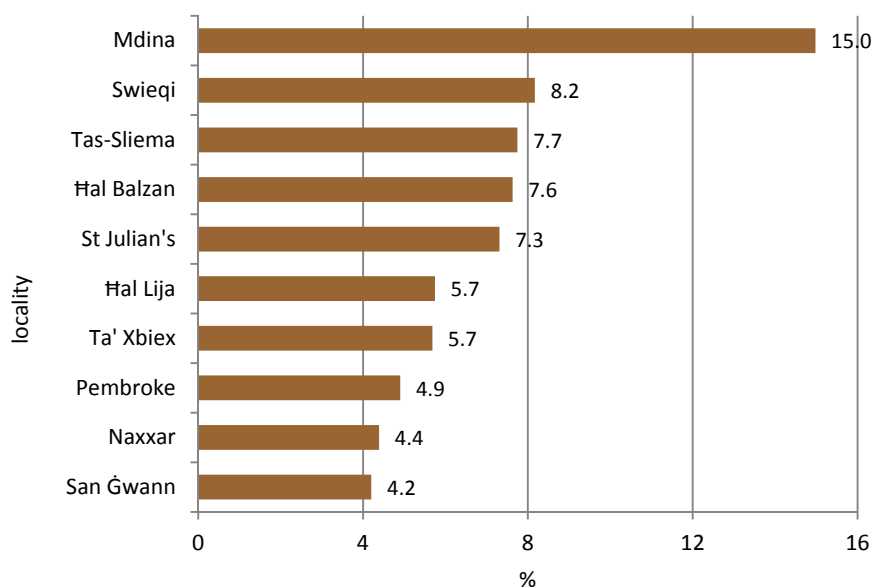

Localities with the highest proportion of residents having a double-barrel surname were Mdina (15 per cent), Swieqi (8.2 per cent), Tas-Sliema (7.7 per cent) and Ħal Balzan (7.6 per cent). Conversely, the smallest proportion of persons having a double-barrel surname was recorded in Gozo.

The most popular surname remained Borg, with 13,610 persons, or 3.3 per cent of the population, bearing this surname, followed by Camilleri and Vella, with 13,109 and 12,249 counts respectively.

Interesting trends emerged when analysing the distribution of surnames at region and locality level. In fact, whereas the majority of the most common surnames are found in Birkirkara and Mosta, the largest two localities on the island, other popular surnames are most prevalent in smaller localities. For instance Vella, Farrugia, Grech and Spiteri are most customary to be found in Mellieħa, Żurrieq, Ħaż-Żabbar and Żejtun respectively. On the other hand, although Carabott is the third most common surname in Marsaxlokk, it places 93rd nationwide.

This trend was also common among other less popular surnames, particularly in Gozo. For instance Mintoff, which is the 144th in rank at national level, is the most common cluster in Għasri, while DeBrincat is most concentrated in Munxar.

Chart 12. Localities with highest percentage of double-barrel surnames

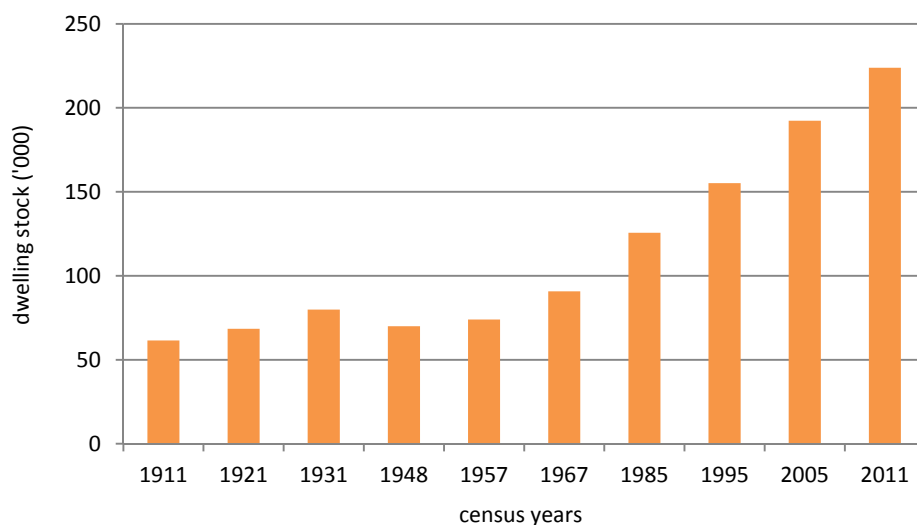

DWELLINGS

Dwelling stock growth

Over a century, the dwelling stock in Malta almost quadrupled, from 61,507 in 1911 to 223,850 in 2011. In the 54 years up to 2011 the increase was threefold, while in the last six years, the number advanced by 16.4 per cent, or 31,536.

Chart 13. Dwelling stock: 1911-2011

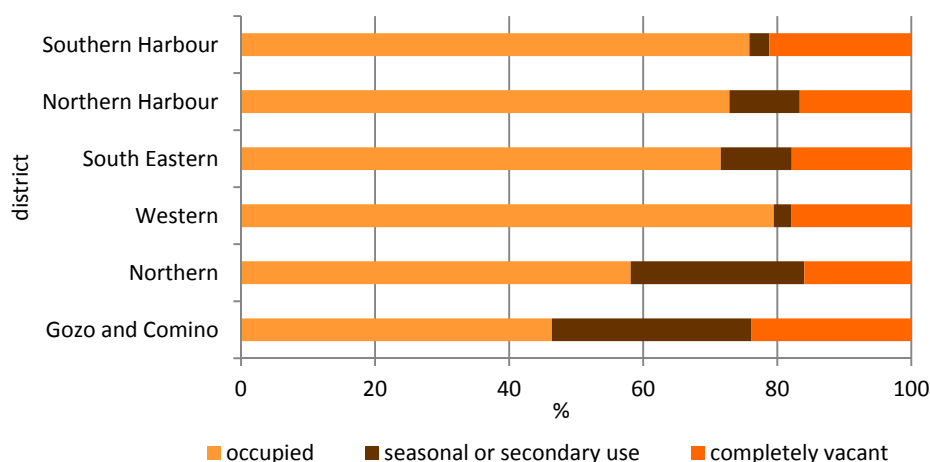

On average, since 1967, the rate of increase in unoccupied property was higher than in occupied property, although differing definitions used in previous censuses make it difficult for a direct comparison over time. On a national level, 68.2 per cent of the total stock of dwellings were occupied, 13.3 per cent were used seasonally or as a secondary residence, while the remaining 18.4 per cent were completely vacant.

Geographical distribution and Occupancy Status

At a district level, 28.3 per cent of the total dwelling stock was located in the Northern Harbour District, with 63,387 units. This was followed by the Northern District with 41,263 dwellings (18.4 per cent). The smallest proportion of dwellings was recorded in the Western District, with 11.0 per cent (24,637 dwellings), slightly less than the rate observed in Gozo and Comino, with 11.2 per cent (25,070 dwellings).

An analysis of the dwelling stock by occupancy status revealed that more than half the dwellings in Gozo and Comino were unoccupied (53.6 per cent), with almost a fourth (23.9 per cent or 5,996 dwellings) being completely vacant. The second largest unoccupancy rate was observed in the Northern District with 41.9 per cent of dwellings, of which more than a fourth (25.9 per cent or 10,692 dwellings) were used seasonally or as a secondary residence. The highest occupancy rate was recorded in the Western District, with 79.5 per cent. In absolute terms, the number of dwellings in the Northern Harbour District which were completely vacant (10,556) was almost equal to the number of occupied dwellings in Gozo and Comino (11,630).

Chart 14. Dwelling stock by occupancy status and district

The majority of dwellings were clustered in St Paul’s Bay, with 17,593 or 7.9 per cent of the total dwelling stock. Tas-Sliema, Birkirkara and Mosta followed with 10,651, 9,977 and 8,359 dwellings respectively. St Paul’s Bay ranked first in terms of completely vacant dwellings and second in terms of occupied dwellings, while the opposite was true for Birkirkara, where the largest number of occupied dwellings was recorded. On the other hand, the smallest localities in terms of number of dwellings, were Mdina, Għasri and San Lawrenz with 144, 370 and 513 units respectively.

