## EESSÕNA

Kogumik “**Eesti rahvastik rahvaloenduste andmetel**” sisaldab **1959., 1970., 1979.** ja **1989.** aastal Eestis toimunud rahvaloenduste andmeid. Nimetatud loendused viidi läbi üleliiduliste rahvaloenduste raames ning üleliiduliste programmide alusel nii küsimustike kui ka väljundtabelite osas. Klassifitseerimisel olid aluseks üleliidulised klassifikaatorid ehk sõnastikud, mis olid koostatud vastava aasta rahvaloenduse tarbeks. Kogumik on koostatud olemasolevate väljundtabelite baasil. Kogumik ilmub kahes osas.

Käesolev väljaanne on kogumiku **1. osa** ja sisaldab neli peatükki:

- I RAHVASTIKU KOGUARV JA PAIKNEMINE;
- II RAHVUS, EMAKEEL JA TEISE KEELE VALDAMINE;
- III RAHVASTIKU SOOLIS-VANUSELINE KOOSSEIS;
- IV HARIDUS JA ÕPPIMINE.

Järgnevalt on esitatud selgitused kogumikus kasutatud **mõistete** kohta.

Rahvaloenduse **kriitiline moment** on ajamoment – kuupäev ja kellaaeg, mis seisuga rahvaarv ja muud tunnused fikseeritakse. Kellaaajaks oli kell 00.00 öösel vastu nimetatud perioodi alguskuupäeva.

Rahvaloenduste **kriitilised momendid** ning loenduste perioodid olid järgmised:

- **15. jaanuar 1959;** 15.01.–22.01.1959;
- **15. jaanuar 1970;** 15.01.–22.01.1970;
- **17. jaanuar 1979;** 17.01.–24.01.1979;
- **12. jaanuar 1989;** 12.01.–19.01.1989.

Rahvaloendused viidi läbi nimetatud kriitilistel momentidel fikseeritud vabariigisisese **haldusjaotuse** alusel. **Tabelites** on toodud andmed vastava **loendusaasta halduspiirides**, kui ei ole eraldi **märkust** pealkirjas. **Kaardil** on esitatud Eesti haldusjaotus seisuga **01.01.1994**.

Eestis oli nimetatud aastatel **6 vabariiklikku linnahaldust**: Tallinn, Kohtla-Järve, Narva, Pärnu, Sillamäe ja Tartu. Aastate lõikes oli linnahalduste koosseis erinev, välja arvatud Sillamäe ja Tartu.

### **Tallinna linnahaldus:**

Rahvaloendustel fikseeriti kaks rahvastikukategooriat: **faktiline** (kohalolev) ning **alaline rahvastik**. Loenduslehtedele kanti loendajate poolt kõik ajutiselt või alaliselt elunevad isikud elukoha järgi, mitte aga töö- või teenistuskoha järgi. Andmed kanti loenduslehtedele loendatava suulise ütluse alusel, dokumente ei küsitud.

**Faktiline rahvastik**, s. o. loenduse kriitilisel momendil kohalolev alaline elanikkond ja lisaks loenduse kriitilisel momendil ajutiselt kohalolevad isikud. Faktilise rahvastiku hulka arvati ka isikud, kes alaliselt elunesid antud eluruumis, kuid loenduse kriitilisel momendil polnud kodus, vaid viibisid sama linna, alevi või valla (külanõukogu) territooriumil, aga ka isikud, kes viibisid väljaspool nimetatud territooriumi tööülesannete täitmisel või olid teel sõiduvahendiga.

**Alaline rahvastik**, s. o. isikud, kes alaliselt elunesid antud eluruumis ja isikud, kes olid ajutiselt ära, kui nende äraolek ei ületanud 6 kuud. Alalise rahvastiku hulka arvati ka isikud, kes olid saabunud antud asustatud punkti alaliselt elama, õppima või töötama, kuigi nende kohalolek oli kestnud alla 6 kuu.

Sõjaväes aega teenivad sõdurid loendati nende teenistuskohas, kuid arvestati teenistuse-eelse elukoha järgi. Kinnipidamiskohtades viibivad isikud loendati kinnipidamiskoha asukohas. Välismaale komanderingusse (alla 1 kuu) sõitnud isikud ning välismaale puhkusele, külla, ravile või turismireisile sõitnud isikud loendati nende alalises elukohas olenemata sõidu kestusest. Meremehed ja teised laevadel töötavad isikud loendati nende elukoha aadressi alusel.

Rahvaloenduste küsimustikud koostati kahes osas: a) küsimused kogu elanikkonnale, s. o. **kõikse loenduse küsimustik** ning b) küsimused ühele neljandikule elanikkonnast, s. o. **väljavõttelise loenduse küsimustik**.

