

## Wall Comments – 10YP Early Engagement

The following are verbatim comments left on the online comments wall provided as part of 10 year plan early engagement. People could leave comments on the online wall, accessible via the Dunedin City Council website, from 5-31 October 2023. The table also shows the number of ‘up vote’ and ‘down vote’ reactions by users in response to individual comments.

Type	Comment	Up Votes	Down Votes
Social and Community Wellbeing	<p>Cease preventing owners collecting impounded dogs to increase the financial return on the new aggressive policy of *impound (not return)*:                      Extend the release hours and accept payment at the pound.                      The current limitations mean dogs are held overnight and Friday impounds cannot be collected until Monday. That maximises dog's trauma while Council charges \$100 for *board*:                      The DCA does not allow impounding to be used to reduce dog welfare and maximise income by stopping dogs being collected.</p>	90	2
Social and Community Wellbeing	<p>Keep up with other Councils by establishing a dedicated FB page for informal communication of dog-related information: Informal posting of seized dogs to facilitate the fastest return to owners; closure of popular walking areas for site maintenance; information about pest operations; changes to dog management; etc.</p>	70	2
Pools, Parks, Gardens and Sporting Facilities	<p>I'd love to see more spaces for people to exercise with their off lead, under control dogs, including large bush circuits with natural characteristics, including uneven ground, hills, native bush, and resting spots and viewpoints. This would help people improve both their mental and physical health.</p>	64	2
Social and Community Wellbeing	<p>Give dog owners priority use in dog parks given they are funded from dog registration fees. (Currently dog owners are required to leave a dog park if non-dog users behave in a way that is not compatible or safe around dogs.)                      Liaise with and support “adopt a dog park” groups (as discussed in 2016) to recognise dog owners vested interest in these spaces.</p>	58	1
Social and Community Wellbeing	<p>Restore dog access to local green spaces so owners are no longer forced to travel to walk, train and interact with their dogs. There was no reason access was removed in 2016, and the increased emissions cannot be justified. It will also reverse the targeting of almost 15% of the population to reduce their physical and psychological well-beings by forcing them to drive instead of walk, and breaking the community connections and ownership of community spaces dog owners are known to lead.</p>	57	7

Pools, Parks, Gardens and Sporting Facilities	Review all dog parks: Provide for universal access, especially for users of mobility devices; install human shelters and bag dispensers in *all*; conduct routine assessments to maintain them to a safe and usable level, (begin by repairing all the currently broken fences and gates); remove the aged agility equipment and kick-board trip hazards and install safe and properly designed dog-centric multi-purpose equipment that permits a range of suitable and safe training and recreational activities.	52	1
Pools, Parks, Gardens and Sporting Facilities	Establish an an all-weather destination dog hub with good lighting and weather protection that includes: Under cover areas for booking by clubs, groups and individuals to conduct basic and sports training; circuits with stations to perform exercises to maintain the physical and psychological health of dog and owners; areas with natural character for independent activities like exploring and sniff-walks; rooms for lessons and meetings. (Something like Chisolm Links is a good base to model.)	50	1
Social and Community Wellbeing	Review all signage about dogs and re-write it accurately, remove the orders directed at dog owners but no other equally regulated social group (such as litter, vehicle drivers). Where dog messaging is required, re-write in positive, non-threatening neutral language. (Constantly threatening enforcement action against law-abiding owners is oppressive bullying.)	49	4
Economic Wellbeing	Make the buses free for everyone! DCC should work with regional council to subsidize the buses, and make them free for everyone all the time. It would be great for tourism, it would be great for the environment, it would be great for car drivers (fewer cars on the road, easier to get about for those that have to drive, and more parking spaces available as more people take the bus)	48	0
Social and Community Wellbeing	Establish a dog control services activity that provides the services DCC must deliver to law-abiding dog owners but are currently ignored by the focus on enforcement only. (The DCC splits parking into enforcement and services, so there is an existing model, and no excuse not to do so for law-abiding dog owners who pay for services they never receive. )	47	0
Libraries, Arts and Culture	The entrances and surrounds (including fences) of dog parks are usually sterile: Enhance the space, and enjoyment of the space for both passers-by and users by installing suitable artwork.	46	3

Social and Community Wellbeing	<p>Engage the services of properly qualified communicators that to design dog related messaging instead of the misdirected, infantile and usually threatening messaging currently used. (Dogs don't have arms for holding poo bags, registration tags are not “bling”, and telling us staff “love” dogs is irrelevant to performing legally required dog services.)</p> <p>Review all dog documentation and format it in ways that are user-friendly, readable and accessible, and provide copies in te Reo.</p>	44	3
Pools, Parks, Gardens and Sporting Facilities	Gymnastics is a popular sport in the city and provides for all ages and abilities. Please support the Dunedin Gymnastic Academy's proposal for a new facility, which seeks to be of benefit to not just gymnastics within the region, but to other sporting and community uses, including as a welfare centre in times of crisis.	40	1
Pools, Parks, Gardens and Sporting Facilities	I am the President of Table Tennis Otago. We are hoping the DCC will consider more indoor facilities that can provide a permanently set up venue for our awesome sport. Table Tennis is a sport for all ages and abilities. WE have around 350 members. It is great fun and relatively inexpensive to play. Dunedin is the only main centre in NZ to not have a permanent venue. We can definitely grow the sport once we have a venue to build a community from.	40	3
Pools, Parks, Gardens and Sporting Facilities	It is great to see so many people turn out for table tennis at the Edgar centre on a Sunday, but as a venue it is not set up to accommodate the numbers of people involved. Moreover, the facilities are not as well suited to table tennis as they are to other sports - football, basketball, netball - that are hosted there. It would be great if we could get a proper and permanent venue established for this fun, inexpensive, hugely accessible and increasingly popular sport in Dunedin.	40	3
Libraries, Arts and Culture	<p>Fund and support the library so it can purchase books, dvd's and other materials about dog training, dog health &amp; welfare, dog sports and recreational activities so the current holdings can be updated.</p> <p>The current materials are almost all discredited, unscientific, and promote punishment-based training known to be ineffective and cause aggression. Librarians are trained to maintain good quality collections - they deserve to be funded and supported so they can.</p>	39	0
Environment and Sustainability	<p>Get drink bottle refill stations everywhere make them all sign postered the same so people start looking for them</p> <p>Have a set of drink bottle stations and signage that can be used at every event in the city. Make it our culture to bring drink bottles.</p>	38	2

Environment and Sustainability	<p>There is significant support within the wider Dunedin community for the Dunedin Tunnels cycleway and walkway linking the Taieri through to Dunedin City completed ASAP.</p> <p>At the Wingatu Tunnel open day, May 2023 there were 2000+ people there in support of the project being completed. Given the recent opening of the 2 harbour trails &amp; the significant usage it seems clear the tunnels project will receive even more commuter usage given the population demographic thus supporting DCC climate goals.</p>	37	7
Pools, Parks, Gardens and Sporting Facilities	<p>Back Dunedin Gymnastic Academy in their aspirations for a modern gymnasium open to the whole community. The City needs a venue which is open to a broader cross-section of the community where young, old, fit or not can exercise, have fun and compete.</p>	37	2
Social and Community Wellbeing	<p>Build more community housing!</p> <p>Council committed to spending \$20m on building new community housing 3 years ago, what has happened since then? Council should be building more housing to higher standards (Homestar 6 minimum)</p>	36	6
Economic Wellbeing	<p>Sell Sammys! Sell the Fortune Theatre!</p> <p>Why does DCC still own these buildings? You're not doing anything with them, get rid of them! Maybe a private developer would do something.</p>	34	6
Roads, Water and Waste Services	<p>Passenger train Mosgiel to Dunedin!!!!</p> <p>Bike path Mosgiel to Dunedin!!!!</p> <p>Connected bike paths for safe biking around the city.</p> <p>Connect harbour bike path to Mosgiel bike path CAR FREE AND SAFE</p>	34	1
Environment and Sustainability	<p>Please support the Dunedin Wildlife Hospital, they are critical in the continued survival of hoiho/Yellow-eyed penguins. These are an iconic species to Dunedin and bring a lot of tourism. It would be devastating to the region if the Dunedin Wildlife Hospital was no there to save the species from the brink of extinction.</p>	33	0
Environment and Sustainability	<p>We need to be supporting initiatives that protect our taonga species and leave the motu a better place for our mokopuna. We especially need to ensure the continued growth and success of the Dunedin Wildlife Hospital. The work that they do they is amazing and irreplaceable and funding from the DCC is critical to its continued success. As mentioned by others, we are the Wildlife capital of Aotearoa and caring for our native wildlife and keeping it from extinction is vitally important!</p>	32	3

Pools, Parks, Gardens and Sporting Facilities	The ODT's story on the Indoor Skatepark for Dunedin group attracted over 750 likes and comments such as: "It would be good for families. The current indoor activities are just so expensive" "there just needs to be something for older children in the city" "YES YES YES I would love to see this happen" Other groups supporting roller skating, BMX, mountain biking, RC cars and also parent groups support an indoor skatepark which will ensure the facility serves a broad cross section of Dunedin. Yeew!	32	0
Social and Community Wellbeing	Dunedin is probably the best surf city in the world. And that asset is mostly free. Let's enhance the assets by building quality carparks with recycling bins, toilets and hot showers at the five most popular spots: St Clair, St Kilda, Blackhead, Aramoana and Karitane.	31	1
Environment and Sustainability	Please consider continuing to fund the Dunedin Wildlife Hospital. This hospital is dedicated to the treatment and protection of our vulnerable wildlife species. In the last year alone they saved the lives of a significant proportion of our Yellow Eyed Penguins as well as many other critically endangered species. This service is vital to local tourism which brings a significant amount of money to the local economy. Funding this hospital is an investment in Dunedin.	30	0
Roads, Water and Waste Services	Please do not save on the water treatment infrastructure. Already seen consequences in Queenstown, cryptosporidium outbreak, parasites in water hospitalising people. UV disinfection, protozoa barriers, whatever it may be, do not penny-pinch. Many councils like in Tasman are already tempted to. This is the last thing we'd like to save money on. Saving pennies, paying lives. Just like the hospital cuts which DCC strongly opposed. Work with the central government for scale and standardisation.	28	0
Social and Community Wellbeing	Focus on making parks and spaces safe, enabling, vibrant social spaces that children and young people want to go - basketball,, skateboarding etc. Need to get young people out of their houses, off computer games, socialising and being part of the community. Even provide a "e sports" staffed facility for youth to go to e.g. in South Dunedin main street -- have to join and sign rules of responsibility though. Likewise make the spaces vibrant and social green spaces for adults and their dogs.	28	0
Pools, Parks, Gardens and Sporting Facilities	Join and support Dunedin Gymnastics Academy!! It's so much fun	28	1
Libraries, Arts and Culture	We need to turn the waterfront into a similar version of the viaduct in Auckland. We need people here and exposed to our beautiful harbour landscape. Auckland viaduct started off as industrial docks now it is the hub. Build a hotel, mall, parking building and restaurants, cinemas. When Christchurch builds a stadium we will be in trouble.	27	2

Environment and Sustainability	<p>Please do not support further expansion of the cruise sector. It's totally unsustainable and had the highest CO2 emissions by far of any form of transport. In fact, the Dunedin City Council, in declaring a climate emergency a few years ago and more recently committing to follow the targets of Net Carbon Zero 2030, should actually be actively discouraging cruise ship visits.</p> <p>This ties in with the Taieri Gorge railway too. The TGR shouldn't be maintained if it's dependent on cruise passengers.</p>	27	8
Environment and Sustainability	Please support the Wildlife Hospital. After all=, we are the wildlife capital of NZ.	26	3
Environment and Sustainability	How do we get cruise ships out of our city. Nice people but they don't spend much and the emissions are huge	26	8
Economic Wellbeing	<p>Apply some bold thinking and re-visit a harbour activation plan but one which keeps more in character with our city's heritage look and feel.</p> <p>See Hobart city harbour for inspiration and think about how council might provide seed funding to stimulate commercial investment into the area to re-orient the city towards our most significant natural asset (the bay).</p>	25	0
Environment and Sustainability	I'd like Dunedin to be a city leading on climate change responses, adaptation etc. How do we get coal out of our city and more public transport. Need less car parks in the city and those that are there should cost a lot more	25	9
Roads, Water and Waste Services	Please create an aggressive dog park that can be booked, this will allow dogs who can't socialise to have a good run, let off their steam and chase the ball without having to have a muzzle on or be on a lead. Which doesn't allow them that freedom. We need high fenced areas we can book for a half hour slot where no one else can enter with their dog.	25	5
Social and Community Wellbeing	<p>Dunedin railways needs to be retained and run through to middlemarch, this line is a treasure not only to the city but to all the visitors that take it, Dunedin Railways should be taken out of hibernation and held within the DCC, this will help ensure that future generation can access one of the top tourist attractions in the country.</p> <p>Once out of hibernation this will allow Dunedin Railways to grow into a sustainable business</p> <p>Keep our train running to Middlemarch!!!</p>	25	1