The locality with the highest occupancy rate was Santa Luċija, with 95.4 per cent, followed by Pembroke (91.6 per cent) and Mtarfa (90.1 per cent). These contrasted with Żebbuġ (19.1 per cent), including Marsalforn, Munxar (27.1 per cent), including Xlendi, and St Paul’s Bay (42.0 per cent), the localities with the lowest occupancy rates.

Type of Dwellings

Of the total number of dwellings, 82,595 or 36.9 per cent were flats, apartments or penthouses, followed by terraced houses or townhouses (71,120 or 31.8 per cent) and maisonettes or ground floor tenements (55,163 or 24.6 per cent).

The district with the largest percentage of flats, apartments or penthouses was the Northern District, with 52.5 per cent, followed by the Northern Harbour District, with 44.3 per cent. In the other districts the majority of dwellings were either terraced houses or townhouses.

At a locality level, nearly three out of every four dwellings situated in St Paul's Bay and Żebbuġ (Gozo) were flats, apartments or penthouses (77.5 per cent and 74.4 per cent respectively). These were followed by Ta' Xbiex, with 71.4 per cent. In contrast, almost half the dwellings situated in Gozo and Comino (46.7 per cent) were terraced houses or townhouses.

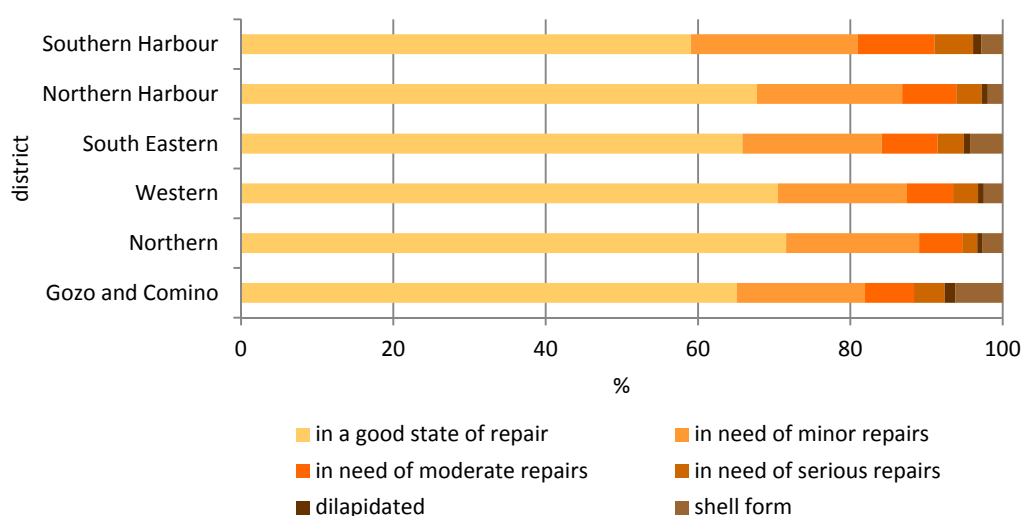

State of Repair

In general, the state of repair of dwellings perceived by respondents was good. In fact, two out of every three dwellings (including both occupied and unoccupied) were considered to be in a good state of repair (66.7 per cent), while 4.4 per cent were in need of serious repairs or in a dilapidated state. Another 3.1 per cent were in shell form.

On average, dwellings in the Northern District were in the best state, as opposed to those in the Southern Harbour District. In addition, the largest percentage of dwellings in shell form was recorded in Gozo and Comino, with 6.2 per cent of the corresponding dwelling stock.

In Valletta, the proportion of dwellings in a good state of repair was the lowest one recorded (41.4 per cent), while the proportion of dwellings in need of serious repairs or in a dilapidated form was the second largest (14.7 per cent), following Mdina (22.2 per cent). This contrasts with the rate observed in Pembroke, where the proportion of dwellings in a good state of repair was the largest (78.8 per cent), while the proportion of dwellings in need of serious repairs or in a dilapidated form was the smallest (0.8 per cent).

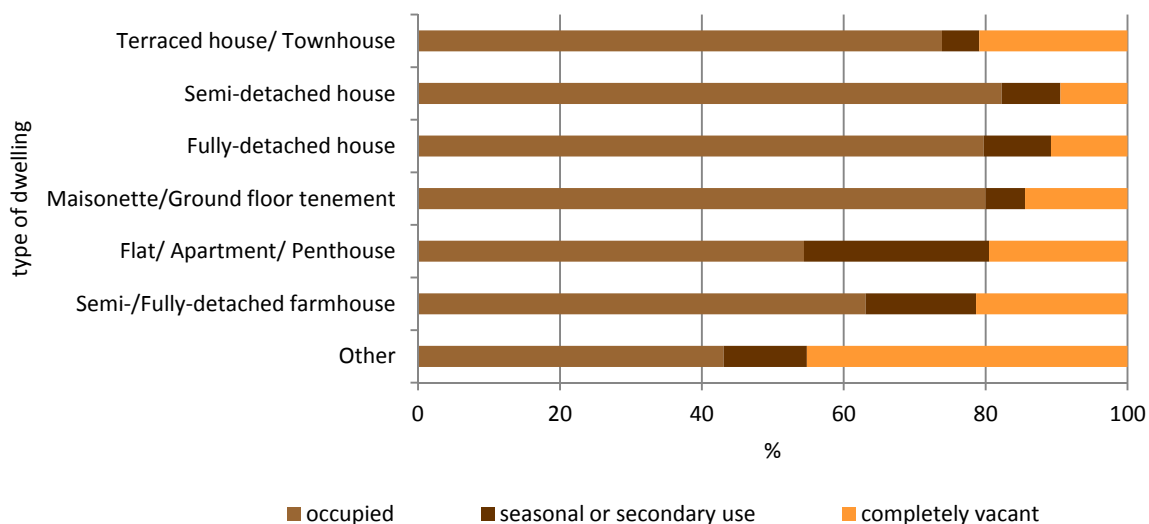

Chart 15. Dwelling stock by state of repair and district

Type

A total of 141,140 occupied dwellings were located on mainland Malta, while another 11,630 dwellings were recorded in Gozo and Comino. The majority of occupied dwellings were terraced houses or townhouses (52,519), followed by flats, apartments or penthouses (44,919) and maisonnettes or ground floor tenements (44,145).

Chart 16. Dwelling stock by occupancy status and type of dwelling

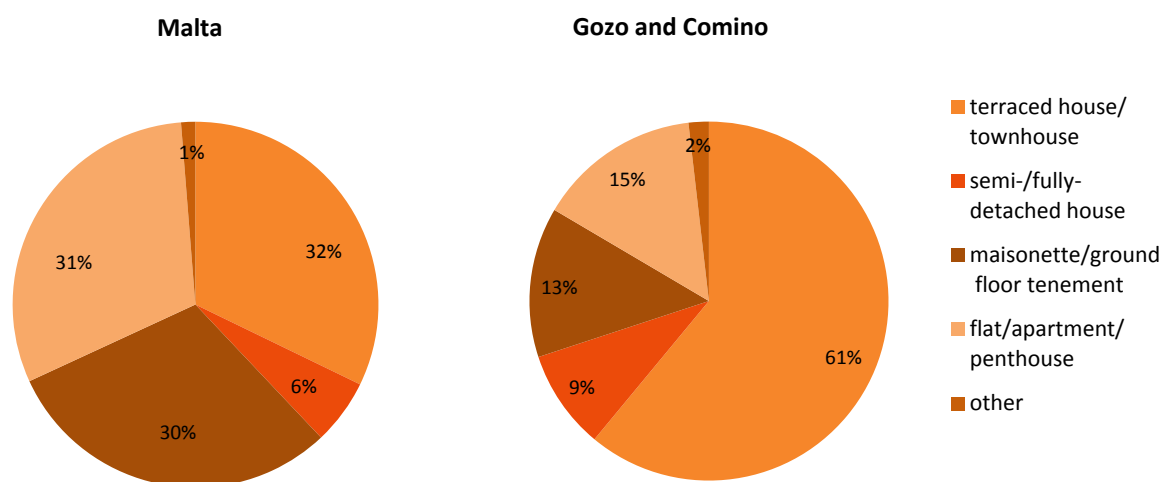

The distribution of occupied dwellings by type varied significantly by region. Indeed, whereas 32.2 per cent of occupied dwellings in Malta were terraced houses or townhouses, this percentage increased to 61.0 per cent in Gozo and Comino, which was the largest share recorded.