Käesolevas väljaandes sisalduv materjal põhineb kõikse loenduse raames esitatud küsimustel (v. a. 4.20 ja 4.21, mis sisaldavad osaliselt andmeid ka töötava rahvastiku kohta).

**Tabelites** on toodud andmed järgmiselt: **1959.** ja **1970.** aastal **faktilise** rahvastiku kohta ning **1979.** ja **1989.** aastal **alalise** rahvastiku kohta, kui ei ole eraldi **märkust** pealkirjas.

Rahvastiku kohta on andmed toodud järgmises jaotuses: **kogurahvastik, linnarahvastik, maarahvastik, Tallinna linna elanikkond**. Igas alajaotuses on eristatud rahvastik ka **soo järgi**, s. o. **mehed** ja **naised**. **Linnarahvastik**, s. o. isikud, kes elasid linnades ja alevites. **Maarahvastik**, s. o. isikud, kes elasid alevikes ja külates. **Kogurahvastik** hõlmab nii linnarahvastiku kui ka maarahvastiku.

**Vanus** on esitatud **1-aastase jaotusena** või **5-aastaste vanusegruppidenä**. Eraldi on välja toodud 3 vanusegruppi, lähtudes tööealisuse vanusepiirist, mis on naiste ja meeste puhul erinev. **Mittetöoealised**, s. o. isikud (mehed ja naised) vanuses **0-15** aastat. **Töoealised** isikud jaotatakse **soo** järgi: **naised 16-54** aastat, **mehed 16-59** aastat. **Pensionialised** isikud **soo** järgi: **naised 55+** aastat, **mehed 60+** aastat.

**Rahvus** märgiti loenduslehele loendatava ütluse järgi. Laste rahvus märgiti vanemate ütluse järgi, eri rahvusest vanemate vaidluse korral märgiti lapsele ema rahvus.

**Emakeel** märgiti loendatava ütluse järgi. Emakeele määratlemise raskuste korral märgiti keel, mida küsitletav kõige paremini valdas või mida perekonnas tavaliselt kõneldi. Alaealiste laste emakeel märgiti vanemate ütluse järgi, määratlemise raskuste korral aga keel, mida perekonnas tavaliselt kõneldi.

**Teine keel**, s. o. mõni teine NSV Liidu rahvaste keel, milles küsitletav oskas lugeda, kirjutada ja vabalt kõnelda või ainult vabalt kõnelda. Isikute puhul, kes ei vullanud vabalt ühtki teist NSV Liidu rahvaste keelt, samuti laste puhul, kes ei osanud veel rääkida, märgiti teise keele kohta "ei".

**Haridus** märgiti alates vanusest: 1959. a. – 9 a.; 1970. a. ja 1979. a. – 7 a.; 1989. a. – 6 a.

**Haridustaseme** iseloomustamisel arvestati **õppeasutuse astet** (alg-, kesk-, kõrg-) ja **õppeasutuse profiili** (üld-, eri-), mille inimene oli **viimasena lõpetanud**.

**Kõrgharidus** märgiti isikutel, kes olid lõpetanud kõrgõppeasutuse (instituudi, akadeemia, ülikooli, välja arvatud marksismi-leninismi ülikool ja rahvaülikool).

**Lõpetamata kõrgharidus** märgiti isikutel, kes õppisid või olid õppinud kõrgkoolis ning olid läbinud pool või üle poole õppeajast. Kõrgkoolis õppijate või varem õppinute puhul, kes olid läbinud alla poole õppeajast, märgiti haridus, mis neil oli enne kõrgkooli astumist.

**Keskeriharidus** märgiti isikutel, kes olid lõpetanud tehnikumi või muu keskeriõppeasutuse.

**Üldkeskharidus** märgiti isikutel, kes olid lõpetanud üheteistkümnklassilise või kümneklassilise kooli; gümnaasiumi (enne 1917. aastat), reaalkooli, kommertskooli; teise astme kooli või muu üldharidusliku keskkooli.

**Mittetäielik keskharidus** märgiti isikutel, kes olid lõpetanud 7 klassi 1961. aastal või enne seda, või 8 klassi 1962. aastal või hiljem, samuti isikutel, kes olid lahkunud koolist enne antud aastal nõutava keskastme kooli lõpetamist, samuti antud aastal nõutava keskastme kooli 8.–10. või 9.–11. klassi õpilastel. Kutsekooli lõpetanud isikutel, kes olid omandanud koos elukutsega keskhariduse või kes olid saanud elukutse keskhariduse baasil, märgiti “üldine keskharidus”, teistel aga see haridus, mis neil oli enne sellesse õppeasutusse astumist.