Environment and Sustainability	Our Wildlife Hospital needs support. They're a charitable trust and provide specialist level veterinary care to some of Ōtepoti's, the Wildlife Capital of NZ, most endangered wildlife. They rely predominantly on donations to operate but are playing a pivotal role in preventing the extinction of many species in particular yellow-eyed penguins/Hoiho. These endangered birds are publicised at the airport and in tourism advertising to bring \$\$ to Dunedin however they need all the help they can get!	24	2
Economic Wellbeing	Retention and investment in Dunedin Railways for the future of tourism in Dunedin.	24	5
Environment and Sustainability	Please look after our wildlife hospital! Human impact has devastating consequences on our wildlife. We need to help them recover and return safely to their homes.	23	1
Environment and Sustainability	Please support the Wildlife Hospital. Volunteers can only do so much. Without the Hospital the future for wildlife is bleak. Let's really be the Wildlife Capital of Aotearoa that we claim to be!	22	5
Social and Community Wellbeing	I was hoping there maybe more social housing on the flat near the botanic gardens. As I have a disability find it hard on hilly areas. This would make it so much easier for shopping and leisure time in the area. I wouldn't be so house bound either.	21	4
Environment and Sustainability	Tourism in Dunedin is about wildlife & heritage. Our wildlife hospital is highly regarded throughout New Zealand. Dunedin sells & promotes its tourism as the wildlife capital. Hence Dcc should support & divest funds into this unique facility in our city.	21	3
Environment and Sustainability	The Dunedin Wildlife Hospital needs DCC's support to continue caring for a lot of our endangered, taonga species. Dunedin is known as the wildlife capital of NZ, without the work of the wildlife hospital and other community groups focusing on biodiversity conservation in our region, this claim will likely not going to last as our wild neighbours are under so much threat from direct or indirect human impact.	21	2
Social and Community Wellbeing	End homelessness in Dunedin. That may be through direct provision of more housing or supporting other community agencies. Other cities have shown that is can be done! Ending homelessness is ratepayers' money well spent and will benefit everyone in the city.	21	2
Pools, Parks, Gardens and Sporting Facilities	Table tennis is a sport for literally all ages. It is a great mental game and proven to delay early onset alzheimers, it requires fast reaction times and can be played as physically as you like. Dunedin is the only major centre in the country that does not have a hub. We are being squeezed by larger sports in terms of securing space to train & play, which makes it impossible to grow. Please consider more indoor spaces for minority sports.	21	2

Environment and Sustainability	Allowing cyclists and pedestrians into Caversham Tunnel benefits the environment, eases traffic, and supports active living. Let's make this positive change!	20	0
Roads, Water and Waste Services	Please, open up the Chain Hills and Wingatui tunnels for recreational use. This would remove a massive hurdle for commuters	20	1
Economic Wellbeing	Get the tunnels open for cyclists. Better infrastrucuter to let people commute freely/safely on bikes	20	0
Environment and Sustainability	DCC need to continue funding the Wildlife Hospital as it is an important service in the region, especially so as we are seen as a 'must visit city' for ecotourism visitors.	19	1
Pools, Parks, Gardens and Sporting Facilities	Please focus on getting the two Tunnels open for the public to use for commuting, & recreational walking & cycling. I don't think you realize how many people will use it and are eagerly awaiting it to happen	19	1
Roads, Water and Waste Services	Please don't defer maintenance on our critical infrastructure (roads, pipes, etc). Deferring maintenance to hold rates artificially low will only cost the city more in the long run. By ignoring the cost escalations of the maintenance of the city's assets and not passing them onto today's ratepayer, we will continue to deteriorate the assets putting an increased burden on future generations.	19	0
Pools, Parks, Gardens and Sporting Facilities	Table tennis is a growing sport in New Zealand. Numbers are increasing vastly in regions up north and in the past Otago could keep up with the increasing rates but we are now declining in participation rates. We saw this at the nationals we the amount of juniors that we sent - little. Dunedin needs a set up table tennis stadium to make playing easier and allow our juniors to train more each week. The current set up at the Edgar centre does not work	19	4
Roads, Water and Waste Services	Can we please get a separated cycle lane/footpath between Ocean View and Green Island?	18	3
Roads, Water and Waste Services	There is no footpath joining Main South Road and Kaikorai Valley Road making it dangerous for walkers and cyclists as there are many large trucks that travel that way.	18	1
Environment and Sustainability	Alternative modes of transport are needed: trains, buses (when will the ORC finally hand over the buses to DCC...), more infrastructures for cycling and electric cars charging stations!	18	3
Environment and Sustainability	Please support the Wildlife Hospital Dunedin they provide an invaluable service to New Zealand's most precious wildlife. Without wildlife Dunedin cannot continue to claim to be the wildlife capital of NZ. They contribute to reducing the decline of certain species such as Hoiho without which a lot of the chicks would not survive past 1 week old. Support would go so far as the staff work incredibly hard for very little return all for the love of these incredible animals. Dunedin is so lucky.	18	0

Environment and Sustainability	Push ahead with improved walking, cycling and sustainable transport infrastructure. In particular, please ensure progress on the Two Tunnels Trail from Dunedin to Mosgiel. This will not only be an awesome commuting and recreational riding option for local Dunedinites, but will also be a vital link in the tourist focussed network of trails leading further into Otago.	18	0
Pools, Parks, Gardens and Sporting Facilities	Having a train that runs for passengers so we can travel around and to Dunedin city and to Christchurch, Invercargill or Queenstown. more public transport options to get into the city.	18	0
Environment and Sustainability	I understand that the DCC is a significant funder of the Dunedin WildLife Hospital. I sincerely hope this continues. While Dunedin can rightfully (and proudly) claim to be the Wildlife Capital of New Zealand, with all the attraction that provides, we're equally behoven to care for that wildlife and, sadly, often that means in sickness as well as health. The DWH is staffed by some of the best in the business and they have a record of "not losing many"! Let's not lose them.	18	0
Social and Community Wellbeing	Support the Northern Cycleway (Coastal Connection). It is already included in the Transport Plan. Now, please allocate council "local share" in the 10 Year Plan budgets so the project can receive funding from the NLTF. Let's enable the people of Waikouaiti, Karitane, Warrington and Waitati to walk or ride safely between their communities and to connect into the city!	17	1
Pools, Parks, Gardens and Sporting Facilities	I am so looking forward to a cycle track opening to get from Southern city areas into town. When will this become a reality? Please ensure this is a priority. If you haven't watched the Netflix series 'Live to 100' - do. This would be a great way to improve the general health of our population, which is covered as an important initiative in the series. Makes total sense.	17	0
Social and Community Wellbeing	Agree, perhaps people that run the pound can release. Surely they are there to release boarding dogs.	17	0
Pools, Parks, Gardens and Sporting Facilities	Please support the Dunedin Wildlife Centre! They do great work and should be supported to continue this. Dunedin's wildlife attracts many visitors each year and truly is a treasure to the city.	17	0
Social and Community Wellbeing	Agree. It should be about reuniting dogs with their owners as soon as possible, not a revenue gathering exercise	17	1
Pools, Parks, Gardens and Sporting Facilities	Can we set up a food market on Logan Park Drive for football night games to encourage more people to hang around and also allow businesses to make some money. There's no where near to even get a coffee to watch a game in Winter. As the hockey turf is just next door this would be a great community initiative and money maker.	16	0

Social and Community Wellbeing	Let's build a shared pathway that links Smaills Beach to Brighton and capitalise on our amazing coastline, plus it will provide a healthy option for locals and visitors. It would become a destination in itself.	16	0
Social and Community Wellbeing	Funding for Dunedin Wildlife Hospital! As mentioned in the snapshot we have lots of unique wildlife in Dunedin and since we are living here we should prioritize their wellbeing.	16	0
Economic Wellbeing	Dunedin has a huge opportunity to develop the Taieri Gorge Train. Its a council owned asset and there should be no reason it can't be a profitable enterprise when you consider: the steady growth in tourism post covid, specifically cruise ships the lack of other passenger train experiences in NZ the drive to increase passenger rail in the future to de-carbon transport the development of linking cycleways from Queenstown and Dunedin's own Harbour Loop Te Aka Ōtākou (The Otago Vine) Support TGL	16	1
Pools, Parks, Gardens and Sporting Facilities	table tennis is a sport and healthy life style for all people in dunedin and beyond ,we need help in finding a permanent hall, base ,health benefits and well being make this fun social sport ,one you can play all your life, please help us find a permanent base and hall	16	6
Environment and Sustainability	Our Wildlife hospital needs support. We have unique species that give our city its reputation as the Wildlife Capital and we need our council to support this important service.	15	1
Social and Community Wellbeing	can you please open the caversham tunnel for cycle traffic. i would like the option for myself and my children to use our bikes to go to work and school with ease, this tunnel being open to cycle traffic would create a safe passage and be a vital asset to dunedin.	15	1
Environment and Sustainability	Opening Caversham Tunnel to cyclists and pedestrians will reduce congestion, encourage a healthy lifestyle, and boost local tourism. Let's enhance our community!	15	0
Environment and Sustainability	Unlocking Caversham Tunnel for cyclists and walkers means cleaner air, less traffic, and economic growth. It's a win-win for our city.	15	1
Roads, Water and Waste Services	Please escalate the work on the tunnels to mosgiel, would make such a difference for commuting to mosgiel and get more people out in the fresh air	15	0
Environment and Sustainability	Please keep the public up to date with pest control operations so that dog owners know where it is safe to walk. E.g recent trapping and poisoning happening at the entrance to Racemans Track not listed anywhere and communication with yourselves found nobody seemed to know about it. Driving all the way somewhere to find it isn't safe is not ideal. Facebook updates please as well as the website!	15	0

Social and Community Wellbeing	having more sign in the street in Te Reo would be really nice to enhance the public knowledge.	15	2
Roads, Water and Waste Services	Great to see the George St upgrades, but follow it up with making our city centre a safe and pleasant place to visit by minimising cars. Parking should be localised to a few big car parks so people don't drive pointlessly in circles looking for a park. Provide free electric shuttle around shops and car parks for anyone who can't walk between car parks/ bus stops and shops. Cost of parking should increase to reflect true cost of real estate and to environment. Cheaper better public transport.	15	4
Environment and Sustainability	As a daily cycle commuter to the University of Otago, please support more and safer dedicated cycling and walking infrastructure. Also, as a major funder of our iconic Dunedin Wildlife Hospital, the DCC must bend over backwards to keep financially supporting this incredible and vital facility - I believe there is overwhelming public support out there to do this!  If in doubt, ask them when presenting the draft LTP early next year!!!!	15	3
Libraries, Arts and Culture	Provide financial support annually to small museums, they hold local heritage collections and information which would otherwise be lost to future generations. Some annual funding would enable them to maintain their collections and their building. At present this work is all undertaken by volunteers who generally struggle to meet their museums basic financial needs. A number of other Councils around the Country provide such funding and have done so for many years.	14	4
Pools, Parks, Gardens and Sporting Facilities	As a family friendly city - we need a multi-sport indoor facility to continue to support our kids and families to be active. Our current centers are aged and in need of a replacement strategy. The Edgar centre and Moana pool are aged and not fit for purpose.	14	1
Social and Community Wellbeing	The need for affordable, healthy, safe rental accommodation for Seniors on fixed incomes grows by the week. Please support and facilitate the thriving of DCC and other Not-for-profit housing initiatives, so our elders can live well.	14	0
Environment and Sustainability	Reward people who produce less waste because they are buying plastic free, reuse, recycle and compost. It should be possible to be invoiced via a scanning system for the bins that you actually put out. We should not be forced to put out bins every week or fortnight and pay the same as people who put out a lot of waste. If we really want to be more sustainable then less waste production should be rewarded.	14	1
Pools, Parks, Gardens and Sporting Facilities	Is there community support for Council assistance to find a way to reopen the Physio Pool ? If it cannot reopen because of possible constraints is there community support for Council to provide a new hydrotherapy pool in Dunedin ?	14	0

Economic Wellbeing	Dunedin must focus on bring international flights to the city by working major airlines etc	14	4
Pools, Parks, Gardens and Sporting Facilities	Mosgiel needs a new indoor sports/community facility. Memorial gym is dated, undersized and not fit for purpose. Now the town has the new pool, it is time for planning to begin on a new sports facility to complement the pool and give residents a large indoor space for sport and recreation rather than the entire city converging on the Edgar Centre.	13	4
Pools, Parks, Gardens and Sporting Facilities	Be great if the old Tomahawk school site could be redeveloped with a playground maybe a skate park, basket ball hoops, rebound wall, some picnic tables, bbqs and some more native tree plantings. Or maybe a frisbee golf course?	13	0
Social and Community Wellbeing	Please continue to open up the Caversham and Chain Hills Tunnels to create the cycleway between Dunedin and Mosgiel. Mosgiel is a growing part of our city and there needs to be the ability to cycle safely between them. It is good for wellbeing, good for the environment and gets cars off the roads/	13	1
Social and Community Wellbeing	hi i would like to see the caversham tunnel open to cyclists to complete the cycleway to mosgiel thus completing a cycle link to central otago.	13	2
Environment and Sustainability	i would like to see the caversham tunnel open again after 18 plus years of being closed , i remember as a child walking through it safely to school. now as an adult i have to either use the unreliable bus service or use a car to get to the other side which makes no sense for a zero carbon goal, or walk or ride my bike and be exhausted by the time i get to the other side of the hill. myself and others like me will thank you for reopening this tunnel again.	13	1
Roads, Water and Waste Services	Regular (weekly) sweeping of bike lane up and down Kaikorai Valley, please. Actually....please sweep all bike lanes regularly	13	3
Pools, Parks, Gardens and Sporting Facilities	Playgrounds need some serious love here in Dunedin. We want a destination playground upgrade!!	13	0
Social and Community Wellbeing	Please support the Northern Cycleway (Coastal Connection). It is already included in the Transport Plan. Please allocate council "local share" in the 10 Year Plan budgets so the project can receive funding from the NLTF. It would be amazing for the people of Waikouaiti, Karitane, Warrington and Waitati to walk or ride safely between their communities and to connect into the city.	13	0