In addition, the rate of occupied flats, apartments or penthouses as well as maisonnettes or ground floor tenements in Malta was slightly higher than 30.0 per cent (30.6 per cent and 30.2 per cent respectively), while in Gozo and Comino this was less than 15.0 per cent (14.7 per cent and 13.5 per cent respectively).

As observed for the entire stock of dwellings, in the Northern and Northern Harbour Districts the majority of dwellings were flats, apartments or penthouses (39.4 per cent and 38.5 per cent respectively). In the Southern Harbour District the largest shares of occupied dwellings were maisonnettes or ground floor tenements (35.4 per cent) and terraced houses or townhouses (33.7 per cent). In other districts the majority of dwellings were either terraced houses or townhouses.

A similar trend was also observed at locality level, where St Paul's Bay ranked first with regard to flats, apartments or penthouses (73.2 per cent), followed by Ta' Xbiex (70.2 per cent) and Valletta (63.8 per cent).

Chart 17. Type of occupied dwellings by region

Nearly half the occupied dwellings (74,007 units) had either five or six rooms (excluding any bathrooms, washrooms, garages or other rooms used for business purposes). The number of rooms was directly linked to the type of dwelling as well as the period of construction.

The majority of occupied terraced houses or townhouses had six rooms (26.0 per cent), while 39.7 per cent had seven or more. Flats, apartments, penthouses, maisonettes or ground floor tenements normally had five rooms (32.8 per cent), although 37.2 per cent had four or less. In contrast, nearly half the fully-detached dwellings (66.5 per cent) had at least seven rooms.

The average number of members residing in flats, apartments, penthouses, maisonettes or ground floor tenements was normally lower than that observed in other types of dwellings, particularly terraced houses, townhouses and semi- or fully-detached houses. This was also influenced by other socio-demographic factors, such as the composition of the household itself as well as the age of the reference person. In particular, younger reference persons were more likely to reside in flats, apartments, penthouses, maisonettes or ground floor tenements compared to older reference persons, who were more likely to reside in terraced houses or townhouses.

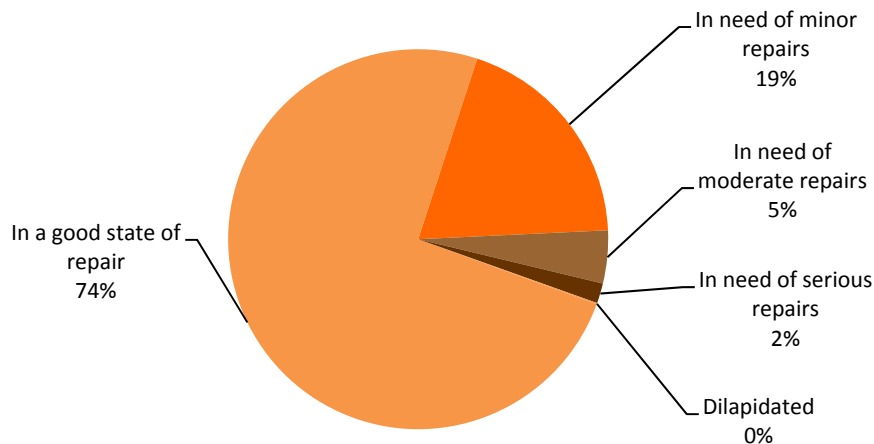

Although the average number of members in each private household stood at 2.7, the majority of dwellings were composed of either two members (27.9 per cent) or just one (22.6 per cent) while 32,697 units, or 21.4 per cent, had three members.

State of Repair and Period of Construction

Nearly three-fourths (74.5 per cent) of occupied dwellings were perceived to be in a good state of repair, while 1.7 per cent were in need of serious repairs.

As observed for the total stock, dwellings found in the Northern District were in the best state as opposed to those in the Southern Harbour District. Mdina, Valletta and Floriana had the highest proportions of dwellings in need of serious repairs while Valletta, Cospicua and Mdina had the lowest proportions of dwellings in a good state of repair. This contrasted with Hal Kirkop, where the largest proportion of dwellings in a good state of repair was observed (82.2 per cent).

Chart 18. State of repair of occupied dwellings

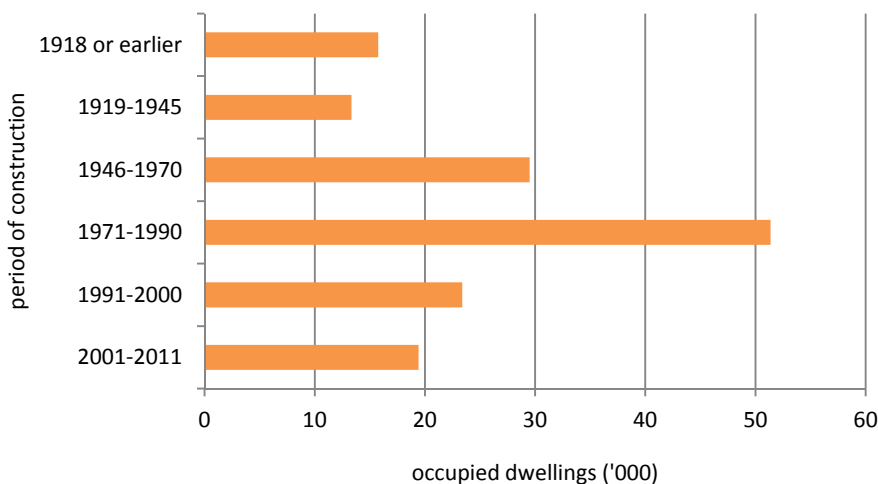

No particular difference emerged when analysing data by dwelling type, except for semi- or fully-detached dwellings. In fact, just half of semi- and fully-detached dwellings were considered to be in a good state of repair, compared to an overall average of nearly three-fourths. In addition, 11.8 per cent of semi- and fully-detached dwellings required moderate repairs while another 7.7 per cent required serious repairs.

The overall state of repair of dwellings was highly correlated to the year of construction, which was in turn affected by the geographical location of dwellings. In particular, on a national level, 72.6 per cent of occupied terraced houses or townhouses were perceived to be the good state of repair. In the Northern Harbour District, this percentage was the lowest (68.4 per cent), while in the Northern District it was the highest (76.6 per cent).

The proportion of occupied flats, apartments or penthouses in a good state of repair was reported at 79.0 per cent, with the highest proportion being recorded in the Western District (85.0 per cent). This contrasted with the rate observed for semi- or fully-detached farmhouses, where 49.1 per cent were in a good state of repair, followed by another 31.0 per cent which needed minor repairs.

The Census showed that 19.0 per cent of occupied dwellings were constructed prior to 1946, of which 10.3 per cent were built before 1919. Conversely, more than a fourth (28.0 per cent) were built after 1991.

Chart 19. Occupied dwellings by period of construction

Dwellings in the Northern District were relatively new compared to those located in other districts. In fact, 18.6 per cent of dwellings in the Northern District were built after 2000, while another 20.5 per cent were built between 1991 and 2000. Conversely, dwellings in the Southern Harbour and Northern Harbour Districts were the oldest, with more than 20.0 per cent built prior to 1946.