**Algharidus** märgiti isikutel, kes olid lõpetanud algkooli või 1972. aastal ja hiljem 3 klassi; ükskõik millisel aastal 4–6 klassi; 1962. aastal ja hiljem 7 klassi ning 4.–7. klassi või 4.–8. klassi õpilastel. Isikutel, kes olid välja langenud 1972/1973. õppeaastal ja hiljem 4. klassist, ükskõik millisel aastal 5.–7. klassist ning 1962/63. õppeaastal ja hiljem 8. klassist väljalangenutel märgiti samuti “algharidus”.

**Alghariduseta** isikuks loeti inimene vastava aasta vanuse alampiirist alates, s. o. 9–aastased (1959. a.), 7–aastased (1970., 1979. a.), 6–aastased (1989. a.) ja vanemad (nii õpilased kui mitteõpilased), kui neil puudus algharidus (vastava aasta nõuete järgi), kuid nad oskasid mingis keeles lugeda ja kirjutada või ainult lugeda. Kirjaoskamatuks loeti isikud alates hariduse jaoks nõutava vanuse alampiirist ja vanemad, kui nad ei osanud lugeda.

**Õppijate** arv selgitati loendustel küsimusega õppeasutuse tüübi (1959. aastal nimetuse) kohta. Märkida tuli ainult üks kõige kõrgemat tüüpi kool, milles küsitletav õppis. Vastuste variandid: **kõrgkool** (päevane, õhtune ja kaugõppevorm); **keskeriõppeasutus** (tehnikum, pedagoogiline kool, meditsiinikool jmt.); **üldhariduskool** (keskkool, mittetäielik keskkool, algkool, 7- või 8-klassiline kool, tervisehäiretega laste erikool); **kutsekool**, s. o. kool, mis annab kutsehariduse või **kutsekeskkool** (alates 1979. aastast), s. o. kutsekool, mis annab ka täieliku keskhariduse; **muu kool** ja **kursus** (marksismi-leninismi ülikool ja õhtuülikool, rahvaülikool, vabriku- ja tehasekoolid, koolid, mis ei anna üldharidust ja kursused, mis kestavad vähemalt 1 kuu (1959. a.) või vähemalt 6 kuud (alates 1970. a.)). “Ei õpi” märgiti isikutel, kes õppisid kursustel, mille kestus oli ülalnimetatust lühem.

**1989. a.** rahvaloendusel esitati 15-aastastele ja vanematele isikutele küsimus kutsekooli lõpetamise kohta. **Lõpetanud kutsekooli** märgiti isikutel, kes olid lõpetanud kutsekeskkooli või muu kutsekooli, tööstuskooli, harukondliku kutsekooli, vabriku-tehasekooli või tehnikakooli. Isikutel, kes polnud lõpetanud kutsekooli, samuti kutsekeskkoolis või harukondlikus kutsekoolis õppijatel märgiti “ei”.

Käesoleva kogumiku koostasid rahvaloenduse sektori töötajad Tamara Aleksejeva, Liivi Kull, Inge Nael, Kalev Noorkõiv, Kirill Volkovski. Trükkiks valmistas ette Inge Nael. Töid juhendas rahvastikustatistika ja rahvaloenduse teenistuse nõunik Lembit Tepp.

Kogumiku koostajad avaldavad tänu Eesti Keele Instituudi juhtivteadurile Peeter Pällile konsultatsioonide eest rahvuste, keelte ning keelerühmade nimetuste osas.

## **PREFACE**

The publication “**Population of Estonia by Population Censuses**” contains the data of the population censuses held in Estonia in **1959, 1970, 1979 and 1989**. These censuses were carried out in the framework of all-Union population censuses and on the basis of all-Union programmes, regarding both questionnaires and output tables. In classification one proceeded from all-Union classifiers or glossaries which had been compiled for the census of the given year. The publication has been compiled on the basis of existing output tables. It comes out in two parts.

The present publication is **Part I** of the reference book and consists of four chapters:

- I TOTAL POPULATION AND ITS LOCATION;**
- II NATIONALITY, MOTHER TONGUE AND KNOWLEDGE OF OTHER LANGUAGE;**
- III SEX AND AGE DISTRIBUTION OF THE POPULATION;**
- IV EDUCATION AND STUDIES OF THE POPULATION.**

The following is the explanation of **terms** used in this reference book.

The **critical moment** of the population census is the moment – date and time when the population and other characteristics are established. The time was 00:00 hours at night before the starting date of the respective period.