Pools, Parks, Gardens and Sporting Facilities	<p>I am fully in support of an indoor skate park in Dunedin. I would like this facility to also be jump bike friendly.</p> <p>A pump track in Dunedin is desperately needed! And a proper one not a modular one. Also a mini ramp in south Dunedin.</p> <p>The council also needs to support mountain biking more. The Otago MTB club does a power of work with very little support from council. Yet all other forms of cycling seem to get a lot more support.</p>	13	0
Roads, Water and Waste Services	Bring in compost collection and commercial composting and take food waste out of the landfill. Not everyone is in a position to compost at home.	13	1
Environment and Sustainability	Reward businesses that are more environmentally friendly, e.g. businesses who don't offer takeaway coffee cups. Invest in more recycling facilities, e.g. for tetra paks, plastic lids, small plastics, and soft plastic, but at the same time support businesses to get rid of all these.	13	0
Pools, Parks, Gardens and Sporting Facilities	Rather than planning one destination playground why not improve the suburban ones. If you really want to ensure cars are used less then there shouldn't be a need to get in a car to go across town to a playground.	13	0
Social and Community Wellbeing	<p>We need to make our city more accessible for our wheelchair users, not just pathways and entrances OUR community.</p> <p>We need to stop making people in wheelchairs feel like they have to stay at home because they can't get to or enter places,</p> <p>More support and funding for wheelchair sports manual and electric chairs.</p>	13	0
Environment and Sustainability	SAFE cycle networks AND infrastructure, within urban areas, but also connecting our outer suburbs and coastal areas (Ocean View/Brighton/Taieri Mouth <-> city; Mosgiel/Outram <-> city; Waitati <-> city etc). Safe cycle/walking/active transport is a win on every level. Active, engaged population who are healthier (mental, physical, spiritual) and a sustainable solution to a gridlocked city with no parking. The evidence is right in front of you, the arguments in favour are substantial.	13	5
Roads, Water and Waste Services	Linking all important places, community and suburbs in Dunedin via MRT/LRT train or subways for easily travel around metro or far Dunedin... hope can pattern like in Singapore, a small Island with good transportation access.	12	5
Social and Community Wellbeing	Complete the peninsula cycle way so our Harrington Point community can be connected safely to Portobello	12	1

Pools, Parks, Gardens and Sporting Facilities	Please invest some money into improving the changing facilities at Moana Pool. They are grubby, tired and in need of attention. The pool is a great asset for the city, but in need of a bit of modernisation to futureproof it for the next 50 years.	12	0
Environment and Sustainability	With improvement of bike lanes, please remember bike garages, and potentially storage units. Connectivity is key regarding the lanes! And please remember us outside of town, how can folk from Brighton etc safely bike into town?	12	0
Social and Community Wellbeing	Dunedin is a city that is blessed with a pretty special topography. However, because it is oriented so thoroughly towards the car, many of its virtues are not getting expressed. I would like to see far more pedestrianised spaces and the development of the harbour side area (where the fireworks were hosted) into a place where people can actually have a wander... Get some Finns in (those responsible for the redevelopment of a town called Lathi) to give you some ideas!!	12	2
Roads, Water and Waste Services	Slower speeds save lives. I support the dcc plans to reduce city speeds in line with medical and empirical evidence. Keep up the good work. Mary	12	4
Environment and Sustainability	Please support the high investment option for Dunedin's zero carbon plan. Dunedin could and should be a frontrunner and aim to get to carbon zero as fast as possible, while taking steps to make our city more climate change resilience. This may cost money now, but will definitely save a lot of money, and hardship, over the coming 20-30 years.	12	2
Roads, Water and Waste Services	Inland Port is something we need to be looking at, This will reduce trucks off roads etc. This has happen to most other city's around NZ,Aust. We must invest for the future and not wait till it's to late and cost a whole lot more. The Port is a life line to the city so we must look after it, as if it prosperous the people in the Otago Region prosperous.  Traffic bypass is needed for Mosgiel as it is long overdue.	11	0
Social and Community Wellbeing	Please fund the Dunedin Astronomical Society and the Beverley Begg Observatory, and the Dunedin Wildlife Hospital - they are a treasure.	11	0
Pools, Parks, Gardens and Sporting Facilities	Table tennis is a sport that all ages and abilities can enjoy and every city is enhanced if it can provide an opportunity for the community to play. In Dunedin we the tale tennis community, are based at Edgar Centre but this does not meet the need. The space is frequently unavailable, it is noisy, it is not practical or sustainable to put the tables up and down every time the game is played. We want to create a dedicated welcoming space where we can grow the game for all - from kids to seniors.	11	3
Environment and Sustainability	Prioritise the return of a passenger rail line out of Dunedin over increasing domestic/short hop air travel	11	3

Social and Community Wellbeing	Surely this is in the best interest of both dogs and DCC. Return the dog as soon as is possible to eliminate any undue stress to the dog/families and also free up space for any future impoundments. It's a win/win. In this economic climate, leniency should be given on a case by case basis. Payment options or less fees so that the dogs can be reunited to their rightful owners.	11	1
Roads, Water and Waste Services	In terms of south dunedin futures when are the aging stormwater pipes going to be replaced? It is over 7 years since the infamous 2015 floods.	10	1
Roads, Water and Waste Services	Please complete the Dunedin Peninsula connection . This is a commitment that has not been honoured for the local road and cycle users, also for the tourists, Busses, campervans and, tourist cyclists, and Tourist general traffic to the Albatrosses,Penguin attractions, and the Monarch Tours. Also the delivery and service companies to these tourist attractions need and deserve to have this commitment honoured.	10	2
Roads, Water and Waste Services	South Dunedin's immediate flooding potential should be the focus of work now. Upgrade drains at problem areas and ensure a regular cleaning program is in place and carried out. DCC inspectors should check all contractors work.  More money should be spent on roads and infra-structure and less on the non-essentials and 'nice to haves'.  Less money should be spent on consultants and more money for competent staff who do not need consultants.  The Taieri Gorge Railway is an essential drawer card	10	0
Social and Community Wellbeing	If we are to believe the intel we're two generations away from South Dunedin's 2,700 dwellings becoming uninhabitable. We either begin the retreat from South D now, in an organised fashion that allows those who will be impacted time to adjust and plan accordingly, or the march of time will force our hand. This issue won't impact us in 2023, but will impact our children and, more importantly, their children.	10	0
Social and Community Wellbeing	Owners were forced onto the beaches and footpaths when access to local greenspaces was removed without reason in 2016. There were 350+ greenspaces being used with no problems. Denying access to greenspaces because dogs are already on footpaths and breaches ignores that owners have been forced to use those spaces because it is all that is left: Restore access to those greenspaces and any congestion will dissolve.	10	0
Pools, Parks, Gardens and Sporting Facilities	we need a new table tennis gym or any kind of indoor gym	10	2

Economic Wellbeing	Bring back small scale local manufacturing of essentials ...along with an apprentice system to train young people. The future is low energy, less consumption, localism & a much simpler way of living. If we don't plan for this now we're in for a very rough time. We also need land made available and affordable for horticulture ... a hungry population is not a happy population.	10	0
Social and Community Wellbeing	There is growing potential for disruption to food supply from climate change and international events. The Council must support food resilience for citizens. This requires adequately resourcing the capacity to do so. Therefore we (Our Food Network and Seniors Climate Action Network) urge the Council to create a full time permanent position of Food Resilience Coordinator to coordinate community-wide efforts, to bolster truly sustainable local food production.	10	1
Pools, Parks, Gardens and Sporting Facilities	Asking the community children, getting there input on what they would like. Updating outdated things such as skate parks/ramps. Basketball hoops are great.	9	0
Libraries, Arts and Culture	Would love to see more support for the central library for a fresher range of new books and a more light and open space.	9	2
Libraries, Arts and Culture	I think it is great that South Dunedin is finally getting a Library but the main Library in the centre of town is in desperate need of modernising. The building and layout has not been fit for purpose in years. It feels old and heavy. Compared to more modern libraries in Christchurch or Gore, Dunedin's is very sad. This is not a criticism of the collections or staff who do an amazing job with the spaces they have but imagine what would be possible if they had something more functional.	9	2
Social and Community Wellbeing	Need to be tougher and watchful, fining people who take their dogs where they are not allowed to be, as is signposted. In particular parks where children are that bans them for safety reasons, and in the main streets where they are banned. I see them quite often in all these places, one had his huge dog tied up right where a sign was in South D, and menacing people trying to get into a shop. In another case, a pitbull like dog in the Navy park, off leash where kids were playing.	9	25
Pools, Parks, Gardens and Sporting Facilities	More indoor sporting venues are required as our population grows. The Edgar centre is at capacity. Why not create a hub attached to the Mosgiel pool with some indoor courts that multiple sports can use and take some of the pressure off the Edgar Centre.	9	0
Social and Community Wellbeing	Mandatory training on te Tiriti o Waitangi/Treaty of Waitangi for all DCC staff, and more opportunities for cultural development for DCC staff as well,.	9	3
Libraries, Arts and Culture	Dunedin need to have a major events center on the waterfront with cafes bars and restaurants	9	4

Pools, Parks, Gardens and Sporting Facilities	Build an outdoor hotpool complex on Esplanade domain or around hot salt water pool open all year long. Also increase height of wall by salt water pool to stop it flooding and reduce amount of days it has to close for cleanup.	8	5
Environment and Sustainability	More support (including funding) for the great mahi the Tomahawk-Smailles Beachcare Trust volunteer team does in planting native plants in the reserve and dunes behind Tomahawk and Smailles beaches. Support people out there volunteering to improve and restore our wonderful local environment.	8	1
Roads, Water and Waste Services	Finish Harington Point Road where it's crumbling into the ocean. It's dangerous and sometimes underwater in king tides. Stop people parking on the pedestrian and cycleway. It dangerous, especially at Wellers Rock where boaties and divers park anywhere they want.	8	0
Pools, Parks, Gardens and Sporting Facilities	<p>About the sport facilities:</p> <p>A big indoor climbing gym with top rope, wall and bouldering would really be apreciable as the new bouldering gym is really crowded I am sure plenty of people will use it! with a sauna and cafe inside and gear rental, maybe schools can also use it in the day hours.</p> <p>Maybe a dojo with a tatami could also be great as there is a lot of clubs that don't have a room to practice (karate, judo, boxing, taekwendo...)</p>	8	2
Social and Community Wellbeing	The lack of public and pensioner housing in Dunedin is a real concern. As you know, a 42% increase in Dunedin's 65 years and over population is projected by 2054 - we need to start building for this now, because many low income seniors I know are buying cheap old caravans (can be cold & damp) to live in at holiday parks & if that trend continues with an increasing population, Dunedin will end up with dozens of holiday parks acting as retirement villages, and not a great image for tourists.	8	1
Pools, Parks, Gardens and Sporting Facilities	I support the above coment	8	0
Pools, Parks, Gardens and Sporting Facilities	Dunedin needs a permanent table tennis stadium. A sport that is great for fitness, mental health and injury rehabilitation. Having to move tables for set-up each time is not ideal. I'd happily move to Dunedin if there was a permanent facility. Everyone would benefit 🏓	8	0
Environment and Sustainability	The Town Belt needs more care and investiment. Removal of rubbish and weeds is a priority. Closing roads to make it people friendly is also required. Town Belt Sanctuary a DCC initiative should continue and be supported.	8	0

Pools, Parks, Gardens and Sporting Facilities	Support for physio pool. Essential for many people to have this facility in the city	8	0
Pools, Parks, Gardens and Sporting Facilities	This is about suitable spaces for controlled dogs. That does not require fences and owners who fail to train and control their dog should not confuse that with demands for more fenced areas. I have no adjectives for requests for expensive fencing so owners can shove their dog inside and leave it while it runs around *exploring* an area the size of the whole Forrester Park. But it is not the same as providing law-abiding owners with their legal entitlement.	8	0
Roads, Water and Waste Services	Our road (mcmaster road, saddlehill) is an embarrassing look into the way Dcc spend our money. Ive seen ski feild roads in better condition. Can we get ontop of the basics please?	7	1
Libraries, Arts and Culture	We need a dance performance theatre for medium size events of about 400 people with plenty of changing room space etc. Dunedin really lacks in this size venue and what is available is extremely expensive e.g. Regent, Otago University spaces. The town hall isn't suitable for dance and the Glenroy is too small. Mayfair is run down and lacks changing room spaces. Klngs/Queens also lack changing room space.	7	2
Roads, Water and Waste Services	Transport to the airport - train or bus!	7	0
Libraries, Arts and Culture	The Library in Christchurch has the ground floor open at 8.00am - something to consider for Dunedin? Also it would be great if the Library was open earlier on Saturday so early morning Farmer's market goers can combine the two visits in one trip.	7	0
Social and Community Wellbeing	I am a table tennis player and would appreciate a fit for purpose stadium that is warm and dry. Accessible for all Dunedin residents for other purposes as well	7	6
Social and Community Wellbeing	I believe the council needs to invest in more social housing options and to ensure that the rents for those people are affordable. Current housing needs to be upgraded and replaced as our lives are vastly different for community members than when homes like Victoria Road were built.  Housing in Dunedin should be sustainable and universally built to ensure that people with disabilities can have equity of access. Homes built to these standards should be fast tracked through the consent process.	7	1
Pools, Parks, Gardens and Sporting Facilities	WALKING AND CYCLING/PUBLIC TRANSPORT: We support the extension of walkways and cycleways into the reserves and parks. Investment in these paths delivers a range of social and environmental benefits that increase health and wellbeing. We also support initiatives to improve connections to public transport links.	7	1