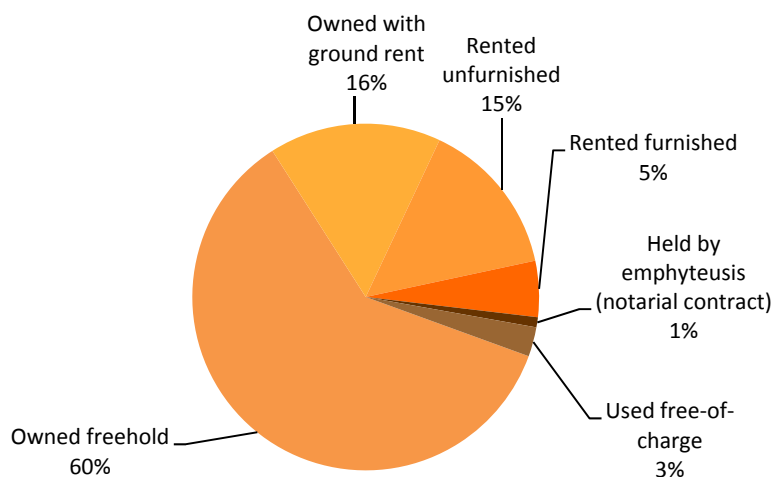

In particular, of the total number of occupied dwellings constructed between 2001 and 2011, the largest proportion was found in St Paul's Bay, with 1,604. Tas-Sliema and Mosta followed with 1,141 and 984 units respectively. On the other hand, Tas-Sliema, Ħamrun and Birkirkara ranked the highest with regard to the number of occupied dwellings constructed before 1946, with 2,435, 1,582 and 1,515 units respectively.

In addition, nearly two-thirds of occupied dwellings (62.1 per cent) constructed after 2001 were flats, apartments or penthouses. On the other hand, 40.4 per cent of the total occupied dwellings constructed between 1971 and 1990 were terraced houses or townhouses, while more than a third (33.5 per cent) of those constructed between 1946 and 1970 were maisonettes or ground floor tenements.

Tenure Status

On a national level, more than three-fourths of all occupied dwellings were either owned freehold (60.4 per cent) or with ground rent (16.0 per cent). The largest percentage of owned (freehold) dwellings was observed in Gozo and Comino, with 85.4 per cent, while the smallest percentages were observed in the Southern Harbour (50.1 per cent) and Northern Harbour Districts (51.8 per cent).

Chart 20. Tenure status of occupied dwellings

In particular, almost a third of the dwellings located in the Southern Harbour District (32.2 per cent) were rented (either furnished or unfurnished), compared to 23.4 per cent in the Northern Harbour District and 6.8 per cent in Gozo and Comino. The proportion of dwellings which were used free-of-charge was higher in Gozo and Comino (4.4 per cent) compared to Malta (2.6 per cent).

Nearly three out of every four terraced houses or townhouses were owned freehold (38,007 or 72.4 per cent). Although the vast majority of semi- or fully-detached houses were also owned by their members, the proportion owned with ground rent was nearly twice that observed for terraced houses and townhouses. In addition, more than a third of flats, apartments or penthouses were rented (15,212 or 33.9 per cent).

In total, household members in 56,296 dwellings paid some form of rent or emptyness to a landlord. Of these 71.2 per cent were private landlords, while the rest paid either the government (26.2 per cent) or the Church (2.6 per cent).

The median annual rent paid by those residing in a rented furnished dwelling stood at €3,537, compared to €186 for unfurnished dwellings. Another 25.0 per cent of members paid a rent exceeding €4,800 for their furnished dwelling. In Gozo and Comino, the median rent paid for unfurnished dwellings (€200) was higher than that paid in Malta (€186), while the opposite emerged for furnished dwellings, where the rent paid in Malta (€3,600) was significantly higher than that paid in Gozo and Comino (€2,520).

Rent paid varied significantly by locality, with the largest rents for unfurnished dwellings in Malta being observed in Swieqi, St Paul’s Bay and Marsaskala while the highest rates for furnished property were recorded in Swieqi, Hal Lija and St Julian’s. In Gozo and Comino, the highest rates for furnished and unfurnished dwellings were recorded in Ta’ Kerċem and Qala respectively.