The **critical moments** and periods of censuses were the following:

- **January 15, 1959;** 15.01.–22.01.1959;
- **January 15, 1970;** 15.01.–22.01.1970;
- **January 17, 1979;** 17.01.–24.01.1979;
- **January 12, 1989;** 12.01.–19.01.1989.

The censuses were carried out according to the **administrative distribution** of the republic as it existed at those critical moments. The **tables** present data in the **administrative borders** of the respective census year if there is no **special headnote** below table title. The **map** shows the administrative division of Estonia on **January 1, 1994**.

Estonia had **6 republican town administrations** in these years: Tallinn, Kohtla-Järve, Narva, Pärnu, Sillamäe and Tartu. In different years the composition of republican town administrations was different, except for Sillamäe and Tartu.

### **The republican town administration of Tallinn:**

In 1959 – city of Tallinn;

In 1970 – city of Tallinn, borough of Maardu;

In 1979 – city of Tallinn, borough of Maardu, borough of Saue;

In 1989 – city of Tallinn, town of Maardu, borough of Saue.

### **The republican town administration of Kohtla-Järve:**

In 1959 – city of Kohtla-Järve, town of Kiviõli, borough of Püssi and the rural population;

In 1970, 1979 and 1989 – city of Kohtla-Järve, town of Kiviõli, borough of Püssi and borough of Viivikonna.

### **The republican town administration of Narva:**

In 1959 – city of Narva, borough of Narva-Jõesuu and the rural population;

In 1970, 1979 and 1989 – city of Narva and borough of Narva-Jõesuu.

### **The republican town administration of Pärnu:**

In 1959 – city of Pärnu, town of Sindi, borough of Pärnu-Jaagupi, borough of Lavassaare and the rural population;

In 1970, 1979 and 1989 – city of Pärnu and town of Sindi;

### **The republican town administration of Sillamäe:**

In 1959, 1970, 1979 and 1989 – city of Sillamäe.

### **The republican town administration of Tartu:**

In 1959, 1970, 1979 and 1989 – city of Tartu.

Two categories of population were established at censuses: **actual (de facto)** and **resident population**.

Enumerators recorded all transients (visitors) and permanent residents on census sheets by place of residence, not by place of work or service. Data were written on census sheets according to the oral statement of the person questioned; documents were not asked.

**Actual population** were permanent residents and transients (visitors) who were there at the critical moment of the census. Actual (de facto) population involved also the persons who lived permanently in the given dwelling and were not at home at the critical moment of the census but were in the territory of the same city, town or rural municipality (village council), and also the persons who were outside the above mentioned territory on work assignment or were on the road in a vehicle.

**Resident population** were persons who lived permanently in the given dwelling and persons who were temporarily absent if their **absence** did not exceed **6 months**. The resident population involved also the persons who had come to live permanently, study or work at the given agglomeration, although their stay had lasted less than 6 months.

Soldiers serving their time in the military were enumerated at their place of service but were counted by the pre-service place of residence of conscripts. Persons kept in places of detention were enumerated at their place of detention. Persons who had travelled abroad on a business trip (for less than 1 month) and persons who had travelled abroad on holidays, to visit someone, to get medical treatment, or on a tourist trip, were counted at their permanent place of residence regardless of the length of the trip. Sailors and other persons working on ships were counted according to the address of their place of residence.

Two questionnaires were used in the censuses: a) **questionnaire for the whole population**, i.e. questionnaire of the complete coverage and b) **questionnaire for one quarter of the population**, i.e. the questionnaire of the sample coverage.

The material of this publication is based on questions asked in the questionnaire for the whole population (except tables 4.20 and 4.21 which partially have also data on employed population).

**In tables** data have been presented as follows: **in 1959 and 1970 on actual population**, and **in 1979 and 1989 on resident population** if there is no **note** below title.

**Data** on population have been brought out in the following **distribution**: **total population**, **urban population**, **rural population** and the population of the **city of Tallinn**.

In every division the **population** has been distinguished also **by sex**, i.e. to **males and females**.

**Urban population** are persons living in towns and boroughs.

**Rural population** are persons who live in small towns and villages.

**Total population** comprises both urban and rural population.

**Age** has been brought out by **1-year** distribution or **5-year** age groups.

Three age groups have been presented separately, proceeding from the age **limit of the working age** which differs in the case of females and males. **Under-working-age** persons are males and females aged **until 15 years**. **Working-age** persons are divided by sex: **females 16-54 years**, **males 16-59 years**. **Over-working-age** persons are divided by sex: **females 55+ years**, **males 60+ years**.