Roads, Water and Waste Services	I think it is of utmost importance to finish the road widening from portobello, over the hill to make it safe for children, but also the many cyclists and walkers than are using the walking/bike trails each side. It is very dangerous currently. Before spending on new project, please complete this one.	6	1
Economic Wellbeing	I would prefer more intersecting bus lines so I don't have to back track or ride completely out of my way to the hub to switch buses. What happened to the Green Island Super stop? There only seems to be the Mosgiel and Brighton buses that stop there - hardly super.	6	0
Pools, Parks, Gardens and Sporting Facilities	Can we please get the esplanade upgraded.	6	2
Social and Community Wellbeing	Outdoor play space for teens and adults with equipment and challenges that suit older people.	6	0
Social and Community Wellbeing	What i would love to see is caversham tunnel finally open to cyclists to make the dunedin tunnels trail trust cycle route from mosgiel complete. <a href="https://www.dttt.org.nz/?fbclid=IwAR1rTXJNlwpVNtzP_Md8d6veNeZotp1dm92BrCQtbj3vGXhHekc3ut2LWU">https://www.dttt.org.nz/?fbclid=IwAR1rTXJNlwpVNtzP_Md8d6veNeZotp1dm92BrCQtbj3vGXhHekc3ut2LWU</a>	6	5
Pools, Parks, Gardens and Sporting Facilities	It would be great if we could have an accessible area to the Kaikorai Stream - from Green Island/Abbotsford. We have a lovely stream going through our community which is entirely inaccessible and sadly neglected. It should be a community treasure!	6	0
Roads, Water and Waste Services	This is probably an issue that Waka Kotahi will decide, but it would be great to have a heavy traffic bypass around Waikouaiti main street (SH1). Currently trucks thunder through our shopping centre continuously during daytime and evening hours, it is difficult to cross the road, and it does not encourage people to linger. There is open space to the west of the township to place a bypass, with room for new services to spring up beside it.	6	1
Pools, Parks, Gardens and Sporting Facilities	Imagine an indoor facility where the skatepark was central, perimeter for biking,blading around. Rockwall for climbers. Afterschool/holiday clubs, youth development workshops using their interests (skating) as a tool for them to build life skills. Age specific areas, coaching, team building the possibilities are endless. Even have a quiet area for parents to grab a coffee and chill (if they are not in the park). A hub like this not only serves kids it serves everyone!	6	0
Environment and Sustainability	The council should look into reducing the light pollution at night to help migrating birds travel and our native animals to develop healthy sleep habits.	6	1

Social and Community Wellbeing	It is important that the DCC encourages Project Steam to develop an operational Heritage operation as a potential economic catalyst for Middlemarch as well as bringing Dunedin Railways trains into the town. We have such wonderful historic assets than needs to be used and assist the economic well being of Middlemarch.	6	0
Pools, Parks, Gardens and Sporting Facilities	These spaces need better disability access. Little things like handles on bathroom doors need attention. Get an access assessment of all community spaces.  Offer grants for all community spaces to be bought up to building code for disability access	6	1
Roads, Water and Waste Services	You need to invest in the wastewater and storm water and water pipes around the city, especially where a lot of new buildings go in which will put more strain on the existing, old system. Don't wait until something happens but start with a gradual update now!	6	0
Pools, Parks, Gardens and Sporting Facilities	We are involved in dog sports, the DCC's change of land use at Forrester Park has effected our sport greatly. DCC has stopped parking on the grass area around the Forrester Park building, and made the adjacent grass a public dog running area. This restricts the use of the building as the public vandalise dog equipment outside so all agility etc has to take place inside the building. The grass area outside which the dog sports used to use is now unsuitable because the surface is too rough.	6	3
Roads, Water and Waste Services	I disagree with charges because there is no charge to use playgrounds, skateboard parks, pump tracks, off-road cycle tracks or similar, and dog owners already pay for dog related facilities in their registration fees. The problem is that current dog parks do not meet dog or owner exercise and recreational needs as required by the Dog Control Act. Suitable facilities available for booking by individuals is part of the dog hub suggestion.	6	0
Roads, Water and Waste Services	Please seal Church Hill road. The dust is getting into our lungs, water, and we can't sit outside because it is that bad. Council have turned us down constantly over last 8 years and again denied with development contribution costs from 14 new houses approved behind us which will increase traffic Even more. Nearby Tunnel Beach is getting a nice new carpark but council won't look after our health as a result of more traffic to tunnel beach and the continuation of new houses.	6	0
Roads, Water and Waste Services	If a road is NO EXIT to traffic but has a walking track/path at the end of it could this be indicated on the sign.	6	0

Environment and Sustainability	<p>1) I see an increasing amount of pest plants around the city. Volunteer efforts are substantial and I would like to see council support and accelerate this work. We don't want to see it becoming a wilding pine type of scenario. Lets keep ahead!</p> <p>2) There are so many huge pines and gums and macrocarpa that have become far too big for their urban locations. I would like to see more resources put into their removal.</p>	6	0
Libraries, Arts and Culture	It is important that the DCC continues to invest in the Dunedin Gasworks Museum. This is an important community asset in South Dunedin that is increasingly used for community groups and events. It is a large area of public land in a part of town that is changing rapidly, and has a lack of community amenity places. The buildings and industrial heritage machinery are of international significance. It is a Cat 1 heritage place, and sits on a rise and so is not flood prone.	6	0
Roads, Water and Waste Services	FOOTPATHS: Improve the quality of the footpaths, add adequate street lights to increase safety for pedestrians, and seating on footpaths is especially important for older people or families with young children.	6	0
Roads, Water and Waste Services	INCREASE ACTIVE TRANSPORT INFRASTRUCTURE:. More safe cycling spaces in the hill areas considering more people are using e-bikes, and more safe crossing points.	6	1
Roads, Water and Waste Services	CYCLING: Bike parking and bike stands; connected cycle lanes.	6	1
Social and Community Wellbeing	COMMUNITY HOUSING: We support the Council's plan to spend \$20m on increased community housing, and would like to see more investment in increasing the number and maintaining the quality of community housing. We also recommend the council work with iwi partners and Aukaha to provide housing solutions close to Marae. Neighbourhood and housing development should be located near health and education services, close to reliable public transport systems and safe walking/cycling network.	6	1
Pools, Parks, Gardens and Sporting Facilities	DRINKING FOUNTAINS: Adequate hydration is important, especially in the warmer months. Increasing the number of drinking fountains is a way that the Council can contribute to the health and wellbeing of its citizens by giving people the option of free easily accessible water in parks and reserves. We recommend installing drinking water fountains/bottle fillers in as many reserves and parks as possible.	6	0
Pools, Parks, Gardens and Sporting Facilities	PLANTING AND COMMUNITY GARDENS:. Consideration needs to be given to native plants because this can assist with the regeneration of forests, protect important species and their habitats. Vegetables and fruit trees could also be included in the planting plan as this helps build food resilience.	6	1

Environment and Sustainability	Information about composting facilities would be appreciated but beyond that, it should be possible to have biodegradable waste collected separately to not fill up landfills with waste that can be composted.	6	0
Pools, Parks, Gardens and Sporting Facilities	Create or upgrade more standard sports facilities and Invite International sports competition in Tennis, Water sports, Basketball, Football /Soccer, this will help attract more tourist, generate income or investors in Dunedin. We are creating awareness around the world that we have a better place for events.	5	2
Economic Wellbeing	If we don't have a position to build a positive future where we can get a positive stand ,opportunity for business development employment opportunities and not this excessive demand to keep heritage values .look at Princess St buildings in The Exchang Rattray St behind Fable Hotel these are disgusting and effect Dunedin image one right opposite the Southern Cross Hotel, surley this could be developed with out Govt funding Dunedin would not developed foward .Surley we can do better	5	1
Pools, Parks, Gardens and Sporting Facilities	Dual purpose cycle / walk way through the town belt. Get rid of the pot holes Rates reduction that match rates reduction.	5	0
Pools, Parks, Gardens and Sporting Facilities	Dunedin definitely needs this ! As a city which is encouraging exercise and healthy living, and considering it's weather, this is a must for encouraging our young and young at heart to stay active all year round. Yeww!!	5	0
Pools, Parks, Gardens and Sporting Facilities	GREAT IDEA FOR DUNEDIN	5	0
Pools, Parks, Gardens and Sporting Facilities	Dunedin has extremely long winters and is a central hub for outdoor activities. An offseason facility for the public to exercise is imperative for the wellbeing of the community. Additionally, this investment would be complemented by all the recent skate ramp repairs around the city.	5	0
Libraries, Arts and Culture	These spaces need better disability access. Little things like handles on bathroom doors need attention. Get an access assessment of all community spaces.	5	1
Social and Community Wellbeing	Make parking affordable again! Families and the elderly and disabled are struggling with the additional cost, and they can't always use busses.	5	4
Pools, Parks, Gardens and Sporting Facilities	Dunedin needs a Working Man's Club with all sporting facilities. Table tennis, snooker pool, kitchen, bar venue. Chch has wonderful modern facilities and thriving internal communities. Oamaru Invercargill Blenheim Nelson but Dunedin nothing.	5	2
Pools, Parks, Gardens and Sporting Facilities	More facilities to have table tennis and pickleball which are both growing sports and popular particularly for the older generation.	5	4
Roads, Water and Waste Services	SAFE ACTIVE TRANSPORT NETWORKS: Connecting swimming pools, playgrounds, schools, community hubs, marae etc.	5	0

Social and Community Wellbeing	DISABILITY: A quarter of New Zealanders live with some form of disability, but less than 1 percent of homes have been built with accessibility in mind.1 It is projected that 42% increase in 65 years and over population by 2054 in Dunedin and number of living with disability is increasing. Hence, there is an increased demand for greater accessibility to transport, education, healthcare services and community facilities (swimming pool, play grounds, library, toilets, etc.	5	1
Social and Community Wellbeing	HOUSING PLAN: We congratulate DCC on having a housing plan which is focused on looking after the vulnerable population, increasing the quality of housing, increasing accessibility, adopting universal design principles, and increasing connectivity etc. We recommend its implementation is prioritised in the LTP. We also strongly support the current DCC work on addressing homelessness through interagency collaborative efforts.	5	1
Environment and Sustainability	Yes! Especially around places like the shared harbour pathway	4	0
Libraries, Arts and Culture	Take control of Performing Art in Dunedin. Buy the Carnegie Centre and turn it into a space to meet the needs of our theatre groups. Being involved in a project costing \$38million on 3 separate venues, none of which are built for purpose, burden rate payers with expensive running cost like rent. The Carnegie has space on vacant land for a new built to purpose theatre. The existing building has space to accommodate The Playhouse needs, rehearsal rooms and the ability to generate income.	4	4
Social and Community Wellbeing	More dementia homes suitable for our elderly pensioners with cheaper costs and safety..	4	1
Pools, Parks, Gardens and Sporting Facilities	having more outdoor workout equipment would be nice in parks, close to the cycle way and beaches like macbay or broadbay, and on the parks on hills.	4	0
Libraries, Arts and Culture	The Mayfair for the theatre venue.	4	0
Economic Wellbeing	Dunedin need another shopping mall in the suburbs with a movie theater	4	5
Libraries, Arts and Culture	Please build a new performing arts centre. We believe one can be built for not much more than the \$17m already committed. It would be an opportunity to create a 'green' venue, not burdened with references to NZ's Victorian and colonial past, making it a much more welcoming space for all. A purpose-built, 21st century centre is needed for local & touring professional theatre, Māori and Pasifika, dance, community theatre. It would be the city's arts hub, offering accessible infrastructure for all.	4	0