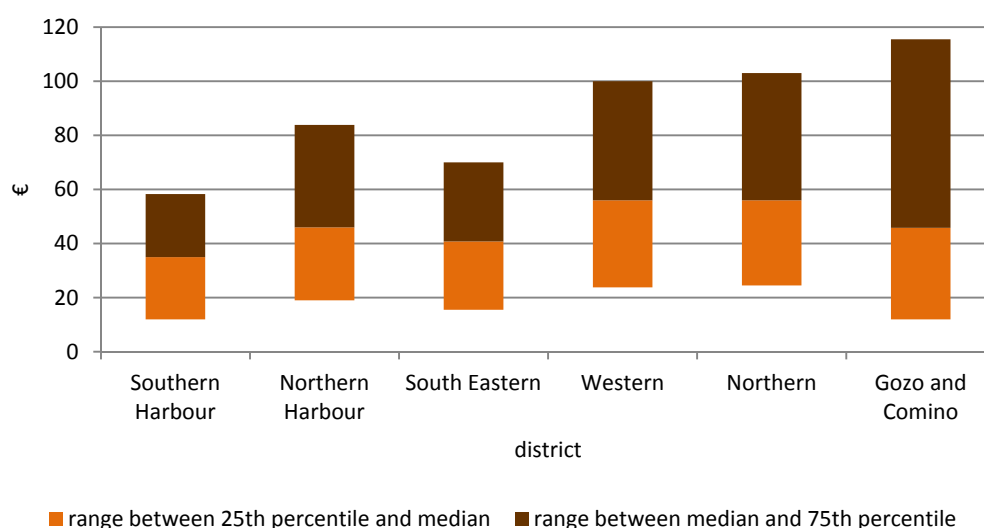

Chart 22. Distribution of rent (unfurnished) by district

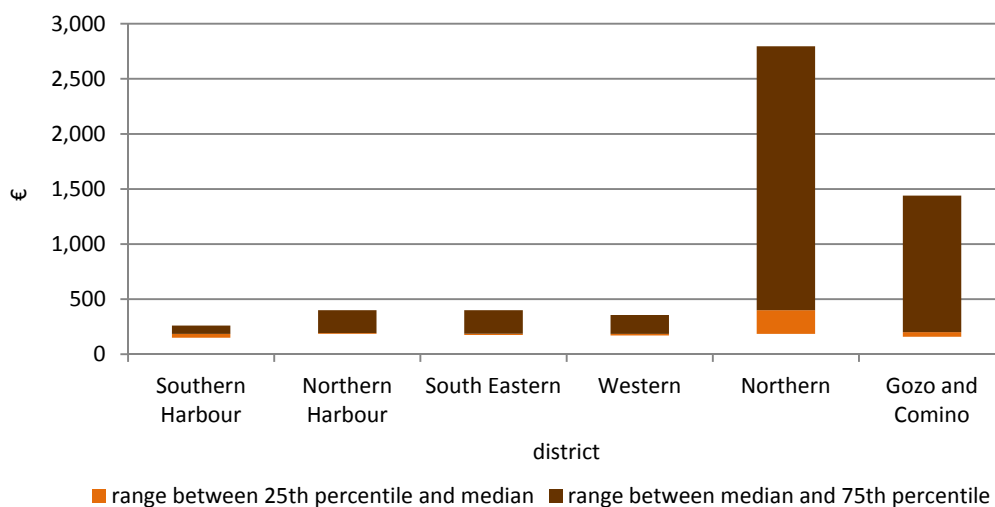

Chart 23. Distribution of rent (furnished) by district

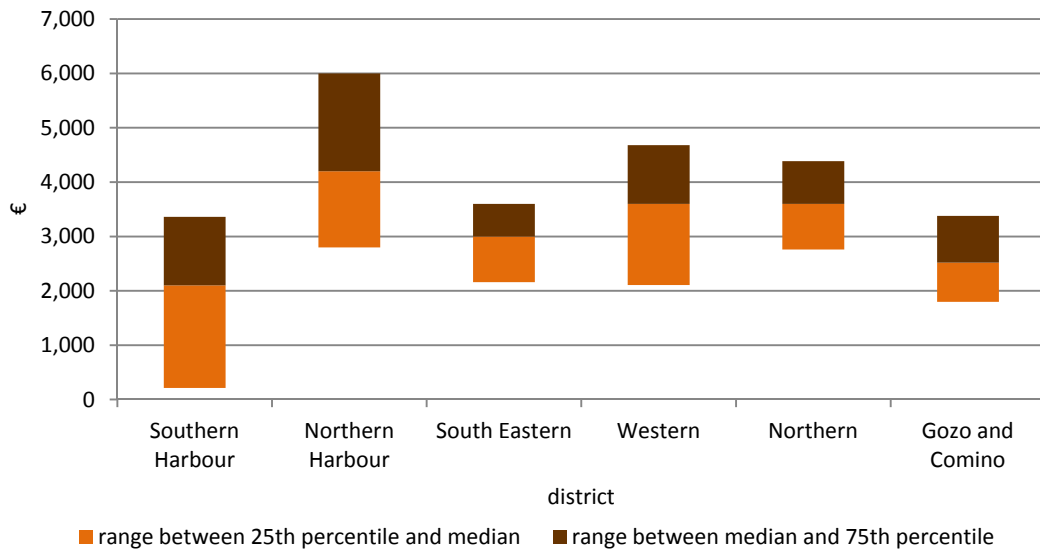

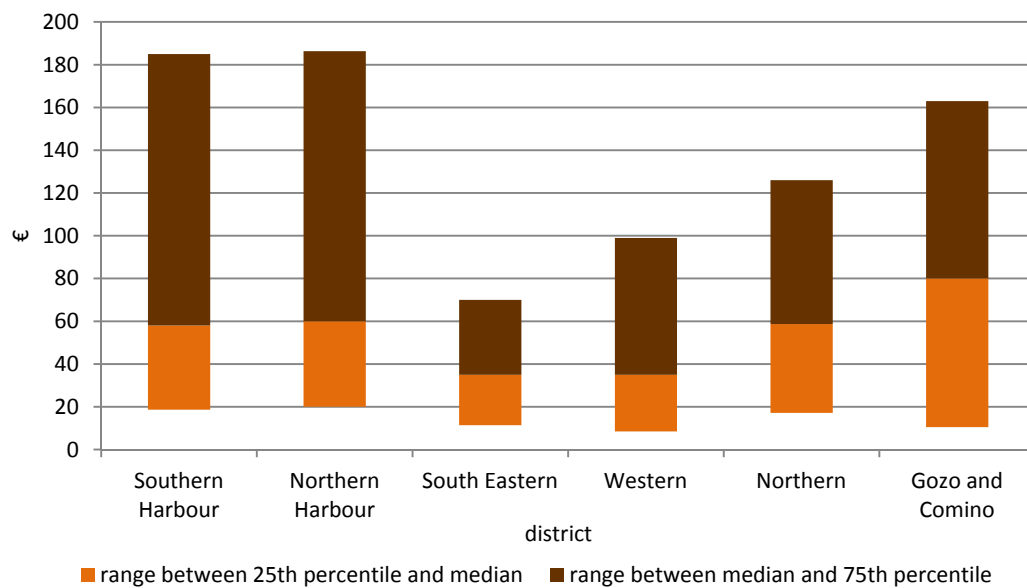

Chart 24. Distribution of emphyteusis by district

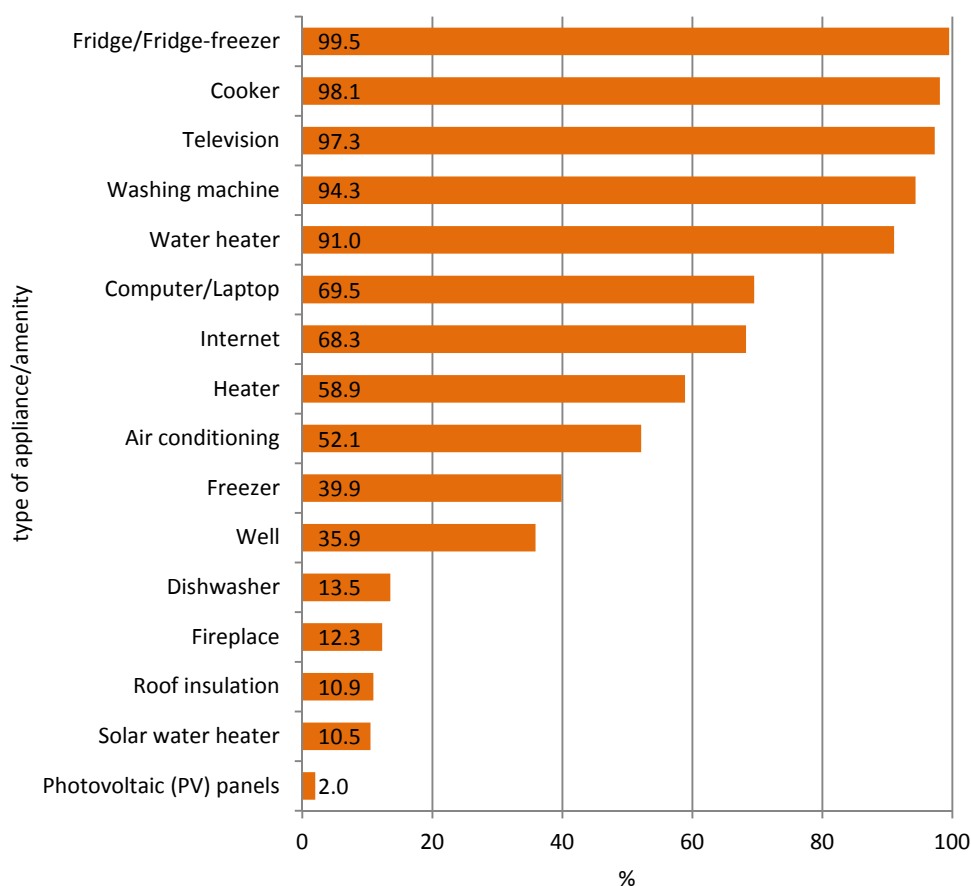

Availability of Amenities and Household Appliances

On a national level, nearly all occupied dwellings had the most basic amenities, including a kitchen or kitchenette, bath or shower, toilet facilities and a water supply system. However, 536 dwellings had no kitchen or kitchenette, while 564 dwellings had no bath or shower available. In both cases, the highest proportions were observed in the Southern Harbour District. Another 103 dwellings did not have any toilet facilities, the majority being in Gozo and Comino. With regards to the availability of a water supply system, 38 dwellings did not have any connection to a public or private source.

The proportions observed for the availability of household appliances varied depending on the type of appliance. The most popular appliance was the fridge or fridge-freezer (99.5 per cent), followed by cookers (98.1 per cent) and television sets (97.3 per cent).

On a regional basis, while 52.8 per cent of occupied dwellings in Malta had air conditioning, this was slightly less in Gozo and Comino (43.5 per cent). Rates for energy and ICT related appliances observed in Gozo and Comino were always less than those in Malta, with the exception of solar water heaters (24.6 per cent compared to 9.3 per cent) and photovoltaic (PV) panels (2.9 per cent compared to 1.9 per cent).

Chart 25. Availability of appliances/amenities

Significant differences also emerged between other districts. In the Northern District, 74.2 per cent of occupied dwellings had internet access, while in Gozo and Comino this proportion stood at 60.6 per cent. Furthermore, 18.4 per cent of occupied dwellings in the Northern District had a dishwasher while only 5.7 per cent were recorded in the Southern Harbour District.