**Nationality** was entered on census sheets according to the statement of the person. The nationality of the child was written according to the statement of parents. If there was a dispute between parents of different nationality, then the mother's nationality was written as that of the child.

**Mother tongue** was noted down according to the person's statement. If determining the mother tongue was difficult, the census workers noted down the language which the person spoke best, or which was usually spoken in the family. The mother tongue of the under-age children was noted down according to the statement of parents; if determining it was difficult, the language usually spoken in the family was noted down.

The **second language** was the language of some other nationality of the U.S.S.R., which the respondent could read, write and speak fluently, or which the respondent could only speak fluently. In case of persons who did not speak fluently any other language of the peoples of the U.S.S.R., and in the case of children who could not talk as yet, the enumerator wrote "no" for second language.

**Education** was noted down starting from the following age: in 1959 – 9 years; in 1970 and 1979 – 7 years, and in 1989 – 6 years.

For describing the **educational level**, the enumerators took into account the **stage** of the **educational institution** (elementary, secondary, higher) and the **profile** of the **educational institution** (general, special), which the person had finished most recently.

**Higher education** was noted down for those persons who had graduated from the higher educational institution (institute, academy, university, except for universities of Marxism-Leninism and people's universities).

**Incomplete higher education** was noted down for persons who were studying or had studied at higher school; and had passed half or more than half of the study period. In the case of students or former students who had passed less than half of the study period, the enumerators noted down the education which the persons had before entering the higher school.

**Specialized secondary education** was noted down for persons who had finished a technical school or some other institution of specialized secondary education.

**General secondary education** was noted down for persons who had graduated from 11-grade or 10-grade school; pre-1917 grammar school, modern school, commercial school; second stage school or other general education secondary school.

**Incomplete secondary education** was noted down for those persons who had finished either grade 7 in 1961 or before, or grade 8 in 1962 or later, and for those persons who had left school before finishing the required secondary level school of the particular year and also for the pupils of the grades 8–10 or 9–11 of the required secondary level school.

For the persons who had either graduated from the vocational school and had obtained secondary education together with the profession, or obtained profession after secondary school, "general secondary education" was noted down; for others — the educational level they had before entering the particular school.

**Primary education** was noted down for those persons who had either finished primary school or grade 3 in 1972 or later; grades 4–6 no matter when; grade 7 in 1962 or later and also for the pupils of grades 4–7. For the drop-outs from grade 4 in 1972/73 and later, for the drop-outs from grade 5–7 no matter when and from grade 8 in 1962/63 and later, "primary education" was noted down.

**Persons** with minimum age limit of the particular year, i.e. 9-year-olds (1959), 7-year-olds (1970, 1979), six-year-olds (1989) and older (both pupils and not pupils) were classified as "**persons without primary education**" if they had no primary education (according to the requirements of the particular year) but if they could either read and write in some language or they could only read. Persons with minimum age limit for schooling and older, unable to read, were classified as "illiterates".

*The number of pupils and students was estimated with the help of inquiries about the type (in 1959, the name) of educational institution. The inquired person had to note down only one (the highest) educational institution he/she was studying at.*

*The possible answers were: **higher educational institution** (full-time students, evening students, correspondence students); **specialized secondary school** (technical school, pedagogical school, medical school etc.); **school of general education** (secondary school, incomplete secondary school, primary school, 7- or 8-grade school, evening secondary school, special school for children with health problems); **vocational school**, i.e. school that gives professional education or **vocational secondary school** (since 1979), i.e. vocational school which gives also complete secondary education; **other school or course** (university and evening university of Marxism–Leninism, people's university, factory schools, schools which do not give general education, and courses with the duration for at least a month (1959) or 6 months (since 1970)). “Is not studying” was noted down for those persons who attended the courses with shorter duration than was stated above.*

*During 1989 census, 15-year olds and older persons were inquired about the **graduation of vocational school**. “Graduates from vocational school” was noted down for those persons who had graduated from vocational secondary or other vocational-type school, industrial school, ministerial vocational school, factory school or technical school.*

*For the persons who had not graduated from vocational school or were studying at vocational secondary school or ministerial secondary school, “no” was noted down.*

*The publication has been compiled by the specialists of the Population Census Section Tamara Aleksejeva, Liivi Kull, Inge Nael, Kalev Noorkõiv and Kirill Volkovski. The publication was prepared for printing by Inge Nael. The work was supervised by Lembit Tepp, counsellor of the Population Statistics and Population Census Division.*

*The compilers of the publication thank Peeter Päll, senior researcher of the Institute of Estonian Language for consultations concerning nationalities, languages and language groups.*