Economic Wellbeing	<p>DCC must put The City Portrait &amp; Donut Economics at the forefront of all its decisions.</p> <p>Well-being is contingent on healthy ecosystems...#1; clean water &amp; air, healthy souls that grow nutritious food.</p> <p>Food resilience will be key for our region as we no longer produce any food locally.</p> <p>As demonstrated clearly when supply chains break down internationally or nationally due to extreme weather, pandemics, war food security is threatened.</p> <p>A full time DCC person to address this, is a priority.</p>	4	1
Environment and Sustainability	<p>CLIMATE CHANGE - This subject overhangs everything we do and live with.</p> <p>Hard to face up to what is required in our individual and community small worlds but we HAVE to change our ways. No question. Please do what can be possible to effect change. Transport, insulation, solar, wind.</p>	4	1
Economic Wellbeing	<p>DCC must take food security for our region seriously.</p> <p>NZ imports 60+% of its food!!</p> <p>We grow no food locally.</p> <p>Council could work with growers and local farmers to enable local horticulture...to grow the basic foods that sustain people ... potatoes, pumpkins, legumes etc</p> <p>The way we live now is putting all life at risk, including humanity.</p> <p>Farming, growing using permaculture/regenerative agriculture principals is required &amp; could provide jobs if we trained young people in this essential service.</p>	4	0
Roads, Water and Waste Services	<p>CROSSING POINTS: Safe and accessible crossing points as the data shows one area of particular safety concern in Dunedin are the intersections (especially urban intersections).</p>	4	0
Environment and Sustainability	<p>It will be great to have some shared bikes stations as done by veolia in some cities, to be able to tag on, unlock a bike use it to go to another place and tag off putting back in the other stations. (stations are better than the lime scotter that end up everywhere on the streets), and you can have electric version of bikes for going up hill. I have stayed in Lyon (france) which had this system and we had 30min free from the moment you tag on, and you could go up hill and gain 30min more!</p>	4	0
Social and Community Wellbeing	<p>TE TIRITI: We support DCC developing a Māori Strategic Framework as part of the strategic refresh.</p> <p>According to the council, the development of the framework is a way to operationalise the Te Tiriti o Waitangi across the work of the DCC. It will bring a Te Ao Māori lens to the city level and will establish Te Ao Māori aspirations that will guide the DCC's contribution to delivering Māori wellbeing across the city. We are pleased to see engagement with Iwi partners while developing the LTP.</p>	4	1

Environment and Sustainability	There are different ways we can encourage environmental sustainability on a community level. Having a drinking water fountains in our public spaces not only keep us hydrated while we're walking, exercising and playing, but they also help keep our environment healthy with reducing plastic wastes. Similarly, promoting community garden with veggies and fruit trees will not only help food security and social connectedness but also supports the environmental co-benefits/reducing carbon footprint.	4	1
Social and Community Wellbeing	CYCLING: Plan and budget for more cycleways – Caversham and Wingatui tunnels? Safety encourages cycling for commuting and family recreation - Cycling provides exercise, a sense of freedom – good for wellbeing and reduces emissions. More children and agile seniors would ride without the fear of traffic - Future-proofing too. The Peninsula and West Harbour cycleways are fantastic – thank you DCC!	4	2
Roads, Water and Waste Services	You keep delaying the work at Portobello, fixing the Sea Wall and issues around the access road at Harwood, or even maintaining the roads adequately in the area.  I have experienced waves breaking over the top of my car and losing site of the road while trying to access Harwood. You have delayed the work of fixing the sea wall and raising the access road or providing an alternative access road at Harwood.  Each budget you put it  You are failing in your Duty of Care and putting lives at risk.	3	2
Roads, Water and Waste Services	Totally agree with a safe walkway between green island and at least ocean view. All the way to Brighton would be better. People would use it.	3	0
Environment and Sustainability	This is brilliant, in other cities I've lived in there are water refill stations at all bathrooms in malls and food courts. It makes such a difference to be able to refill a water bottle rather than having to buy more water/plastic.	3	0
Roads, Water and Waste Services	Finish the peninsula connection pieces around Portobello. What's done is great, but it's still not safe for kids to walk to school. The boardwalk piece needs to be done, and the area around the Portobello school needs to be done.	3	0
Pools, Parks, Gardens and Sporting Facilities	100% Dunedin needs a skate park, keeping child to adult fit and healthy while keeping them off the streets	3	0
Economic Wellbeing	We need greater funding for Tourism Marketing. The visitor Industry brings great economic benefit to the city and the wider Dunedin area and benefits retail, hospitality, accommodation providers, tourism operators which creates employment and also has secondary benefits to other local businesses. We have a new Tourism management plan but not the funds to action it.	3	5

Roads, Water and Waste Services	The current state of the Otago Peninsula Road, especially towards its far end, poses a considerable safety hazard, with the potential for imminent accidents. Several sections of the road are eroding into the sea, and these erosions have significantly affected the road's integrity. Despite the commendable road maintenance efforts undertaken thus far, it is evident that the job remains unfinished. It is imperative to allocate additional resources to guarantee the safety of all road users.	3	0
Environment and Sustainability	The new bicycle parks appearing around town and hill suburbs are making it much easier to get around by bike. Thanks DCC!	3	0
Pools, Parks, Gardens and Sporting Facilities	Kia ora, Table Tennis is a the great 'leveller' - it is suitable for an immensely wide range of people: - people from all levels of physical ability; - people from all walks of life; - people from all personalities and intellectual abilities; It fosters and teaches team spirit while relying on individual responsibility and as such is a great sport for our tamariki. A dedicated space for this sport would allow for an efficient and exciting expansion of this sport into the wider community.	3	0
Economic Wellbeing	Decisions around economic well-being and enterprise development will require strategic decisions to invest in the right areas and disinvest in others. The things that drive economic success will also have wider social and community benefit. The ongoing support of the start-up ecosystem in Dunedin has been a marker of success for the city and it has shown its ability to execute and deliver successfully in these areas. These decisions need to be made now for the next 25-30 years of growth for t	3	1
Pools, Parks, Gardens and Sporting Facilities	I would like to suggest a multi purpose sporting and Rec centre at Memorial Park Mosgiel next to the newly opened Te Puna Whaka ehu. This could include a gym commercial kitchen and versatile function's space. There are a multitude of sports in the vicinity that would benefit including but not exclusive to Football, athletics squash, basketball, table tennis, athletics and rugby. This as I see it would alleviate some pressure on the aging sports clubs and provide modern facilities to many sports	3	1
Roads, Water and Waste Services	Dunedin needs a comprehensive waste minimisation and recycling centre similar to Wastebusters in Wanaka. Keep more rubbish out of landfill, provide jobs and give those on low incomes opportunity to purchase goods at low cost.	3	1
Libraries, Arts and Culture	Update the Dunedin Botanical Gardens Cafe and turn it into 5 star restaurant and bar and music space	3	3

Social and Community Wellbeing	Support communities to grow their own food, from schools to age care homes. Make council land available for allotments and orchards. Build local composting facilities to replenish local soils. Support community food growing networks and initiatives, including cooking and preserving local produce. Set aside land to be rewilded to provide for biodiversity, for insects and pollinators and water capture.	3	0
Pools, Parks, Gardens and Sporting Facilities	The lack of Physio Pool is being felt by so many throughout Dunedin. We need this pool and certainly for the size that Dunedin is another pool is required - Mosgiel pool is wonderful but along with Moana is not sufficient for all year round swimming - St Clair Hot Salt Water Pool assists with numbers throughout summer, but having a winter space available, catering for those with access difficulties (physical or social) is vital. Our school children and disabled community need this warm pool back.	3	0
Roads, Water and Waste Services	COLLABORATION:  Collaboration between different departments and agencies to ensure that infrastructure changes take the safety of all road users into account.  Collaborate with user groups to ensure traffic safety improvements are relevant and installed correctly (e.g. accessible call buttons)	3	1
Social and Community Wellbeing	SOCIAL CAPITAL: We support the idea of development and improvement of facilities which foster community connections such as South Dunedin Library and Community Complex and existing project to upgrade the George Street. We would like to see DCC adopt its Future Development Strategy to build 'well-functioning urban environments' while designing the built environment.	3	1
Social and Community Wellbeing	SOCIAL CAPITAL: We support the policy, activities and projects which positively contribute to the social capital. The existing LTP 2-21-31 has outlined "connected people: making people feel connected and involved in community and city affairs" and Vibrant and "cohesive communities: building better communities both at a local/geographic level and communities of interest" as key community outcome priorities. We recommend to continue to give priority to this and complete the existing projects.	3	1
Pools, Parks, Gardens and Sporting Facilities	ACCESSIBILITY: We would like to see more emphasis on accessibility to all in park and reserve plans and policies. The council can use the PARC's evaluation tool to ensure accessibility when considering upgrading facilities.	3	0
Pools, Parks, Gardens and Sporting Facilities	SMOKEFREE/VAPEFREE MESSAGING. We recommend displaying smokefree signs around the council parks and reserves to protect people from exposure to tobacco smoke. This should also include vapefee messaging.	3	0

Libraries, Arts and Culture	More community spaces in library, like areas where the public can have their lunch, more free activities and groups for adults to get to know each other.	3	0
Roads, Water and Waste Services	Making the roads more bicycle friendly would be the first most obvious thing to tackle. In addition, encouraging the use of public transport seems imperative at this stage in time. Especially encouraging young people by making public transport cheaper in association to student cards would be an idea.	3	1
Roads, Water and Waste Services	Connect Dunedin City to the wider cycling network, with priority for connection to Mosgiel though the tunnels.	3	2
Social and Community Wellbeing	Advertising a private organisation is an abuse of the wall. If the author is associated with the org this follows aiming for advantage over other funding requests by making a LTP pitch in Council public time last Monday. That was led by a Cr who was voted *out* last year, but knows better. Multiple abuses of process warrants punishment: Remove this advertisement, deny the org and people further chances to present in this LTP process, and require strict compliance with due process in the future.	3	0
Economic Wellbeing	Who pays is the true question? do rate payers ?? Bus patronage outside key times is negligible. Would we all be happy to add another \$250 to our rates bill???	2	1
Environment and Sustainability	Totally agree. There are far more population out Taieri way than in Port Chalmers, and this would be serving everyone from Green Island out. Tunnels cycleway, and a separated cycleway to Ocean View, meeting at Green Island. Would be amazing!	2	1
Libraries, Arts and Culture	I agree that we need open up the Dunedin waterfront for hotels bars and restaurants	2	0
Social and Community Wellbeing	it is about time the Aramoana road is fixed properly. Some areas of the wall are below sea level, the gravel is loose and gets washed all over the road after a storm. The council just sweep it back off the road and never fix it properly. The wall needs fixing.	2	0
Pools, Parks, Gardens and Sporting Facilities	A facility like this would be a huge asset for Dunedin. Skateboarders/bladers/scooters historically have been placed under this outcast stereotype. Hoods and baggy pants, graffiti and roaming the streets. This has long changed, we have skateboarders in the Olympics now, massive contracts for those who succeed and huge followings around the world. To get to this level, world class facilities are a must thus creating opportunities for our youth (young and old) to get there.	2	0
Roads, Water and Waste Services	Grit the roads before the snow not 10hrs after the fact.	2	0
Roads, Water and Waste Services	can cosy dell road be resident only and pedestrian/cyclists? there is plenty of roads around to go up and this one is a slower slope, and not really wide for cars to cross.	2	0
Social and Community Wellbeing	same with st clair erosion, maybe providing a wetland somewhere for having the water flowing in instead of bouncing back taking the sand out	2	0

Social and Community Wellbeing	middlesmarch has one of the most complete rural railway precinct in new Zealand by allowing project steam to continue setting up a community based railway operation this will drive further benefits for the town and wider strath taieri. thus providing another visitor attraction for the area.	2	0
Pools, Parks, Gardens and Sporting Facilities	I fully support the proposed new gymnastics facility at the park above the Southern Motorway in Caversham near Barnes Drive. I think that it would be a good use of that land and provide a community space, particularly if the Caversham Tunnel cycle track happens and a good back up facility in a natural disaster.	2	4
Economic Wellbeing	I believe a city is primarily for its residents and what is good & excites the people will attract others. People go to Europe for its history, culture & unique environment none of which were created for tourists. So what is special about Dunedin ... it's heritage buildings & it's natural environment. Let's create wonderful places using these assets that the citizens love ... the word will get out ...no need for a marketing plan?!	2	0
Pools, Parks, Gardens and Sporting Facilities	When was it decided that area would be used for a gymnastics facility? That is a significant change in purpose and the loss of yet another Caversham greenspace that have a significant impact on the community - which has not been informed, let alone consulted. That leaves aside yet another facility based on treating Caversham as a service centre for the rest of Dunedin, with no respect for the impact on the community that actually lives there.	2	1
Pools, Parks, Gardens and Sporting Facilities	Ensure all dog parks are fully enclosed. The big dog area at green island is not, and is very close to the motorway. More people would use it if it was fully fenced.	2	0
Pools, Parks, Gardens and Sporting Facilities	DCC currently funds pools for community use. Unfortunately, these pools do not meet the requirements of people needing the depth and warmth of a therapeutic pool. I would support my rates being used to ensure that our city has such a facility.	2	0
Pools, Parks, Gardens and Sporting Facilities	Please support Dunedin Gymnastics Academy proposal for a purpose built gymnastics facility. The club has over 700 registered members & around 2000 casual users each year. The facility could cater for other sports - martial arts, training in diving & aerial snow sports, as well as catering for community groups. Currently our young athletes train in freezing, flood prone old warehouses, yet hold their heads up high winning national titles and competing at international competitions.	2	0
Roads, Water and Waste Services	We must have public transport in terms of a fast train out to Dunedin airport and to the city	2	0
Economic Wellbeing	I agree	2	0

