Official Publication of the Abstract of Votes Cast for the following elections:

2011 Odd-Year

2012 Primary

2012 General

To the Residents of Colorado,

In 2012, more than 2.5 million Colorado voters made their voices heard. Their votes helped elect our President and seven U.S. Representatives. At the state level, voters elected two state board of education members, four CU regents, 20 state senators, 65 state representatives, 22 district attorneys, and other county and local elected leaders. Voters also retained judges and voted on three statewide ballot initiatives.

The following document contains the official statewide election results from 2011, the 2012 Primary, and the 2012 General Election. It also contains other important information, including voter turnout statistics and a directory of state and county elected officials. My office compiled the results and information from material filed by each of Colorado's 64 county clerk and recorders.

I hope you find this both useful and informative.

Sincerely,

A handwritten signature in blue ink, appearing to read "Scott Gessler".

Scott Gessler  
Colorado Secretary of State

## About the Format of this Abstract

### Results Contained in the Abstract

This publication contains the official certified results for the 2011 Odd-Year, 2012 Primary, and 2012 General Elections for all candidates, ballot issues, and ballot questions.

### Results & Officer Information Reported by the Counties

The election results in this abstract were obtained from each of Colorado's 64 counties. These results are more accurate than the compiled and totaled returns reported on the Secretary of State's website immediately after the election because they account for any miscalculations in the totals initially reported by each county.

### Judicial Officer Information

Judicial officer information, including dates of oath and terms of office, was provided by the Office of the State Court Administrator.

### Total Registered Voters, Total Ballots Cast, & Turnout

The number of registered voters eligible to vote in each contest is reported in the column titled "Registered Voters." The column titled "Ballots Cast" reflects the number of voters who actually voted in a particular contest, as reported by each county. The column titled "Turnout %" reflects the percentage of registered voters who cast a ballot in each contest.

### Sample Statewide Results

For every statewide contest, such as President, the results are reported by each of the 64 counties listed in alphabetical order, with a statewide total at the bottom. Candidates are listed in the order they appeared on the ballot. For example:

| County   | Registered Voters | Ballots Cast | Virgil H. Goode Jr. / Jim Clymer (ACN) | Barack Obama / Joe Biden (DEM) | Mitt Romney / Paul Ryan (REP) | Gary Johnson / James P. Gray (LIB) |
|----------|-------------------|--------------|--|--------------------------------|-------------------------------|------------------------------------|
| Adams    | 258,272           | 177,945      | 570                                    | 100,649                        | 70,972                        | 2,413                              |
| Alamosa  | 10,013            | 6,837        | 32                                     | 3,811                          | 2,705                         | 73                                 |
| Arapahoe | 384,522           | 288,033      | 654                                    | 153,905                        | 125,588                       | 3,552                              |

### Legislative & Congressional District Results

Legislative and congressional district results include each county comprising the legislative or congressional district in alphabetical order, with a district total at the bottom. For example:

## A Note on Calculating Voter Turnout

Because of a recent change in Colorado law, this abstract marks a change in the method used to calculate voter turnout. Previously, turnout percentage had been calculated based on the total number of active registered voters rather than the total number of registered voters—which includes both active and inactive voters. In 2012, the General Assembly amended the law to require that turnout be calculated as a percentage of all registered voters. This abstract reflects the new law.

Calculating turnout as a percentage of all registered voters more accurately represents true turnout, because it accounts for inactive voters. Inactive voters are eligible to vote and every election includes inactive voters who do cast their ballots. But because all registered voters are now included in the calculation, a comparison of voter turnout from the 2012 General and Primary Elections with turnout from previous years' elections could lead to the incorrect conclusion that voter turnout decreased significantly in 2012. To avoid confusion, we have included additional tables in the turnout section at the end of this abstract showing the turnout calculation using both methods—the old and the new. The following is an example of the differences you will see when comparing the two calculation methods:

**2012 General Election Turnout  
(calculated as a percentage of active voters)**

| County    | Active Voters | Ballots Cast | Turnout % |
|-----------|---------------|--------------|-----------|
| Adams     | 189,069       | 177,945      | 94.12%    |
| Alamosa   | 7,152         | 6,837        | 95.60%    |
| Arapahoe  | 310,775       | 288,033      | 92.68%    |
| Archuleta | 7,195         | 6,805        | 94.58%    |

**2012 General Election Turnout  
(calculated as a percentage of registered voters)**

| County    | Registered Voters | Ballots Cast | Turnout % |
|-----------|-------------------|--------------|-----------|
| Adams     | 258,272           | 177,945      | 68.90%    |
| Alamosa   | 10,013            | 6,837        | 68.28%    |