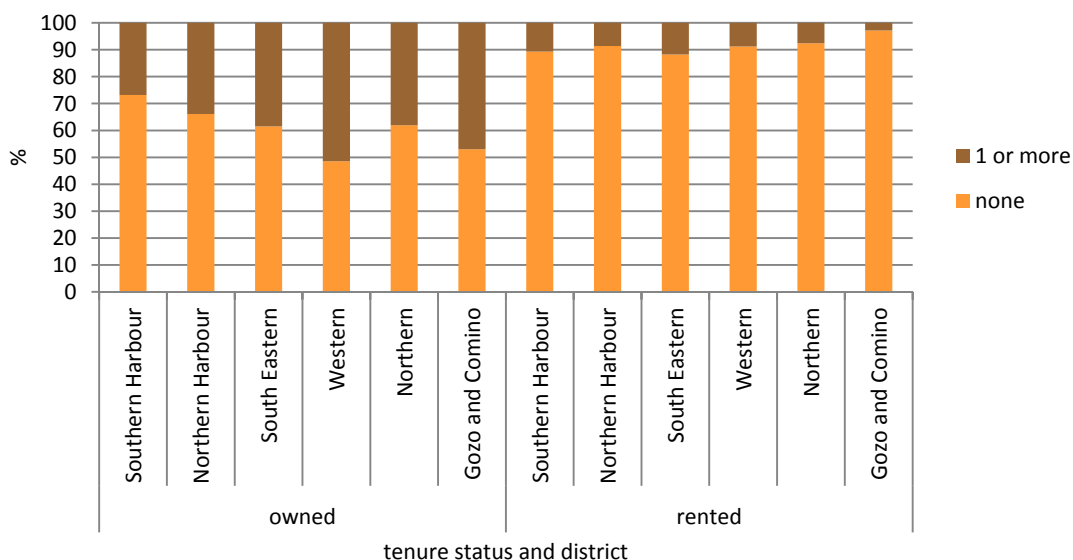

The availability of amenities and household appliances was related to a number of factors, including the number of members residing in the dwelling, the age of the reference person as well as the type of dwelling. Indeed, 92.2 per cent of one-member dwellings had a television, compared to 97.3 per cent at national level. Similarly, while 83.6 per cent of one-member dwellings had a washing machine, on a national scale this percentage averaged 94.3 per cent.

Garages

Members residing in 56,713 dwellings (37.1 per cent) owned at least one garage, while another 13,593 (8.9 per cent) rented at least one garage. On a district level, the Western District had the highest rate of garage ownership, with 51.5 per cent, as opposed to the Southern Harbour District,

where the lowest rate was observed (26.8 per cent). Highest rates for rental of garages were observed in the South Eastern and Southern Harbour District, where the percentages stood at 11.8 and 10.7 respectively.

Chart 26. Ownership/rental of garage/s by district

Of those who rented at least one garage, 68.7 per cent lived in maisonettes, ground floor tenements, flats, apartments or penthouses.

Holiday dwellings

A total of 12,450 holiday dwellings were enumerated in the Census. More than half were located in the Northern District (52.3 per cent) and Gozo and Comino (25.6 per cent). Another 283 holiday dwellings, or 2.3 per cent, were located overseas.

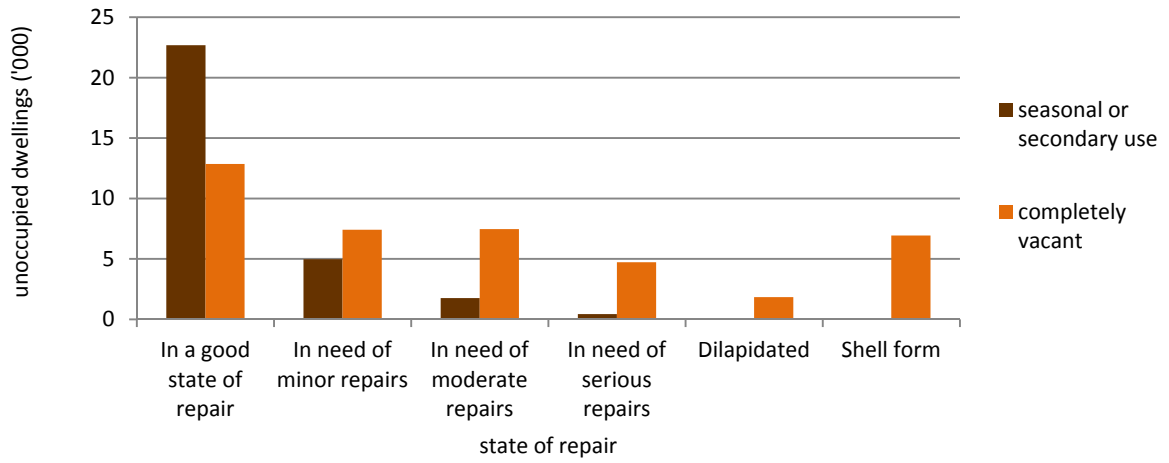

The largest proportion of holiday dwellings consisted of flats, apartments or penthouses, with 8,052 units, or 64.7 per cent. This was followed by 1,625 maisonettes or ground floor tenements and 1,143 garages or boathouses. Moreover, 92.5 per cent of holiday dwellings were either owned freehold or with ground rent, while 3.7 per cent were rented.

Unoccupied dwellings

The total number of unoccupied dwellings reached 71,080. Of these, 29,848 were used for seasonal or secondary use while the remaining 41,232 were completely vacant.

More than half of unoccupied dwellings (53.0 per cent) consisted of flats, apartments or penthouses, while terraced houses, townhouses, maisonettes or ground floor tenements followed with 26.2 per cent and 15.5 per cent respectively. In addition, half the unoccupied dwellings were in a good state of repair while 6,989 either needed serious repairs or were in a dilapidated form. Another 6,937 dwellings were in shell form.

Chart 27. Unoccupied dwellings by occupancy status and state of repair

CONCEPTS AND DEFINITIONS

The following is a list of concepts and definitions covered in the Census, which are in-line with Eurostat regulations and UNECE recommendations.

▪ <i>Census night</i>	20 November 2011
▪ <i>Child</i>	A blood, step- or adopted son or daughter (regardless of age or marital status) who has usual residence in the household of at least one of the parents. Foster children are not considered as 'children'.
▪ <i>Citizenship</i>	The particular legal bond between an individual and his/her state, acquired by birth, registration or naturalisation. Citizenship is not solely determined by nationality, which is in turn defined in terms of the country of birth of an individual.
▪ <i>Consensual union</i>	Two persons who: <ul style="list-style-type: none"> i) belong to the same household; and ii) have a marriage-like relationship with each other; and iii) are not (legally) married to each other.
▪ <i>Couple</i>	Married couples and couples who live in a consensual union.
▪ <i>Current activity status</i>	The current relationship of a person to an economic activity during the reference week. All persons who fulfil the requirements for inclusion among the employed or the unemployed are currently economically active.
▪ <i>Dependency ratio</i>	The ratio of non-active persons (aged 14 or less and others aged 65 or more) to active (persons aged 15 to 64) in a given population.
▪ <i>Dependent child</i>	This is defined in two ways: <ul style="list-style-type: none"> i) All persons below 16, and ii) Persons aged 16 to 24, living in a household of which at least one of their parents is a member and who are economically inactive.
▪ <i>Disability</i>	A restriction or lack of ability to perform an activity in the manner or within the range considered normal for a human being. Disability is the umbrella term for impairment, activity limitation and participation restriction. Persons with disabilities are defined as persons who are at greater risk than the general population for experiencing restrictions in performing specific tasks or participating in role activities.

<ul style="list-style-type: none"> ▪ <i>District</i> 	<p>For aggregation purposes, all Maltese localities were grouped according to the Local Administrative Unit (LAU) classification into six districts as follows:</p> <ul style="list-style-type: none"> i) Southern Harbour: Cospicua, Fgura, Floriana, Ғal Luqa, Ғal Tarxien, Ғaž-Ғabbar, Kalkara, Marsa, Paola, Santa Luċija, Senglea, Valletta, Vittoriosa, Xgħajra ii) Northern Harbour: Birkirkara, Gżira, Ғal Qormi, Ғamrun, Msida, Pembroke, San Ґwann, Santa Venera, St Julian's, Swieqi, Ta' Xbiex, Tal-Pietà, Tas-Sliema iii) South Eastern: Birżebbuġa, Gudja, Ғal Ґhaxaq, Ғal Kirkop, Ғal Safi, Marsaskala, Marsaxlokk, Mqabba, Qrendi, Ғejtun, Ғurrieq iv) Western: Ғ'Attard, Ғad-Dingli, Ғal Balzan, Ғal Lija, Ғaž-Ғebbuġ, Iklin, Mdina, Mtarfa, Rabat, Siġġiewi v) Northern: Ғal Ґhargħur, Mellieħa, Mġarr, Mosta, Naxxar, St Paul's Bay vi) Gozo and Comino: Fontana, Ґħajnsielem, Ґħarb, Ґħasri, Munxar, Nadur, Qala, San Lawrenz, Ta' Kerċem, Ta' Sannat, Victoria, Xagħra, Xewkija, Ғebbuġ
<ul style="list-style-type: none"> ▪ <i>Dwelling</i> 	<p>A building that is used entirely or primarily as a residence, including any associated structures, such as garages, and all permanent fixtures customarily installed in residences. A household resides in a dwelling, whenever the latter is occupied. Otherwise a dwelling is said to be unoccupied or vacant.</p>
<ul style="list-style-type: none"> ▪ <i>Economic activity</i> 	<p>Any activity which defines the main line of work of a workplace. The kind of production or activity of the establishment or similar unit in which the job of a currently economically active person is located.</p> <p>For persons who are recruited and employed by one enterprise but who actually have their place of work in another enterprise, the industry of the establishment or similar unit where the place of work actually is, is reported. Economic activity is coded according to the Statistical classification of economic activities in the European Community (NACE) as follows:</p> <p>Activity</p> <ul style="list-style-type: none"> – Agriculture, forestry And fishing; – Mining and quarrying; – Manufacturing; – Electricity, gas, steam and air conditioning supply; – Water supply; sewerage, waste management and remediation activities; – Construction; – Wholesale and retail trade; repair of motor vehicles and motorcycles; – Transportation and storage; – Accommodation and food service activities;