Pools, Parks, Gardens and Sporting Facilities	Dunedin had numerous school pools which were available usually with a key system to local adults. Regulations + costs + earthquake panic made them unaffordable for the school and local community to keep open. If "reduce car use" means anything, shouldn't we have facilities that are available more than once in a blue moon, to many families? Please concentrate on small simple pools scattered around the city so exercise and competence in the water are available to all.	2	0
Pools, Parks, Gardens and Sporting Facilities	Table tennis is a low cost, accessible sport that anyone can play and enjoy, whatever your level.  Dunedin lacks a dedicated table tennis venue and this is much needed by the community and to host events.	2	0
Roads, Water and Waste Services	SPEED LIMITS. Extend permanent 30km zones to all suburban residential streets/roads and reduce speed limits for other roads as proposed in the draft speed management plan.	2	1
Roads, Water and Waste Services	PARKING: Encourage a public 'park and walk' or 'walkable parking' environment by developing car parking spaces on the edge of the central city.	2	1
Social and Community Wellbeing	ACCESSIBILITY: We recommend to incorporate universal design principles in all structures and spaces in the built environment to make accessible to all, regardless of age, ability or any other demographic. A more accessible built environment will benefit everyone, not just people with disabilities, but also older people, those with young children, and people with temporary mobility issues. BRANZ research has shown that it is considerably cheaper to build Universal Design into new builds.	2	1
Social and Community Wellbeing	SOCIAL CAPITAL: The built environment plays a crucial role in fostering social cohesion within communities by creating spaces that encourage social interaction and a sense of belonging. Design elements such as public spaces, walkability, and connectivity can enhance community cohesion and promote a strong sense of community. Research shows that a strong relationship between social capital and the built environment, specifically between social cohesion and access to destinations/walkability.	2	0
Social and Community Wellbeing	We know that the council has been working on its strategic refresh, which includes City Portrait, Māori Strategic Framework and four well-being strategies. NPHS—Southern welcomes the opportunities to engage and support DCC in finalising the City Portrait Strategy/framework and commitment to Te Tiriri o Waitangi work. As the Strategic Refresh work informs the LTP process, we recommend these strategic workstreams and the LTP process incorporate the aspects which promote social capital and cohesion	2	0

Social and Community Wellbeing	66% of Dunedin residents considered racism or discrimination as a problem in the city. "Dunedin's youth are far more likely to experience mental health issues and feeling isolated" Only 66% of Dunedin residents can participate, perform or attend activities or groups that align with their culture. We advocate for more investment in and support for projects that aim to foster social and mental wellbeing, for instance through enhancing social inclusion and countering racism and discrimination.	2	0
Pools, Parks, Gardens and Sporting Facilities	SEATING: Is important because it gives people a place to rest and socialise and where possible, it should be accessible to all. Seating spaces need to have a plain design and be easily recognised as chairs to help those people with sight impairments and dementia. Public benches need to include a centre handrail so that people can easily get in and out of seats.	2	0
Pools, Parks, Gardens and Sporting Facilities	SHADE: We encourage shelter and shade in parks and reserves by increasing number of structures and suitable trees that will alleviate the effects of extreme heat.	2	1
Pools, Parks, Gardens and Sporting Facilities	SAFETY OF USERS: we would encourage the DCC to use the Crime Prevention through Environmental Design guidelines when considering improvement in parks and reserves.	2	0
Pools, Parks, Gardens and Sporting Facilities	The greenspace provides a critical break in a high density built area. It is well used by the community for many activities: Yesterday children were playing soccer. They also "deserve" space for "movement" activities. The difference is they don't expect rate-payers to fund a building to prevent every other child and the rest of the community from using the space. Or expect important greenspace to be destroyed so they can. The proposal is greedy, selfish and destructive.	2	0
Roads, Water and Waste Services	I agree with all of what the previous person has said. I especially would like to see the areas that are still not done so that the whole road can be so much safer that it was originally. With so many tourists and tour buses back on the road, this is even more urgent, for everyone's safety. Please finish the job that you started.	1	0
Roads, Water and Waste Services	The UV filter at the water treatment plant needs to be turned on rather than relying purely on chemicals.	1	0
Pools, Parks, Gardens and Sporting Facilities	Can we please open up the Dunedin waterfront to create more hotels bars and restaurants	1	0
Pools, Parks, Gardens and Sporting Facilities	and pedestrianised	1	0
Environment and Sustainability	If we want to make a difference here, get on with buses! Rail will take to long to be useful.	1	0
Environment and Sustainability	Support links to Outram and Waiholā too :)	1	1

Environment and Sustainability	YES!! Our city has been doing amazing with how well our buses have been run recently. Would love to totally ditch my car and use public transport and bikes. I would do this if there was an increased frequency of buses and a train service between here and neighbouring cities like chch or invers	1	0
Pools, Parks, Gardens and Sporting Facilities	What a wonderful idea for using more of the town belt and introducing more people to it! It's such a neglected treasure.	1	0
Pools, Parks, Gardens and Sporting Facilities	Indoor skatepark would be great for our city.	1	0
Environment and Sustainability	Actually, with proper restructuring of the Taieri Gorge Railway, the 20000 or so cruise ship passengers who would patronise the train may in fact subsidise cheaper tickets for locals, or pay for the annual track formation upgrade.	1	0
Roads, Water and Waste Services	Not only for aggressive dogs but for owners who want to exercise their dogs safely and in peace. A long straight track instead of square paddock would be great for dogs to run in. This could be booked for a small charge.	1	0
Roads, Water and Waste Services	It would be good to see put in the 10 year plan the supply of reticulated water to the Allanton community. The community has grown since reticulated sewage was installed as this has allowed large 2000sq meter sections, which were required for the septic tank system, to be subdivided into smaller sections as per the district plan allowing more housing. Please also see my comments in the survey	1	0
Pools, Parks, Gardens and Sporting Facilities	Local well- designed, creative playgrounds are such exciting places having lived in Sydney until recently. The plyinggrounds created in the past 10 years capitalise on the lie of the land...with amazing tunnel slides sweeping down a hill , a network of rope climbing to get back up the hill. They offer a more natural experience with logs...stepping stones ... bush etc Ive watched how kids play in them ... they find sticks to make pretend fires ...make cubbie houses etc Far more interesting than just	1	0
Roads, Water and Waste Services	Finally Dunedin city is becoming a place for people!! with spaces you want to be in! Trees!!! Plants!!! in preference to car parks ...what a difference it makes ...so simple, so easy to do. We need to plant out all our streets and make special, sheltered desirable spaces using plants with seats, art work ... for people to be in...along with interconnecting bike & pedestrian paths. Community orchards, community kitchens, collaborative making/creating spaces Oh what a place to live!	1	0

Social and Community Wellbeing	As evidenced in other cities around the world the greatest demand for housing is from singles ... young, old, divorced, disabled so we need small houses clustered around a community garden & meeting/activity facility to prevent loneliness..another huge problem.	1	0
Environment and Sustainability	Cease using glysohates in popular dog areas, and *especially* designated dog parks: There are known connections to canine cancer, and dog owners pay for dog parks and upkeep: It is not acceptable to force them to pay for spraying a poison known to harm dogs and kill other important fauna.	1	0
Pools, Parks, Gardens and Sporting Facilities	I am in support of the table tennis posts. It has been a great find for my teen, fabulous sport that is interactive across all the ages, teaches respect and is a skill based (rather than strength based) leveller. Any aid the council can extend the club regarding facilities would be appreciated and well used by this very well managed and organised club.	1	0
Pools, Parks, Gardens and Sporting Facilities	Yes absolutely i agree	1	0
Pools, Parks, Gardens and Sporting Facilities	Table tennis is one of the few games that a person in a wheelchair or other mobility related disability can play against able bodied players. It was one of the first games that was introduced to spinal cord patients when the paraplegic games first started in the late 1930's in the UK. As the tables cannot be left in place it means that a disabled player is reliant on someone else setting the tables up if they cannot physically do so. A dedicated space would be welcomed.	1	0
Economic Wellbeing	A thriving city and region will be based around sound economic development. Thriving businesses will employ more people, bring new business and profit into the city and create an attractive place for investors. The main areas of economic activity in the city that generate income are education, data and digital technology and medicine/health related clusters. A considered 'portfolio approach' that enables recognition and investment in these areas will have a long-term benefit for the city.	1	1
Roads, Water and Waste Services	Public education to use less water and have much shorter showers	1	0
Economic Wellbeing	Dunedin must create a tech sector plan for the city to prepare for artificial intelligence going forward in to the next 10 years	1	0

Social and Community Wellbeing	EQUITY: Equity is another cross-cutting theme to consider and embed across the LTP strategies and activities. The Interim Government Policy Statement on Health 2022-24 names the following as priority populations for improving wellbeing: Pasifika, People with a disability,LGBTQI+ ,Asian ,Refugee/ migrant , Rural , People with addiction and/ or mental health challenges. NPHS—Southern recommends to these additional groups are identified as priorities for reducing inequality/improving wellbeing.	1	0
Environment and Sustainability	Get rid of CATS in the peninsula, for good. The peninsula should be declared a national park and be protected. it's a unique place and would seriously attract so much diverse profiles of tourists. Biodiversity is the biggest assets this unique place has and the cats are contributing towards diminishing it.	1	2
Environment and Sustainability	Ōtokia Creek and Marsh Habitat Trust: We have planted over 16,000 natives in the Ōtokia Marsh over the last three years involving the community, volunteer groups and school. We have received different funding grants over the years but what we need is more consistent financial support for regular maintenance of plants, nursery work and water monitoring. We will be making a submission to the DCC long term plan and hope the DCC is able to support us and other restoration community groups. Thank you	1	0
Pools, Parks, Gardens and Sporting Facilities	Table tennis can enhance attention span, mental alertness in most people and aid with memory retention which can help prevent cognitive decline and dementia. Unlike several other sports, table tennis can be played throughout our whole life into very old age. Dunedin needs a permanent set up table tennis hall/stadium so that we can play whenever we want as the current setting at the Edgar Centre does not work. We are also being squeezed by larger sports in terms of securing space to train/play.	1	0
Environment and Sustainability	I'm a delegate for DarkSky.org (the International Dark Skies Association) and the leader of the Dunedin Dark Skies Group. I strongly support the Coastal Communities Cycle Connection because it links the special communities that were fortunate enough to have 2200 K LED streetlights installed, in order to protect local wildlife and the night sky. Imagine a Constellation Cycleway! Perhaps the first of its kind! This would add another really wonderful facet to the many benefits this project will pro	1	0
Roads, Water and Waste Services	Cycling infrastructure is such a vital part of community accessibility, access, and health provision. I fully support the Coastal Communities Cycle Connection.	1	0
Roads, Water and Waste Services	I support the coastal communities cycle connection because it will give our communities choice in how we stay connected and better our overall well-being and enjoyment of our area	1	0
Roads, Water and Waste Services	I support the Coastal Communities Cycle Connection project because I would like to be able to walk and ride safely between our northern city communities.	1	0
Roads, Water and Waste Services	I support the coastal communities Cycle Connection, so that we can bike between amenities in our villages and reduce reliance on cars	1	0

Roads, Water and Waste Services	I support the Coastal Communities Cycle Connection project because I would like to be able to walk and ride safely between Warrington and Waitati where I work.	1	0
Roads, Water and Waste Services	As a local who loves to bike, I support having a safe option to visit my friends in Warrington without risking injury by cycling next to the highway without protection.	1	0
Roads, Water and Waste Services	I support the cycle way because I work and live in the area. I would love for my son and I to bike to school each day and also be able to walk/run the route without being scared of traffic getting to close or speeding past me. It will also bring new people the the coast who want to explore this part without getting in a car. It needs to be done for the future of the coast. We are just getting bigger and more populated so why not invest now!	1	0
Social and Community Wellbeing	I support the Coastal Communities Cycle Connection because these trails enable older people (like me) to get out and enjoy life again. All the trails are great for people and communities	1	0
Roads, Water and Waste Services	It is important to have a cycle way for safety between Waitati and Warrington. I totally support this project	1	0
Roads, Water and Waste Services	I support the Coastal Communities Cycle Connection project because I would like to be able to walk and ride safely between our communities with my family.	1	0
Roads, Water and Waste Services	I support the Coastal Communities Cycle Connection project because it will provide a very much-needed safe way to walk or cycle between our scattered communities north of Dunedin, and particularly between Waitati and Warrington where the only way at present is along dangerous State Highway One. It will be valuable for accessibility, exercise and health for all our communities and will also be an attraction for people from elsewhere.	1	0
Roads, Water and Waste Services	I support the CCCC so that our coastal communities can actually be connected for those of us who prefer to be car-free. At present it is absurd that Karitane and Waikouaiti are so close and yet to cycle or walk there it is a very long hike around the back roads to be avoid State Highway 1 to get there safely. Residents in Waitati and Warrington must feel the same way too.	1	0
Roads, Water and Waste Services	I fully support a bike trail via port chalmers and the sea cliff coastline to Waikouaiti.	1	0
Roads, Water and Waste Services	If there was a cycleway from Waikouaiti going through karitane to waitati the kids would love to be able to bike to school again	1	0
Economic Wellbeing	As Warrington crib owners we would love safe cycling options connecting our communities - we currently drive to Dunedin to cycle the Portobello and Pt Chalmers trails. When doing cycle trails around the country we always spend money at cafes on the trails.	1	0

