## Luxair will purchase two additional Boeing 737-8

*Following a meeting held on Friday, 28 April 2023, Luxair's Board of Directors has confirmed the purchase of two additional Boeing 737-8.*

Luxair's Board of Directors has confirmed the purchase of two additional Boeing 737-8 aircraft, following a meeting held on Friday, 28 April 2023. These aircraft will supplement the two Boeing 737-8 purchased in March 2023, bringing Luxair's total number of firm orders for the Boeing 737-8 to four.

Additionally, and as a reminder, Luxair has secured an immediate fleet increase based on two Boeing 737-8 aircraft under a leasing agreement, which will enter into service in the summer season of 2023 and who will be operated until 2027. All of these aircraft will be operated by Luxair crews.

Luxair is committed to investing in more modern and fuel-efficient aircraft to provide customers with a more comfortable flying experience. The Boeing 737-8 has a spacious cabin, improved seating comfort, greater seat spacing of 30 inches and larger overhead bins to accommodate more cabin baggage. With these modern and fuel-efficient aircraft, Luxair will be able to offer more comfortable flights and expand its network of destinations, providing even more options to its customers.

The purchase of these new Boeing 737-8 aircraft and the leasing agreement for additional planes demonstrate Luxair's commitment to providing always better services to its clients. Luxair thanks its Board of Directors for the renewal of their trust in investing in the future of the company and looks forward to continuing to provide excellent services to its customers with these new Boeing 737-8 aircraft.