	<ul style="list-style-type: none"> – Information and communication – Financial and insurance activities; – Real estate activities; – Professional, scientific and technical activities; – Administrative and support service activities; – Public administration and defence; compulsory social security; – Education; – Human health and social work activities; – Arts, entertainment and recreation; – Other service activities; – Activities of households as employers; – Activities of extraterritorial organisations and bodies.
<ul style="list-style-type: none"> ▪ <i>Educational attainment</i> 	<p>The highest level successfully completed in the educational system of the country where the education was received. The level of education successfully completed was coded according to the International Standard Classification of Education (ISCED), including the following categories:</p> <ul style="list-style-type: none"> – No schooling – Primary – Lower Secondary – Upper Secondary – Post-Secondary Non-Tertiary – Tertiary
<ul style="list-style-type: none"> ▪ <i>Employed (according to the International Labour Organisation - ILO definition)</i> 	<p>A person who during the reference week:</p> <ul style="list-style-type: none"> i) performed at least one hour of work for pay or profit, in cash or in kind; or ii) was temporarily absent from a job in which he/she had already worked and to which he/she maintained a formal attachment, or from a self-employment activity.
<ul style="list-style-type: none"> ▪ <i>Employer</i> 	<p>A person who is self-employed or owns enterprises which exists with or without his/her physical presence and who, in this capacity, has engaged one or more persons, on a continuous basis, to work for him/her as 'employees'.</p>
<ul style="list-style-type: none"> ▪ <i>European Member State/s</i> 	<p>A member state of the European Union is a state that is party to treaties of the European Union (EU) and thereby subject to the privileges and obligations of EU membership as at 20 November 2011.</p>
<ul style="list-style-type: none"> ▪ <i>Family nucleus</i> 	<p>Two or more persons who live in the same household and who are related as husband and wife, as cohabiting partners, as a marital (registered) same-sex couple, or as parent and child. Thus a family comprises a couple without children, a couple with one or more children, or a lone parent with one or more children.</p>

<ul style="list-style-type: none"> ▪ <i>Holiday dwelling</i> 	<p>In the census, a holiday dwelling is defined as a temporary accommodation identified by respondents that is provided for at least one month annually for recreational purposes. Therefore, the same holiday dwellings could have been used by different respondents and thus resulting in double-counting</p>
<ul style="list-style-type: none"> ▪ <i>Household</i> 	<p>Shared residence and common arrangements, as:</p> <ul style="list-style-type: none"> i) one person living alone; or ii) a group of persons (not necessarily related) living at the same address with common house-keeping - i.e. sharing a meal on most days or sharing a living or sitting room.
<ul style="list-style-type: none"> ▪ <i>Household reference person</i> 	<p>The person in the household who is acknowledged as head of household by the other members. Normally, the household reference person is:</p> <ul style="list-style-type: none"> i) the husband/wife in the case of a married couple; or ii) either partner of a cohabiting couple; or iii) the parent in the case of a single-parent household; or iv) any mature person within the household, if none of the above conditions apply.
<ul style="list-style-type: none"> ▪ <i>Immigrants</i> 	<p>This is characterised either by non-nationals arriving from abroad or nationals returning from abroad with the intention of residing in the country for a certain period.</p>
<ul style="list-style-type: none"> ▪ <i>Impairment</i> 	<p>Any loss or abnormality of psychological or anatomical structure of a function. Replies are based on self-assessment; a person with a particular condition might perceive him/herself as being disabled while another person with the same condition might not perceive him/herself as being disabled.</p> <p>However, in general, persons who are able to hear clearly by means of a hearing aid are not considered to have a hearing impairment while persons who are able to see clearly by wearing spectacles or lenses are not considered to have visual impairment.</p>
<ul style="list-style-type: none"> ▪ <i>Institution</i> 	<p>A legal body for the purpose of long-term inhabitation and provision of services to a group of persons. This includes student residences, hospitals, convalescent homes, welfare institutions, monasteries, convents, military and police barracks, prisons, refugee homes and reformatories.</p> <p>An institution is normally a separate and independent set of premises comprising all or part of a permanent building or set of buildings which by the way it has been built, rebuilt or converted, is designed for habitation by a large group of persons.</p>

<ul style="list-style-type: none"> ▪ <i>Institutional household</i> 	<p>Persons whose need for shelter and subsistence are being provided by an institution. Members of an institutional household have their place of usual residence at the institution.</p> <p>People who are normally members of private households but who are living in institutions are considered as members of institutional households if their actual or expected absence from their private household exceeds 12 months.</p>
<ul style="list-style-type: none"> ▪ <i>Internal migrants</i> 	<p>Those who are usually resident in a civil division at the time of the Census and who have previously been resident in another civil division within the country, where the civil division is identified at the smallest civil level.</p>
<ul style="list-style-type: none"> ▪ <i>Literacy</i> 	<p>The ability both to read and to write a simple sentence.</p>
<ul style="list-style-type: none"> ▪ <i>Live birth</i> 	<p>Births of children that showed any sign of life. These comprise the number of births excluding stillbirths (total births include live births and stillbirths).</p>
<ul style="list-style-type: none"> ▪ <i>Long-term illness and/or health condition</i> 	<p>The main characteristics of a chronic condition are that it is permanent and may be expected to require a long period of supervision, observation or care.</p> <p>Data on chronic (longstanding) illnesses or conditions refer to the self-declaration by the respondents of whether they have or have not a chronic (longstanding) illness or condition.</p>
<ul style="list-style-type: none"> ▪ <i>Main job</i> 	<p>The job at which the person usually worked most of the time among all the jobs held during the reference week.</p>
<ul style="list-style-type: none"> ▪ <i>Marital status</i> 	<p>The legally defined marital state. There are several types of marital states: single, married, widowed, divorced, and separated. A person shall be classified according to his/her most recently acquired legal marital status at the reference date.</p>
<ul style="list-style-type: none"> ▪ <i>Member of a producers' cooperative</i> 	<p>A person who holds a self-employment job in an establishment organised as a cooperative, in which each member takes part on an equal footing with other members in determining the organisation of production, sales and/or other work, the investments and the distribution of the proceeds among the members.</p>
<ul style="list-style-type: none"> ▪ <i>Occupancy status</i> 	<p>Information on whether dwellings are occupied by usual residents, used as a second home or for seasonal/holiday purposes and not on the housing market, or vacant.</p>
<ul style="list-style-type: none"> ▪ <i>Occupants</i> 	<p>Persons with a usual residence.</p>

▪ *Occupation*

The type of work done in a job. Type of work is described by the main tasks and duties of the work and is coded according to the International Standard Classification of Occupations (ISCO) as follows:

<u>Section</u>	<u>Division</u>
Armed forces occupations	<ul style="list-style-type: none"> – Commissioned armed forces officers – Non-commissioned armed forces officers – Armed forces occupations, other ranks
Managers	<ul style="list-style-type: none"> – Chief executives, senior officials and legislators – Administrative and commercial managers – Production and specialised services managers – Hospitality, retail and other services managers
Professionals	<ul style="list-style-type: none"> – Science and engineering professionals – Health professionals – Teaching professionals – Business and administration professionals – Information and communications technology professionals – Legal, social and cultural professionals
Technicians and associate professionals	<ul style="list-style-type: none"> – Science and engineering associate professionals – Health associate professionals – Business and administration associate professionals – Legal, social, cultural and related associate professionals – Information and communications technicians
Clerical support workers	<ul style="list-style-type: none"> – General and keyboard clerks – Customer services clerks – Numerical and material recording clerks – Other clerical support workers
Service and sales workers	<ul style="list-style-type: none"> – Personal service workers – Sales workers – Personal care workers – Protective services workers

	<p>Skilled agricultural, forestry and fishery workers</p> <ul style="list-style-type: none"> – Market-oriented skilled agricultural workers – Market-oriented skilled forestry, fishery and hunting workers – Subsistence farmers, fishers, hunters and gatherers <p>Craft and related trades workers</p> <ul style="list-style-type: none"> – Building and related trades workers, excluding electricians – Metal, machinery and related trades workers – Handicraft and printing workers – Electrical and electronic trades workers – Food processing, wood working, garment and other craft and related trades workers <p>Plant and machine operators, and assemblers</p> <ul style="list-style-type: none"> – Stationary plant and machine operators – Assemblers – Drivers and mobile plant operators <p>Elementary occupations</p> <ul style="list-style-type: none"> – Cleaners and helpers – Agricultural, forestry and fishery labourers – Labourers in mining, construction, manufacturing and transport – Food preparation assistants – Street and related sales and service workers – Refuse workers and other elementary workers
<ul style="list-style-type: none"> ▪ <i>Old age-dependency ratio</i> 	The proportion of persons aged 65 and over divided by the working-age population of persons aged 15 to 64.
<ul style="list-style-type: none"> ▪ <i>Own-account workers</i> 	Self-employed persons, who do not engage any employees.
<ul style="list-style-type: none"> ▪ <i>Owner occupied dwelling</i> 	Dwellings where at least one occupant of the dwelling owns parts or the whole of the dwelling.
<ul style="list-style-type: none"> ▪ <i>Place of birth</i> 	The place of usual residence of the mother at the time of the birth, or if not available, the place in which the birth took place.
<ul style="list-style-type: none"> ▪ <i>Place of usual residence</i> 	The place where a person normally spends the daily period of rest, regardless of temporary absences for purposes of recreation, holidays, visits to friends and relatives, business, medical treatment or religious pilgrimage.

<ul style="list-style-type: none"> ▪ <i>Place of work</i> 	<p>The place in which a currently employed person does his/her job. The place of work of those mostly working at home is the same as their usual residence. The term 'working' refers to work done as an employed person.</p>
<ul style="list-style-type: none"> ▪ <i>Population density</i> 	<p>The ratio of the Census population of a region to the (land) area of the region. Total area is defined by the Malta Environment and Planning Authority (MEPA) in terms of local council boundaries.</p>
<ul style="list-style-type: none"> ▪ <i>Private household</i> 	<p>This is defined either as:</p> <ul style="list-style-type: none"> i) A one-person household, that is a person who lives alone in a separate housing unit or who occupies, as a lodger, a separate room (or rooms) of a housing unit but does not join with any of the other occupants of the housing unit to form part of a multi-person household as defined below; or ii) A multi-person household, that is, a group of two or more persons who combine to occupy the whole or part of a housing unit and to provide themselves with food and possibly other essentials for living. Members of the group may pool their incomes to a greater or lesser extent.
<ul style="list-style-type: none"> ▪ <i>Reference week</i> 	<p>The week between 14 November and 20 November 2011.</p>
<ul style="list-style-type: none"> ▪ <i>Residence abroad</i> 	<p>Any places of usual residence outside Malta where persons normally spent nights for a continuous period of at least 12 months.</p>
<ul style="list-style-type: none"> ▪ <i>Resident of Malta</i> 	<p>A person who:</p> <ul style="list-style-type: none"> i) has lived in Malta for a continuous period of at least 12 months before the Census night; or ii) has arrived in Malta during the 12 months before the Census night with the intention of staying in Malta for at least 12 months; or iii) moved to a country other than Malta for a period of less than 12 months who has the intention to return to Malta; or iv) was born in Malta during the 12 months before the Census night, and is expected to live in Malta for at least 12 months; or v) was born abroad during the 12 months before the Census night, has arrived in Malta and is expected to live in Malta for at least 12 months.
<ul style="list-style-type: none"> ▪ <i>Room</i> 	<p>A space in a housing unit enclosed by walls reaching from the floor to the ceiling or roof, of a size large enough to hold a bed for an adult (four square metres at least) and at least two metres high over the major area of the ceiling. When counting the number of rooms in a dwelling, the following are taken into account:</p> <ul style="list-style-type: none"> i) Included: normal bedrooms, dining rooms, living rooms, habitable rooms in cellar/basement, kitchens and study rooms. ii) Not included: kitchenettes, verandas, corridors, washrooms, bathrooms, box rooms, garages, halls and rooms used solely for business purposes.

	In addition, combined/open plan rooms should be counted separately as two or three rooms accordingly.
▪ <i>Self-employed</i>	A person who works in his/her own business, professional practice or farm for the purpose of making profit.
▪ <i>Student</i>	Someone who: <ul style="list-style-type: none"> i) is aged 15 years or over; and ii) is undergoing education or training; and iii) is not economically active; and iv) is not receiving a pension or capital income.
▪ <i>Temporary absence</i>	A person who is absent or expected to be absent from his/her place of usual residence at the time of the Census for less than 12 months. Temporarily absent persons are also included in the total enumerated population.
▪ <i>Unemployed (according to the International Labour Organisation - ILO definition)</i>	A person who during the reference week was: <ul style="list-style-type: none"> i) 'without work', that is, was not in wage employment or self-employment; and ii) 'currently available for work', that is, was available for wage employment or self-employment within two weeks subsequent to the Census; and iii) 'seeking work', that is, had taken specific steps to seek wage employment or self-employment during the four weeks prior to the Census.
▪ <i>Unpaid family worker</i>	Someone who: <ul style="list-style-type: none"> i) holds a self-employment job in a market-oriented establishment operated by a related person, living in the same household; and ii) cannot be regarded as a partner because the degree of commitment to the operation of the establishment, in terms of working time or other factors, is not at a level comparable to that of the head of the establishment.

Source: various censuses

Notes:

- a. Gżira shown as a separate locality since 1948.
- b. New locality of Msieraħ (San Ġwann) constituted from parts of Birkirkara and St Julian's and is shown as separate locality in 1967.
- c. New locality of Fgura constituted from parts of Paola, Hal Tarxien and Haż-Żabbar in 1967.
- d. Marsaskala shown as a separate locality since 1957.
- e. New locality of Munxar constituted from parts of Ta' Sannat and Fontana till 1957.
- f. New locality of Fontana shown as separate locality till 1967.
- g. Gwardamangia formed part of Hamrun in 1967.
- h. Tal-Pietà formed part of Msida in 1967.
- i. Santa Luċija formed part of Hal Tarxien and Paola till 1967.
- j. Ta' Xbiex formed part of Msida and Gżira till 1967.
- k. Pembroke formed part of St Julian's till 1985.
- l. Swieqi formed part of St Julian's till 1985.
- m. Xghajra formed part of Haż-Żabbar till 1985.
- n. Iklin formed part of Hal Lija, Birkirkara, Naxxar and San Ġwann till 1985.
- o. Mtarfa formed part of Rabat till 1995.
- p. The boundaries of some localities were changed between 1995 and 2005.

Source: Eurostat

Notes:

* Includes the French mainland, the island of Corsica and the overseas territories

Except for Malta, figures refer to 1 January 2012.

Figure for the European Union (27 countries) is an estimate.

Dependency ratio - Sum of population aged 0-14 and 65+ as a percentage of the working-age population (15-64).

Old-age dependency ratio - Population aged 65+ as a percentage of the working-age population (15-64).