Roads, Water and Waste Services	We'd love a safe bike route for the kids between Warrington and Waitati, Karitane, and Waikouaiti. It would be fantastic for visiting friends and exercise I think it would be a real asset for the community and attract visitors to the area as well.	1	0
Roads, Water and Waste Services	We live in Karitane and would love to be able to cycle to Waikouaiti safely, away from the SH1 and the noise.	1	0
Roads, Water and Waste Services	As a keen cyclist who although I live in Canterbury, I regularly use the existing cycle infrastructure (e.g A2O, Central Otago Rail Trail etc.) I believe the Northern Cycleway link will be a great stepping stone for the potential link between Oamaru and Dunedin which will in turn connect these other great cycle trails and greatly benefit the local communities that these cycle trails pass through, both economically and in the form of health and well-being.	1	0
Roads, Water and Waste Services	I strongly support the coastal communities Cycle connection project because I used to cycle from Warrington to Waitati and back but falling objects from fast moving trucks along SH1 put an end to that. With out a car and with very limited public transport, for some people cycling is their main transportation. would be excellent to do so with out fear of injury from fast moving motor vehicles.	1	0
Roads, Water and Waste Services	Currently, there are hardly any safe cycling options around the Northern Dunedin area. State Highway One and the Coast road are both lethal. A coastal cycle way would be brilliant. It would connect the communities and encourage exercise. I'm a huge supporter of the proposal.	1	0
Economic Wellbeing	I support the costal community cycle connection project as I would like to be able to get from town to town by walking or biking, I also welcome the tourism opportunities	1	0
Roads, Water and Waste Services	I support coastal communities cycle connection project because safer cycling/walking in a more pleasant environment than roads is good for everyone	1	0
Roads, Water and Waste Services	I support the coastal communities cycle connection because currently there is no safe way for cyclists or pedestrians to journey between the North coast townships. A cycle way would be a really great contribution towards Vision Zero to eliminate all traffic fatalities and severe injuries, while increasing safe, healthy, equitable mobility for all	1	0
Roads, Water and Waste Services	I support a cycleway between Waitati and Evensdale and Warrington because it would much improve the quality of life for the residents of Blueskin Bay. I support Coastal Communities Cycle Connection because their goals align with mine.	1	0
Roads, Water and Waste Services	I support a track from Waitati to Warrington because it would link the community and provide much needed cyclistways for kids.	1	0
Roads, Water and Waste Services	We support the coastal Communities Cycle Connection because it will make it easier to bike / walk between our communities.	1	0
Roads, Water and Waste Services	I strongly support the Coastal Communities Cycle Connection project because I would like to be able to walk and ride safely between our communities with my family.	1	0

Roads, Water and Waste Services	I support the proposed cycle connection between Waikouaiti and Karitane. I am one of many local “ mature “ retired people living in these two places who enjoy walking and cycling in our attractive neighbourhood. We would all use and appreciate a safe way of walking and cycling connecting our villages off the busy main road.	1	0
Economic Wellbeing	I support the Coastal Communities Cycle Connection project because I believe it would be a great community asset and would increase accessibility between our communities I also believe that it would make our coast a more attractive destination for tourism	1	0
Roads, Water and Waste Services	So many good reasons to support the Northern Cycleway idea that can't really understand why anyone wouldn't... climate change .. getting out of cars and exercising... enjoying our wonderful environment... another good reason for folk to visit our areas and support local business... can't think of one negative really.... please can we just get on and do this !	1	0
Roads, Water and Waste Services	The Northern Cycleway seems like an excellent project offering connexions to a number of communities that don't involve cars. I think it should be supported and look forward to seeing the resources needed being made available to it.	1	0
Economic Wellbeing	I fully support the Coastal Communities Cycle Connection project because I would like to be able to walk and ride safely between our communities. Safe riding and walking/running for our kids but also for our parents and anybody who uses the trail. Business opportunities for accommodation providers, food providers, shuttle and transport providers, bike shops and services.... Letting the world see our amazing coastal scenery.	1	0
Roads, Water and Waste Services	I support the coastal communities cycle connection because I cycle regularly from Warrington and would love to be able to ride off road. In particular the road to Waitati feels increasingly unsafe to ride on. As the number of cars/trucks have increased I no longer let my daughter bike over to work at Waitati. Also biking on safe, fairly flat, off road trails in the area would be a great way to rehabilitate after injury.	1	0
Roads, Water and Waste Services	I dream of cycling to town without the terror of the trucks on the motorway between Warrington and Waitati.	1	0
Roads, Water and Waste Services	I fully support the Northern Cycleway. Having cycled this route as part of a longer cycle tour it would have been much less stressful to have a trail that avoided the busy roads, especially SH1. The road around Seacliff is very pretty, with the Truby King Reserve making a great stop. Karitane and Waikouaiti would be great destinations for day rides. Would be really good if you could catch a train back to Dunedin.	1	0
Roads, Water and Waste Services	I support the coastal communities cycle trail because there are too few cycle trails that connect up in the Dunedin area - it's very limiting for cyclists without either fighting for a place on the road or, the somewhat absurd, driving in a car to go cycling!	1	0

Roads, Water and Waste Services	I totally support the Northern Cycleway project and welcome the opportunity to walk or cycle safely between communities. It will be a huge asset for boosting wellbeing, fitness and connection along the coast.	1	0
Roads, Water and Waste Services	We support the Coastal Communities Cycle Connection because at the moment we drive everywhere and cycling would be better for our health and the environment	1	0
Roads, Water and Waste Services	Please prioritise the 'Northern Cycleway'. I want to be able to bike or walk with my family from Waikouaiti to visit friends in Karitane, instead of driving the short distance. It would also help our accommodation business to have more people making Waikouaiti a destination. Please allocate the Council contribution "local share" through the 10 Year Plan process so that the project can receive funding from the NLTF.	1	0
Libraries, Arts and Culture	I think it's important that the Waikouaiti library and service centre is accessible by walking or cycling from Karitane, rather than using a car. Blueskin library should also be accessible by all residents of Blueskin Bay by walking or cycling there - including Warrington residents. Please prioritise the 'Northern Cycleway'. Please allocate the Council contribution "local share" through the 10 Year Plan process so that the project can receive funding from the NLTF.	1	0
Economic Wellbeing	There is nothing of interest in either location, it could be turned into apartments maybe?	0	0
Social and Community Wellbeing	I completely agree, more wheelchair friendly housing. Invest in your disabled community studying in university or polytechnic, give us incentives to look for jobs in Dunedin and stay here.	0	0
Libraries, Arts and Culture	100%	0	0
Pools, Parks, Gardens and Sporting Facilities	There are facilities in the stadium that could cater for this. Why have the stadium sitting empty and not use the facilities we have already paid for in our rates. It is not far to walk from Logan park.	0	0
Economic Wellbeing	Very true! I would love more investment into making public transport easier to use for everyone. Free buses might increase the number of people using buses. This would also be great for people who like driving as it means they will experience less traffic.	0	0
Roads, Water and Waste Services	Cycle/walkway linking Green Island to Brighton-Taieri Mouth then over to connect to Waihola creating a cycle/walking trail "sea to plains" round loop that links on to Mosgiel-Dunedin or on into Central Otago. Attracting tourists to Dunedin to use all the cycle/walking trails, similar to the Central Otago concept where cycle trails now generating more local revenue than the ski industry.	0	0

Roads, Water and Waste Services	The SH1 pedestrian crossing at the Events Centre and Health Centre is really dangerous, especially for the elderly and those with limited vision and/or limited mobility, and people with young children. At a minimum the crossing needs to be re-aligned, better signposted and the island 'safe' zone enlarged. Hand rails would help as raised concrete kerosene are a tripping hazard.	0	0
Pools, Parks, Gardens and Sporting Facilities	Totally with you on this! I was very lucky to have moved to Mosgiel just as the new pool opened. It is a truly wonderful resource and cannot express my pleasure at using this pool enough. I was in Dunedin a few weeks ago and had a few hours between appts so went to Moana for my daily exercise. I was shocked how grubby and grimy the family/disability change rooms have become. It was dark, dingy and very unpleasant! So disappointed and hope that in the meantime it will get a thorough clean!!	0	0
Pools, Parks, Gardens and Sporting Facilities	Interesting observation. What are the purposes they are not fit for?	0	0
Pools, Parks, Gardens and Sporting Facilities	To be fair the council does provide an annual maintenance grant to MTB Otago, which enables the club to support a track maintenance person (who does a fantastic job), as well as pay for some track upgrades and development. It would be great to see a cohesive track and cycle path strategy developed, and a planting budget established to assist with regenerating native vegetation around tracks and trail heads. The gorse on Signal Hill is a fire hazard (heli-spraying should have been done ages ago)	0	0
Pools, Parks, Gardens and Sporting Facilities	Moana is also completely lacking in disability access. I can't take my kids there as I meet access barriers constantly. It was build in a time where no one cared about disability access and little has been done to improve that. The lift opens into such a tight space that a wheelchair user has to go three sides of a large square to get to the change rooms. I don't want to have to book a hoist so I can go swimming. These services should be available at all hours.	0	0
Roads, Water and Waste Services	This is being applied and is in the plans already. This should be done on a community/ local level though, instead of the planned big scale site. This would avoid ALOT of pollution and costs due to necessary transport.	0	0
Roads, Water and Waste Services	the grit should also be removed after as very hazardous when you run into a bunch while biking. maybe salt some road as the regent road (btw the new grit there is a disaster)	0	0
Environment and Sustainability	I don't think that will work that way as people would just throw out their waste in the neighbour's bin...	0	0
Environment and Sustainability	maybe providing a way to have a sterilized jars business or take away cups and bowls that can be reused...	0	0

Social and Community Wellbeing	a lot of people walk to these area, and even walk in the streets with dogs, on the beach, everywhere. If you are not a fan of dogs, I think it is nice to have somewhere that you can enjoy without the fear (I have many friends like that sadly..)	0	10
Economic Wellbeing	This asset needs to be retained for future generation, the line needs to be retained though to middlemarch, where a heritage park could be operated by Project Steam. What a great family trip this would be. Keep Dunedin Railways Going To Middlemarch.	0	0
Pools, Parks, Gardens and Sporting Facilities	I'd rather see lots off off road cycle paths all over Mosgiel, Taieri etc ... an integrated network ... with native plants along side and beautiful natural sheltered areas for picnics ... forget BIG & organised ...small, local , casual . Much less costly ..get people outside, active, in nature so we appreciate how vital the natural environment is to our survival.	0	0
Social and Community Wellbeing	Dunedin is one of the most incredible mini cities in the world or it could be with some dynamic thinking. It has beautiful heritage architecture, if only it were restored then used for creative, community & cultural purposes that enticed people in to participate. Next are its incredible natural resources; it's harbour which we turn our back on!!! as mentioned above, beaches & north & south coastlines. How about a bike path to Taieri Mouth ...stunning & gently undulating country, then BlueSkin Ba	0	0
Environment and Sustainability	Off road bike paths that are 'beautified' with natural plantings will encourage greater use of bicycles ... a trend that is happening in the worlds most liveable most cities. A path that goes from the city to Brighton and then on to Taieri Mouth would be an asset that citizens present & well into the future will appreciate! It would also add to the network of paths in Otago that entice more & more people to this stunning region.	0	0
Roads, Water and Waste Services	And an off road bike path down the south coast ...linking all those communities ... Green Island, Waldronville, Westwood, & on to Taieri Mouth. This is the most stunning coast line for all Dunedin citizens to enjoy, if we could bike it safely.	0	0
Social and Community Wellbeing	Please develop a plan for a south coast off road cycle way...Dunedin to Taieri Mouth ...the gently undulating terrain & the beauty of this coast make it a must do! What an asset well into the future!	0	0

Social and Community Wellbeing	I think social well-being is strongly correlated with connection to your local community... that you can get involved in meaningful, purposeful activities, that your voice counts, that your contribution is appreciated. How well are our communities providing this? I'd like to see spaces for locals to imagine the future they want ...to create ...to collaborate ...to help each other. Look at what this community has done! <a href="https://www.commonunityproject.org.nz/">https://www.commonunityproject.org.nz/</a>	0	0
Libraries, Arts and Culture	As experienced in other cities, libraries are reinventing themselves to become real hubs for their local communities and stay open in the evenings as well. They offer classes in areas of interest (eg how to compost, to create a no-dig garden, local history, authors talks, discussions on the current Booker Prize potentials etc) as well as in practical things like computer programming etc. They have creative spaces ... for art, 3D printing etc & sessions for pre-schoolers They are dynamic spaces.	0	0
Libraries, Arts and Culture	I would love the city library to open st 8.0am, There are always people waiting. A wasted resource when shut.	0	0
Roads, Water and Waste Services	I agree! Just look at what recently happened with waste water going into the harbour in Auckland. We really need to ensure our water system is up-to-date and resilient.	0	0
Pools, Parks, Gardens and Sporting Facilities	Yes support this and gettign rid of cars in much of the town belt.. Many roads in the Town Belt are unsafe at speed and should bre closed	0	0
Economic Wellbeing	I want the Taieri Gorge Train to stay and not be turned into a cycle way	0	0
Pools, Parks, Gardens and Sporting Facilities	I agree	0	0
Pools, Parks, Gardens and Sporting Facilities	Have all the table tennis players been told in their own group to make a post about a dedicated facility for their own use? They need to do what other sports have to do and do some fundraising and apply for grants. I would object to my rates being used to provide a dedicated table tennis facility when there are many halls around the city that could already be used. They say setting up and packing down means the Edgar Centre is unsuitable but that's what all sports have to do.	0	1
Roads, Water and Waste Services	Excellent idea	0	0
Social and Community Wellbeing	Nothing sad that not everyone likes dogs or fear them, there are plenty of reasons for that, they are menacing beasts and should not be forced on others. The number of dog attacks is escalating. Lets keep some areas free of them and their by products.	0	8

Pools, Parks, Gardens and Sporting Facilities	A large space that is also fenced so dogs can explore but are also kept within a boundary. Example for size, Forrester Park dog park and it's surrounds. A place that is just for dogs and their owners without the worry of dog-wary cyclists, joggers and walkers.	0	10
Pools, Parks, Gardens and Sporting Facilities	Lots of table tennis people putting up submissions on here - more than enough to get together and plan me fund your own facility like the majority of other sports clubs do - rugby, football, bowling, rowing, hockey, cricket. Get your plan together and start raising the money instead of asking for 100% handout!	0	0
Pools, Parks, Gardens and Sporting Facilities	As the first comment stated - the gymnastics facility is proposed - nothing had been decided. Gymnastics is a fundamental movement sport which provides kids with the basic skills that can assist them in every other sport. In Dunedin we have no purpose built facility - the only city in NZ that doesn't. The largest club - Dunedin Gymnastics Academy- is the 2nd largest sports club in Otago, the 5th largest Gymnastics club in NZ . Our children deserve a decent facility to train in.	0	2
Economic Wellbeing	Dunedin needs to become the financial capital and the tech capital of new Zealand And invite some of the top companies in the world here for jobs and grow	0	0
Pools, Parks, Gardens and Sporting Facilities	Instead of concentrating on very super playgrounds that are great treat destinations or in practical terms inaccessible for many families, develop more humble playgrounds around the city within walking distance so more children can use them more often, get to know the kids in their 'hood, while parents make friends too, This kind of thing strengthens communities and prevents loneliness. Seats for adults are necessary too. Similar with swimming pools.	0	0
Pools, Parks, Gardens and Sporting Facilities	I support the idea of Council supporting the way forward for the Physio Pool to reopen or for the building of a replacement hydrotherapy pool. Although used by Dunedin Hospital and Physios for patients recovering from surgery and injury the Physio Pool has for a long time been a community swimming pool open to the public. Because of its warm water, tranquility and accessibility many users of the Physio Pool would not go to another swimming pool in Dunedin. Reopen it or replace it.	0	0
Pools, Parks, Gardens and Sporting Facilities	This is about suitable spaces for controlled dogs. People who fail to train and control their dog should not taint valid requests with demands for more fenced areas. I have no adjectives for owners who expect expensive fencing so they can shove their dog inside and leave it to run around *exploring* an area the size of the whole Forrester Park. But it is nothing to do with providing law-abiding owners with their legal entitlement.	0	0
Pools, Parks, Gardens and Sporting Facilities	Look out for the Physio Pool survey starting Monday, 6 November 2023. You can have your say on the future of a hydrotherapy pool in Dunedin!	0	0

Roads, Water and Waste Services	Would love to see this, opening up the tunnels. More bikes, less cars, more walking, more open public green spaces.	0	0
Environment and Sustainability	busnisses need to do more to limit their impact they leave and levies should be to be in place to clean up roads; students areas come to mind - it's horrendous and makes a joke of the city - the student attitude in about 20 years out of date and hgas to stop.  Too much glass all over Dunedin's roads and path and cycleways.	0	1
Environment and Sustainability	People aging like me need more public toilets and greater provision in shops etc. The Strip Mall is an example of a toilet free zone. And the super markets need to make more than minimal provision. The new petrol stations with out staff have removed many useful toilets.	0	0
Pools, Parks, Gardens and Sporting Facilities	I would like to make sure that the development of trails suitable for horse-riding, whether via mixed use with walkers +/- bikers or solely for horses is included in the tracks plan for 2023 and 2024 please.	0	0
Pools, Parks, Gardens and Sporting Facilities	Horsriding is a healthy outdoor activity for everyone including kids, and particularly teenagers. It is an activity where participation is predominantly young and teenage women and encourages strength, commitment, animal care and group participation/teamwork. As an activity it promotes mental and physical health and doesnt require a screen or fossil fuels.	0	0
Economic Wellbeing	Please limit the number of cruise ships coming to Dunedin-this type of tourism is in the past as it is completely inappropriate for a zero carbon world. Appropriate tourism would be developing more cycle tracks, down the beautiful coast south of Dunedin, in the Caitlin's etc Providing authentic experiences of NZ ... meeting locals, our beautiful geography, sampling good quality locally grown produce, artisan products.	0	1
Social and Community Wellbeing	Get Dunedin Railways up and running as it was with more heritage flavour added, right through to Pukerangi and Middlemarch, with the marvellous pact from Otago Excursion Train Trust, having Glenbrook Vintage Railway involved, and using theirs plus experienced staff that were laid off from 2020. This became a world famous asset and brought in visitors 365 days a year, paying dividends to the local economy, and could do so again with investment.	0	0

Libraries, Arts and Culture	<p>Heritage focus: Policies + Adaptive reuse of buildings / materials (storage for reuse)  Policy / guidelines strengthened / D Plan /public notification /consent process  Support for collaboration, community + Council - to develop multi- disciplinary plans &amp; projects</p> <p>Gasworks Museum development: community asset / \$ support/ adjacent property/ + historic Braemar St Cottage / restoration  - S Dn cultural/social history project - integrate stories of industrial S Dn + Hillside + Ropewalk / etc</p>	0	0
Libraries, Arts and Culture	<p>Dunedin, NZ Heritage capital - Protect city's unique character  Heritage Plan/Strategy update/ + \$ DCC H Advisors  - holistic approach - across Council strategies / collaboration depts &amp; community - eg. Urban Design/  Environment issues, green space /Heritage Precincts / preserve streetscapes/ transport options / speed limits/ parking = liveable city  - PR/Marketing heritage city  - Support annual Heritage Festival + \$ / admin sharing / DCC &amp; community collaboration</p> <p>Trustee Southern Heritage Trust</p>	0	0
Roads, Water and Waste Services	<p>I fully support having a combined walking and cycling pathway between our local communities. I love to walk and cycle around our beautiful neighbourhood. I see many folks out walking/ cycling in the village and past my house close to Waikouaiti beach. I believe they too would use and appreciate such safe pathways that would enable us all to enjoy new scenery as we improve our physical and mental health.</p>	0	0
Roads, Water and Waste Services	<p>I support the Coastal Communities Cycle Connection project because I would like to be able to walk and ride with my daughter safely between our communities. It will also provide children a great independence to commute between the communities.</p>	0	0
Economic Wellbeing	<p>We support the Coastal Communities Cycle Connection project because we run a small bed and breakfast business, and can only feel that this would provide us with a new supply of guests passing through. Also a safe passage and green.</p>	0	0
Social and Community Wellbeing	<p>I support the Coastal Communities Cycle Connection project because it will allow much safer travel between our communities. It will also encourage more people to walk and cycle increasing wellbeing, fitness and enjoyment of our stunning environment.</p>	0	0
Economic Wellbeing	<p>I very much support the Coastal Communities Cycle Connection project as I see it being a fantastic way to safely connect our communities. I believe it will also bring economic benefits to our small communities through attracting recreational travellers.</p>	0	0

Roads, Water and Waste Services	I support the Coastal Communities Cycle Connection so that I can cycle further and SAFELY between coastal communities. This will be a fantastic asset to our communities and would be well used	0	0
Social and Community Wellbeing	I fully support Coastal Communities Cycle Connection as I strongly believe it will help the overall health and well-being of the community. People being able to ride between communities instead of drive would be fantastic	0	0
Roads, Water and Waste Services	I support the coastal communities cycle connection because I teach bike skills to my primary school students and want them to have safe passage between communities so that as their skills and maturity grows so can their independence. How good would a cycling adventure to the library be with a picnic beside the river before returning to school? With better cycle connections the health of our community will improve.	0	0
Roads, Water and Waste Services	I support the coastal communities Cycle Connection because I ride between (i) Warrington to Waitati or (ii) Warrington to Waikouaiti and there are some extremely dangerous parts of those routes where bikes and cars share the existing roads. I ride for pleasure, exercise and to support the local business up and down our coast.	0	0
Roads, Water and Waste Services	I support the Coastal Communities Cycle Connection project because as a local resident, I am really looking forward to being able to visit our local communities without getting in my car.	0	0
Economic Wellbeing	I support the Communities Cycle Connection project - great way to safely connect the East Coast, lovely for tourism,	0	0
Pools, Parks, Gardens and Sporting Facilities	I support the coastal communities cycle connection for anyone, locals or tourists to be able to ride safely around our beautiful country, such an asset for our communities	0	0
Roads, Water and Waste Services	I support the Coastal Communities Cycle Connection project because I would like to be able to walk and ride safely between our communities. We live in Waitati and would value being linked to small communities like Warrington and Seacliff to the north via a safe path for bikes and pedestrians. Although legal, It is not safe to ride a bike on the motorway north of Waitati and there is no other means to get between these communities without a motor vehicle.	0	0
Roads, Water and Waste Services	The bike path between Port Chalmers and Dunedin and on the other side of the harbour are assets to the city. Please consider funding the same initiatives for safer commutes and communities to the north coastal communities.	0	0
Roads, Water and Waste Services	I support the Coastal Communities cycle Connection Project Because we share facilities and I would like to walk or bike safely between our communities	0	0
Roads, Water and Waste Services	I support the coastal communities cycle connection because I would love to ride my bike safely to Waikouaiti from Karitane	0	0

Roads, Water and Waste Services	I support the Coastal Communities Cycle Connection project because I would love for my family to be able to walk and ride safely between our communities. What a great asset it would be.	0	0
Roads, Water and Waste Services	We totally support this project as we frequently cycle between Warrington and Waitati. The road is not at all safe with the large traffic volume including trucks.	0	0
Economic Wellbeing	I support the Coastal Communities Cycle Connection project because I would like to be able to walk and ride safely between our communities. I am a keen cyclist around the South Island, I've seen the benefits cycleway connections bring to communities, so these communities should not be excluded, since they are close to Dunedin and as already demonstrated in Waihola - all age groups are enjoying the new Clutha Gold Trail section. We need Dunedin and its surrounds to become a cycling destination.	0	0
Pools, Parks, Gardens and Sporting Facilities	I support the Coastal Communities Cycle Connection project because I would like to be able to walk/run and ride safely between our communities with my kids. And I would use it for training, it would be awesome to have something like that so close to home.	0	0
Economic Wellbeing	I support the Coastal Communities Cycle Connection project because I would like to be able to walk and ride safely between our communities. I also think it will attract more visitors to the area.	0	0
Economic Wellbeing	I strongly support the Coastal Communities Cycle Connection project because it would be a great way to connect our communities. Having something like this on our back door would be great for people of all ages and would definitely bring more visitors to our area!	0	0
Roads, Water and Waste Services	I support the Coastal Communities Cycle Connection project because I would like to be able to walk and ride safely between our communities. The cycle way will be an amazing asset for the area.	0	0
Roads, Water and Waste Services	I absolutely support the Coastal Communities Cycle Connection project because I would like to be able to walk and ride safely between Waikouaiti and Dunedin and all the towns in between and it is too dangerous to use existing roads	0	0
Roads, Water and Waste Services	Can't wait to have a safe track between waitati and rest of the coast	0	0
Roads, Water and Waste Services	I support the coastal communities cycle connection. My family of 6 live in Warrington. We feel that there should be cycle and walking connections between our local communities, and importantly connections to local amenities as well.	0	0
Economic Wellbeing	POWA supports the Coastal Communities Cycle Connection. Providing a sustainable alternative to connect our communities. Improved social connections with less traffic is a win socially, economically and environmentally.	0	0

Roads, Water and Waste Services	I support the coastal communities project, because cycling between Waitati and Warrington is suicidal. I would never bring my kids, so we are forced to drive. This harms human health, environmental health and economic wellbeing.	0	0
Economic Wellbeing	I support the Coastal Communities Cycle Connection project because I believe it would be a great community asset and would increase accessibility between our communities. I also believe that it would make our coast a more attractive destination for tourism.	0	0
Roads, Water and Waste Services	I would love to be able to bike around my community and visit friends safely on the other side of Blueskin bay.	0	0
Roads, Water and Waste Services	We have family in Warrington and would love to ride there to visit. It's too dangerous to ride along the highway, especially with children. We'd definitely make the most of a cycleway.	0	0
Roads, Water and Waste Services	I totally support the coastal communities cycle connection, moving up and down the coast by bike would be excellent and promote healthy life style and looking at our beautiful environment.	0	0
Roads, Water and Waste Services	I am very much in favour of the Northern Cycleway, ie Pt Chalmers to Waikouaiti. Living in Waikouaiti I regularly ride the gravel back roads & the sealed coastal routes between Palmerston & Evansdale for exercise & to enjoy the countryside but will not ride on SH1 other than to link the back roads. To have an flatter graded option completely free of traffic would be greatly appreciated while the full route would open up many more options for alternative loop ride.	0	0
Roads, Water and Waste Services	Passenger trains to ChCh in the future as well.	0	0
